Wills, Trusts, and Estates AdministrationOct 28 2019 For courses in Wills, Trusts, and Estates (Legal Studies & Paralegal) Flexible, complete coverage of all pertinent topics in the field of estate planning, in a format that's accessible to all levels of students Wills, Trusts, and Estates Administration is specifically designed for paralegal students and legal professionals. It presents the fundamentals of the field in a flexible approach that captures the complexities of modern estate planning while maintaining a clear, accessible style. The book's self-contained chapters let instructors easily adapt the material to their own classes and students. Written by a lawyer with 30 years of experience in the estate-planning field, it covers practical issues that arise in law office--situations that students will actually encounter when they begin their careers. The focus is on issues that concern today's typical American client, such as the trend towards an aging population, the growing population of families in second marriages, blended families and families in which the grandparents are raising their grandchildren, as well as those families that include non-married or same-sex couples. Current statistics concerning the aging population in the United States keep readers up to date on how current trends affect the estate planning industry. Neither too complicated for a two-year program, nor too simple for a full four-year program, this book does not presuppose a prior background in legal studies of any kind. The book is appropriate for the longtime continuing student, and it is ideal for the lifelong learner.

Living Trusts for Everyone May 28 2022 This guide explains the benefits of a living trust in simple, specific terms and shows how to set up a loved one's trust with no lawyers and no expense. Wills benefit lawyers. Trusts benefit the clients. Too often lawyers sell wills to clients only to sit back and wait to sell their probate services to their clients' heirs. Ronald Farrington Sharp describes the best way to handle modern estate planning and details the many advantages trusts have over wills in not only eliminating probate but in also protecting your assets for your heirs. Sharp explains why legal services are not needed to do the clerical work in settling a trust after death. This updated edition includes new information on an array of subjects, including: Elimination of the federal estate tax for most estates due to increased exemption amounts Online assets The use of passwords, usernames, and websites Keeping trustees honest and the process of removing trustees for malfeasance Forms for simplifying the planning process Strategies to lower attorneys' fees With no legal jargon, just step-by-step instructions and sample form letters, Living Trusts for Everyone takes the mystery out of the process of setting up a trust. "Sharp makes a reasoned and strong case for the use of trusts as a complete alternative for wills. For roughly the cost of a lunch, Living Trusts for Everyone can . . . equip the average American with enough thoughtful questions to ensure that his or her lawyer is doing all that s/he can to protect that person's assets. For that alone, it belongs on your reading list." —New York Journal of Books "If you want to know a good deal about estate planning and trusts but don't want a four-hundred-page boring book to read, I highly, highly recommend getting this one. It's short, to-the-point, and very informative." —FreeMoneyFinance.com "Ronald Sharp explains trusts in clear and easy-to-understand language, including one truth most lawyers don't want to admit: a trust is often better than a will and less costly!" —Lonnie McLane, Estate & Tax Consultants, LLC

Estate Planning from the Heart for EveryoneJan 30 2020 Learn how to plan your estate to make a most difficult time for you loved ones simple, quick, and fair. Coping with the death of a loved one is a multi-faceted problem. The emotional and psychological issues can linger unresolved far longer than the myriad and mundane tasks of gathering together assets and disposing of them. The primary reason we take the time to write a will or trust is not for our sake. It is to be sure that the legal process for our heirs is simple, quick, and fair, reflecting not just our wishes but also being mindful of the expectations and needs of those we leave behind. There may be decisions to be made for a surviving spouse such as whether to maintain the marital home, down-sizing, or using senior living facilities. Estate Planning from the Heart for Everyone is a step-by-step guide on how to make and execute these decisions. The next analysis is the actions that must be taken after death. Planning ahead for procedures for distribution of clothing,

household goods, family heirlooms, and such is a major problem. Decluttering is a good idea but it is difficult and most often falls on the family who may differing views on how to handle the "stuff" we all accumulate. Interpersonal dynamics are addressed by family members and others who may second guess the actions and decisions of those in charge of the estate. Throughout the book, author and lawyer Ronald Farrington Sharp uses an "Ask the Lawyer" format to describe some common and even unusual questions friends and clients have posed to him. He answers the practical as well as legal aspects of the questions asked with suggested solutions to the concerns raised.

Restructuring Large Housing Estates in Europe Oct 21 2021 All over Europe post-Second World War large-scale housing estates face physical, economic, social and cultural problems. This book presents the key findings of a major EU-funded research programme into the restructuring of twenty-nine large-scale housing estates in Northern, Western, Southern and Eastern Europe. Policy and practice between and within the ten countries studied - UK, the Netherlands, Sweden, Germany, Poland, Hungary, Slovenia, Italy, Spain, and France - is compared. While existing literature focuses on the negative aspects of large-scale housing estates, this book starts from the premise that the estates can be transformed into attractive places to live and focuses on the possibilities of sustainability and renewal through social, physical and policy actions. Specifically, the book explains the origins and nature of contemporary problems on the estates; examines which policy objectives, measures and processes have had the greatest impact; assesses and compares a wide range of local, regional and national initiatives; discusses current ideas and philosophies, such as 'place making' and 'collaborative planning' that are likely to influence future policy and practice and provides good practice guidance for neighbourhood sustainability and renewal. Written by a multi-national team of experts and drawing on original fieldwork, the book provides unique comparative insights into the present and future position of large-scale housing estates in Europe. Restructuring large-scale housing estates in Europe is an invaluable resource for a wide audience of academics, researchers, students and policy makers in the fields of housing, urban studies, community studies, regeneration, planning and social policy.

Housing Estates in the Baltic Countries Jun 16 2021 This open access book focuses on the formation and later socio-spatial trajectories of large housing estates in the Baltic countries—Estonia, Latvia, and Lithuania. It also explores claims that a distinctly "westward-looking orientation" in their design produced housing estates that were superior in design to those produced elsewhere in the Soviet Union (between 1944 and 1991, Estonia was a member republic of the USSR). The first two parts of the book provide contextual material to help readers understand the vision behind housing estates in Estonia, Latvia, and Lithuania. These sections present the background of housing estates in the Baltic Republics as well as challenges and debates concerning their formation, evolution, and present condition and importance. Subsequent parts of the book consist of: demographic analyses of the socioeconomic characteristics and ethnicity of housing estate residents (past and present) in the three Baltic capital cities, case studies of people and places related to housing estates in the Baltic countries, and chapters exploring relevant special topics and themes. This book will be of interest to students, scholars, and advocates interested in understanding the past, present, and future importance of housing estates in the Baltic countries.

Money, Power, and Influence in Eighteenth-Century Lithuania Jul 26 2019 It has often been claimed that Jews have a penchant for capitalism and capitalist economic activity. With this book, Adam Teller challenges that assumption. Examining how Jews achieved their extraordinary success within the late feudal economy of the eighteenth-century Polish-Lithuanian Commonwealth, he shows that economic success did not necessarily come through any innate entrepreneurial skills, but through identifying and exploiting economic niches in the pre-modern economy—in particular, the monopoly on the sale of grain alcohol. Jewish economic activity was a key factor in the development of the Polish-Lithuanian Commonwealth, and it greatly enhanced the incomes, and thereby the social and political status, of the noble magnates, including the powerful Radziwiłł family. In turn, with the magnate's backing, Jews were able to leverage their own economic success into high status in estate society. Over time, relations within Jewish society began to change, putting less value on learning and pedigree and more on wealth and connections with the estate owners. This groundbreaking book exemplifies how the study of Jewish economic history can shed light on a crucial mechanism of Jewish social integration. In the Polish-Lithuanian setting, Jews were simultaneously a despised religious minority and key economic players, with a consequent standing that few could afford to ignore.

France and the Estates General of 1614 Mar 02 2020 In 1614 the French Estates General met for the last time before the Revolution of 1789. The meeting marks the beginning of the political career of Cardinal Richelieu and provides an opportunity for studying the regency of Marie de Medicis. In another sense 1614 marks the end of the Estates General in its early modern form of three separate estates preparing lists of grievances from the preliminary lists submitted to each deputy by his electors, while attending to the needs of the king. This book provides a full description of that last meeting in 1614, based on extensive research into political pamphlets, diplomatic correspondence, records of the royal councils, local and national cahiers and the proces-verbaux of the meetings. The author sets the period in the wider context of the history of France from 1598 to 1616, with particular attention to economic conditions and international relations.

A Practical Treatise on the Law of Estates for Life Aug 26 2019

Land, Power, and the Sacred Nov 29 2019 Landed estates (shōen) produced much of the material wealth supporting all levels of late classical and medieval Japanese society. During the tenth through sixteenth centuries, estates served as sites of de facto government, trade network nodes, developing agricultural technology, and centers of religious practice and ritual. Although mostly farmland, many yielded nonagricultural products, including lumber, salt, fish, and silk, and provided livelihoods for craftsmen, seafarers, peddlers, and performers, as well as for cultivators. By the twelfth century, an estate "system" permeated much of the Japanese archipelago. This volume examines the system from three perspectives: the land itself; the power derived from and exerted over the land; and the religion institutions and individuals that were involved in landholding practices. Chapters by Japanese and Western scholars explore how the estate system arose, developed, and eventually collapsed. Several investigate a single estate or focus on agricultural techniques, while others survey estates in broad contexts such as economic change and maritime trade. Other chapters look at how we learn about estates by inspecting documents, landscape features, archaeological remains, and extant buildings and images; how representatives of every social stratum worked together to make the land productive and, conversely, how cooperative arrangements failed and rivals battled one another, making conflict as well as collaboration a hallmark of the system. On a more personal level, we follow the monk Chōgen's restoration of the Estate and his installation of a famous Amida triad in a temple he built on the premises; the strategies of royal ladies Jōsai and Hachijō, and Kōkamon as they strove to keep their landholdings viable; and the murder of estate official Gorōzaemon, whose own neighbors killed him as a result of a much larger dispute between two powerful warrior families. Land, Power, and the Sacred represents a significant expansion and revision of our knowledge of medieval Japanese estates. A range of readers will welcome the primary source research and comparative perspectives it offers: those who do not specialize in Japanese medieval history but recognize the value of teaching the history of estates will find a chapter devoted to the topic invaluable. Housing Estates in Europe Dec 11 2020 This open access book explores the formation and socio-spatial trajectories of large housing estates in Europe. Are these estates clustered or scattered? Which social groups originally had access to residential space in housing estates? What is the size, scale and geography of housing estates, their architectural and built environment composition, services and neighbourhood amenities, and metropolitan connectivity? How do housing estates contribute to the urban mosaic of neighborhoods by ethnic and socio-economic status? What types of policies and planning initiatives have been implemented in order to prevent the social downgrading of housing estates? The collection of chapters in this book addresses these questions from a new perspective previously unexplored in scholarly literature. The social aspects of housing estates are thoroughly investigated (including socio-demographic and economic characteristics of current and past inhabitants; ethnicity and segregation patterns; population dynamics; etc.), and the physical composition of housing estates is described in significant detail (including building materials; building form; architectural and landscape design; built environment characteristics; etc.). This book is timely because the recent global economic crisis and Europe's immigration crisis demand a thorough investigation of the role large housing estates play in poverty and ethnic concentration. Through case studies of housing estates in 14 European centers, the book also identifies policy measures that have been used to address challenges in housing estates throughout Europe.

Family Properties Aug 07 2020 Part family story and part urban history, a landmark investigation of segregation and urban decay in Chicago -- and cities across the nation The "promised land" for thousands of Southern blacks, postwar Chicago quickly became the most segregated city in the North, the site of the nation's worst ghettos and the target of Martin Luther King Jr.'s first campaign beyond the South. In this powerful book, Beryl Satter identifies the true causes of the city's black slums and the ruin of urban

neighborhoods throughout the country; not, as some have argued, black pathology, the culture of poverty, or white flight, but a widespread and institutionalized system of legal and financial exploitation. In Satter's riveting account of a city in crisis, unscrupulous lawyers, slumlords, and speculators are pitched against religious reformers, community organizers, and an impassioned attorney who launched a crusade against the profiteers—the author's father, Mark J. Satter. At the heart of the struggle stand the black migrants who, having left the South with its legacy of sharecropping, suddenly find themselves caught in a new kind of debt peonage. Satter shows the interlocking forces at work in their oppression: the discriminatory practices of the banking industry; the federal policies that created the country's shameful "dual housing market"; the economic anxieties that fueled white violence; and the tempting profits to be made by preying on the city's most vulnerable population. *Family Properties: Race, Real Estate, and the Exploitation of Black Urban America* is a monumental work of history, this tale of racism and real estate, politics and finance, will forever change our understanding of the forces that transformed urban America. "Gripping . . . This painstaking portrayal of the human costs of financial racism is the most important book yet written on the black freedom struggle in the urban North."—David Garrow, *The Washington Post*
