A People's Art History of the United States Aug 07 2020 Most people outside of the art world view art as something that is foreign to their experiences and everyday lives. A People's Art History of the United States places art history squarely in the rough-and-tumble of politics,

social struggles, and the fight for justice from the colonial era through the present day. Author and radical artist Nicolas Lampert combines historical sweep with detailed examinations of individual artists and works in a politically charged narrative that spans the conquest of the Americas, the American Revolution, slavery and abolition, western expansion, the suffragette movement and feminism, civil rights movements, environmental movements, LGBT movements, antiglobalization movements, contemporary antiwar movements, and beyond. *A People's Art History of the United States* introduces us to key works of American radical art alongside dramatic retellings of the histories that inspired them. Stylishly illustrated with over two hundred images, this book is nothing less than an alternative education for anyone interested in the powerful role that art plays in our society.

The Philosophy of Art History Aug 26 2019 First published in 1959, this book is concerned with the methodology of art history, and so with questions about historical thinking; it enquires what scientific history of art can accomplish, what are its mean and limitations? It contains philosophical reflections on history and begins with chapters on the scope and limitations of a sociology of art, and the concept of ideology in the history of art. The chapter on the concept of "art history without names" occupies the central position in the book - thoroughly discussing the basic philosophical outlook for the whole work. There are also further chapters on psychoanalysis, folk art and popular art. The chapter on the role of convention in the history of art points the way for further study.

The Expressionist Turn in Art History Dec 31 2019 During the period in which Expressionist artists were active in central Europe, art

historians were producing texts which also began to be characterized evocatively as 'expressionist', yet the notion of an expressionist art history has yet to be fully explored in historiographic studies of the discipline. This anthology offers a cross-section of noteworthy art history texts that have been described as expressionist, along with critical commentaries by an international group of scholars. Written between 1912 and 1933, the primary sources have been selected from the published scholarship of both recognized and less-familiar figures in the field's Germanic tradition: Wilhelm Worringer, Fritz Burger, Ernst Heidrich, Max Dvor? Heinrich W?lfflin, and Carl Einstein. Translated here for the first time, these examples of an expressionist turn in art history, along with their secondary analyses and the book's introduction, offer a productive lens through which to re-examine the practice and theory of art history in the early twentieth century.

A Little History of Art May 28 2022 A thrilling journey through 100,000 years of art, from the first artworks ever made to art's central role in culture today. "A fresh take on art history as we know it." (Katy Hessel, The Great Women Artists Podcast) Charlotte Mullins brings art to life through the stories of those who created it and, importantly, reframes who is included in the narrative to create a more diverse and exciting landscape of art. She shows how art can help us see the world differently and understand our place in it, how it helps us express ourselves, fuels our creativity and contributes to our overall wellbeing and positive mental health. Why did our ancestors make art? What did art mean to

them and what does their art mean for us today? Why is art even important at all? Mullins introduces readers to the Terracotta Army and Nok sculptures, Renaissance artists such as Giotto and Michelangelo, trailblazers including Käthe Kollwitz, Pablo Picasso, Frida Kahlo, and contemporary artists who create art as resistance, such as Ai Weiwei and Shirin Neshat. She also restores forgotten artists such as Sofonisba Anguissola, Guan Daosheng and Jacob Lawrence, and travels to the Niger valley, Peru, Java, Rapa Nui and Australia, to broaden our understanding of what art is and should be. This extraordinary journey through 100,000 years celebrates art's crucial place in understanding our collective culture and history.

Art History After Modernism May 04 2020 "Art history after modernism" does not only mean that art looks different today; it also means that our discourse on art has taken a different direction, if it is safe to say it has taken a direction at all. So begins Hans Belting's brilliant, iconoclastic reconsideration of art and art history at the end of the millennium, which builds upon his earlier and highly successful volume, *The End of the History of Art?*. "Known for his striking and original theories about the nature of art," according to the *Economist*, Belting here examines how art is made, viewed, and interpreted today. Arguing that contemporary art has burst out of the frame that art history had built for it, Belting calls for an entirely new approach to thinking and writing about art. He moves effortlessly between contemporary issues—the rise of global and minority art and its consequences for Western art history, installation and video art, and the troubled institution of the art museum—and questions central to art history's definition of itself, such as the distinction between high and low culture, art criticism versus art history, and the invention of modernism in art history. Forty-eight black and white images illustrate the text, perfectly reflecting the state of contemporary art. With *Art History after Modernism*, Belting retains his place as one of the most original thinkers working in the visual arts today.

A History of Art History Aug 31 2022 "In this authoritative book, the first of its kind in English, Christopher Wood tracks the evolution of the historical study of art from the late middle ages through the rise of the modern scholarly discipline of art history. Synthesizing and assessing a vast array of writings, episodes, and personalities, this original and accessible account of the development of art-historical thinking will appeal to readers both inside and outside the discipline. The book shows that the pioneering chroniclers of the Italian Renaissance--Lorenzo Ghiberti and Giorgio Vasari--measured every epoch against fixed standards of quality. Only in the Romantic era did art historians discover the virtues of medieval art, anticipating the relativism of the later nineteenth century, when art history learned to admire the art of all societies and to value every work as an index of its times. The major art historians of the modern era, however--Jacob Burckhardt, Aby Warburg, Heinrich Wölfflin, Erwin Panofsky, Meyer Schapiro, and Ernst Gombrich--struggled to adapt their work to the rupture of artistic modernism, leading to the current predicaments of the discipline. Combining erudition with clarity, this book makes a landmark contribution to the understanding of art history."--from book jacket

Comparativism in Art History Jun 16 2021 Featuring some of the major voices in the world of art history, this volume explores the methodological aspects of comparison in the historiography of the discipline. The chapters assess the strengths and weaknesses of comparative practice in the history of art, and consider the larger issue of the place of comparative in how art history may develop in the future. The contributors represent a comprehensive range of period and geographic command from antiquity to modernity, from China and Islam to Europe, from various forms of art history to archaeology, anthropology and material culture studies. Art history is less a single discipline than a series of divergent scholarly fields ? in very different historical, geographic and cultural contexts ? but all with a visual emphasis on the close examination of objects. These fields focus on different, often incompatible temporal and cultural contexts, yet nonetheless they regard themselves as one coherent discipline ? namely the history of art. There are substantive problems in how the sub-fields within the broad-brush generalization called 'art history' can speak coherently to each other. These are more urgent since the shift from an art history centered on the western tradition to one that is consciously global.

A History of Art Education Feb 10 2021 Arthur Efland puts current debate and concerns in a well-researched historical perspective. He examines the institutional settings of art education throughout Western history, the social forces that have shaped it, and the evolution and impact of alternate streams of influence on present practice. *A History of Art Education* is the first book to treat the visual arts in relation to

developments in general education. Particular emphasis is placed on the 19th and 20th centuries and on the social context that has affected our concept of art today. This book will be useful as a main text in history of art education courses, as a supplemental text in courses in art education methods and history of education, and as a valuable resource for students, professors, and researchers. “The book should become a standard reference tool for art educators at all levels of the field.” —The Journal of Aesthetics and Art Criticism “Efland has filled a gap in historical research on art education and made an important contribution to scholarship in the field.” —Studies in Art Education

The Books that Shaped Art History: From Gombrich and Greenberg to Alpers and Krauss Mar 02 2020 An exemplary survey that reassesses the impact of the most important books to have shaped art history through the twentieth century. Written by some of today’s leading art historians and curators, this new collection provides an invaluable road map of the field by comparing and reexamining canonical works of art history. From Émile Mâle’s magisterial study of thirteenth-century French art, first published in 1898, to Hans Belting’s provocative *Likeness and Presence: A History of the Image before the Era of Art*, the book provides a concise and insightful overview of the history of art, told through its most enduring literature. Each of the essays looks at the impact of a single major book of art history, mapping the intellectual development of the writer under review, setting out the premises and argument of the book, considering its position within the broader field of art history, and analyzing its significance in the context of both its initial reception and its afterlife. An introduction by John-Paul Stonard explores how art history has been forged by outstanding contributions to scholarship, and by the dialogues and ruptures between them.

The Story of Art Jun 24 2019 "The Story of Art is one of the most famous and popular books on art ever published. For 45 years it has remained unrivalled as an introduction to the whole subject, from the earliest cave paintings to the experimental art of today. Readers of all ages and backgrounds throughout the world have found in Professor Gombrich a true master, who combines knowledge and wisdom with a unique gift for communicating directly his own deep love of the works of art he describes." "The Story of Art owes its lasting popularity to the directness and simplicity of the writing, and also the author's skill in presenting a clear narrative. He describes his aim as 'to bring some intelligible order into the wealth of names, periods and styles which crowd the pages of more ambitious works', and using his insight into the psychology of the visual arts, he makes us see the history of art as 'a continuous weaving and changing of traditions in which each work refers to the past and points to the future, a living chain that still links our own time with the Pyramid age'. In its new format, the 16th edition of this classic work is set to continue its triumphant progress for future generations and to remain the first choice for all newcomers to art."--BOOK JACKET. The Brilliant History of Color in Art Apr 02 2020 The history of art is inseparable from the history of color. And what a fascinating story they tell together: one that brims with an all-star cast of characters, eye-opening details, and unexpected detours through the annals of human civilization and scientific discovery. Enter critically acclaimed writer and popular journalist Victoria Finlay, who here takes readers across the globe and over the centuries on an unforgettable tour through the brilliant history of color in art. Written for newcomers to the subject and aspiring young artists alike, Finlay’s quest to uncover the origins and science of color will beguile readers of all ages with its warm and conversational style. Her rich narrative is illustrated in full color throughout with 166 major works of art—most from the collections of the J. Paul Getty Museum. Readers of this book will revel in a treasure trove of fun-filled facts and anecdotes. Were it not for Cleopatra, for instance, purple might not have become the royal color of the Western world. Without Napoleon, the black graphite pencil might never have

found its way into the hands of Cézanne. Without mango-eating cows, the sunsets of Turner might have lost their shimmering glow. And were it not for the pigment cobalt blue, the halls of museums worldwide might still be filled with forged Vermeers. Red ocher, green earth, Indian yellow, lead white—no pigment from the artist’s broad and diverse palette escapes Finlay’s shrewd eye in this breathtaking exploration.

"Art, History and the Senses " Sep 27 2019 Should sight trump the other four senses when experiencing and evaluating art? Art, History and

the Senses: 1830 to the Present questions whether the authority of the visual in 'visual culture' should be deconstructed, and focuses on the roles of touch, taste, smell, and sound in the materiality of works of art. From the nineteenth century onward, notions of synaesthesia and the multi-sensorial were important to a series of art movements from Symbolism to Futurism and Installations. The essays in this collection evaluate works of art at specific moments in their history, and consider how senses other than the visual have (or have not) affected the works' meaning. The result is a re-evaluation of sensory knowledge and experience in the arts, encouraging a new level of engagement with ideas of style and form.

Circulations in the Global History of Art May 16 2021 The project of global art history calls for balanced treatment of artifacts and a unified approach. This volume emphasizes questions of transcultural encounters and exchanges as circulations. It presents a strategy that highlights the processes and connections among cultures, and also responds to the dynamics at work in the current globalized art world. The editors' introduction provides an account of the historical background to this approach to global art history, stresses the inseparable bond of theory and practice, and suggests a reevaluation of materialist historicism as an underlying premise. Individual contributions to the book provide an overview of current reflection and research on issues of circulation in relation to global art history and the globalization of art past and present. They offer a variety of methods and approaches to the treatment of different periods, regions, and objects, surveying both questions of historiography and methodology and presenting individual case studies. An 'Afterword' by James Elkins gives a critique of the present project. The book thus deliberately leaves discussion open, inviting future responses to the large questions it poses.

Art, History, and Anachronic Interventions Since 1990 Jul 18 2021 This book examines contemporary artistic practices since 1990 that engage with, depict, and conceptualize history. Examining artworks by Kader Attia, Yael Bartana, Zarina Bhimji, Michael Blum, Matthew Buckingham, Tacita Dean, Harun Farocki and Andrei Ujica, Omer Fast, Andrea Geyer, Liam Gillick and Philippe Parreno, Hiwa K, Amar Kanwar, Bouchra Khalili, Deimantas Narkevicius, Wendelien van Oldenborgh, Walid Raad, Dierk Schmidt, Erika Tan, and Apichatpong Weerasethakul, *Art, History, and Anachronic Interventions since 1990* undertakes a thorough methodological reexamination of the contribution of art to history writing and to its theoretical foundations. The analytical instrument of anachrony comes to the fore as an experimental method, as will (para)fiction, counterfactual history, testimonies, ghosts and spectres of the past, utopia, and the "juridification" of history. Eva Kernbauer argues that contemporary art—developing its own conceptual approaches to temporality and to historical research—offers fruitful strategies for creating historical consciousness and perspectives for political agency. The book will be of interest to scholars working in art history, historiography, and contemporary art.

History of Art, Second Edition, H.W. Janson Oct 21 2021

The Art of History Nov 21 2021 One has to look no further than the audiences hungry for the narratives served up by *Downton Abbey* or *Wolf Hall* to know that the lure of the past is as seductive as ever. But incorporating historical events and figures into a shapely narrative is no simple task. The acclaimed novelist Christopher Bram examines how writers as disparate as Gabriel García Márquez, David McCullough, Toni Morrison, Leo Tolstoy, and many others have employed history in their work. Unique among the "Art Of" series, *The Art of History* engages with both fiction and narrative nonfiction to reveal varied strategies of incorporating and dramatizing historical detail. Bram challenges popular notions about historical narratives as he examines both successful and flawed passages to illustrate how authors from different genres treat subjects that loom large in American history, such as slavery and the Civil War. And he delves deep into the reasons why *War and Peace* endures as a classic of historical fiction. Bram's keen insight and close reading of a wide array of authors make *The Art of History* an essential volume for any lover of historical narrative.
