Black Man in a White Coat Oct 08 2020 "When Damon Tweedy first enters the halls of Duke University Medical School on a full scholarship, he envisions a bright future where his segregated, working class background will become largely irrelevant. Instead, he finds that he has joined a new world where race is front and center. When one of his first professors mistakes him for a maintenance worker, it is a moment that crystallizes the challenges he will face throughout his early career. Making matters worse, in lecture after lecture the common refrain for numerous diseases resounds, "More common in blacks than whites." In riveting, honest prose, Black Man in a White Coat examines the complex ways in which both black doctors and patients must navigate the difficult and often contradictory terrain of race and medicine. As Tweedy transforms from student to practicing physician, he discovers how often race influences his encounters with patients. Through their stories, he illustrates the complex social, cultural, and economic factors at the root of most health problems in the black community. These elements take on greater meaning when Tweedy finds himself diagnosed with a chronic disease far more common among black people. In this powerful, moving, and compassionate book, Tweedy deftly explores the challenges confronting black doctors, and the disproportionate health burdens faced by black patients, ultimately seeking a way forward to better treatment and more compassionate care.- For readers of Atul Gawande, Sandeep Jauhar, Pauline W. Chen, and Henrietta Lacks"--

Moon Witch, Spider King Sep 06 2020 "Masterfully flips the first installment on its head... James makes the mythic tantalizingly real." —Esquire "Even more brilliant than the first." —Buzzfeed An Instant New York Times Bestseller From Marlon James, author of the bestselling National Book Award finalist Black Leopard, Red Wolf, the second book in the Dark Star trilogy. In Black Leopard, Red Wolf, Sogolon the Moon Witch proved a worthy adversary to Tracker as they clashed across a mythical African landscape in search of a mysterious boy who disappeared. In Moon Witch, Spider King, Sogolon takes center stage and gives her own account of what happened to the boy, and how she plotted and fought, triumphed and failed as she looked for him. It's also the story of a century-long feud—seen through the eyes of a 177-year-old witch—that Sogolon had with the Aesi, chancellor to the king. It is said that Aesi works so closely with the king that together they are like the eight limbs of one spider. Aesi's power is considerable—and deadly. It takes brains and courage to challenge him, which Sogolon does for reasons of her own. Both a brilliant narrative device—seeing the story told in Black Leopard, Red Wolf from the perspective of an adversary and a woman—as well as a fascinating battle between different versions of empire, Moon Witch, Spider King delves into Sogolon's world as she fights to tell her own story. Part adventure tale, part chronicle of an indomitable woman who bows to no man, it is a fascinating novel that explores power, personality, and the places where they overlap.

Rich Dad, Poor Dad Jun 15 2021 Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times—for all the right reasons—but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."

Both/And. Nov 20 2021 In this beautifully written and propulsive memoir, Huma Abedin—Hillary Clinton's famously private top aide and longtime adviser—emerges from the wings of American political history to take command of her own story. The daughter of Indian and Pakistani intellectuals and advocates who split their time between Saudi Arabia, the UK, and the United States, Abedin grew up in many worlds.

Both/And grapples with family, legacy, identity, faith, marriage, and motherhood with wisdom and sophistication. Abedin launched full steam into a college internship in the office of the first lady in 1996, never imagining that her work at the White House would blossom into a career in public service, nor that the career would become an all-consuming way of life. Still in her twenties and thirties, she thrived in rooms with diplomats and sovereigns, entrepreneurs and artists, philanthropists and activists, and witnessed many crucial moments in 21st-century American history—Camp David for urgent efforts at Middle East peace in the waning months of the Clinton administration, Ground Zero in the days after the 9/11 attacks, the inauguration of the first African American president of the United States, the convention floor when America nominated its first female presidential candidate. Abedin's relationship with Clinton has seen both women through extraordinary personal and professional highs, as well as unimaginable lows. Here, for the first time, is a deeply personal account of Hillary Clinton as mentor, confidante, and role model. Abedin cuts through caricature, rumor, and misinformation to reveal a crystal-clear portrait of Clinton as a brilliant and caring leader a steadfast friend, generous, funny, hardworking, and dedicated. Both/And is a candid and heartbreaking chronicle of Abedin's marriage to Anthony Weiner, what drew her to him, how much she wanted to believe in him, the devastation wrought by his betrayals—and their shared love for their son. It is also a timeless story of a young woman with aspirations and ideals coming into her own in high-pressure jobs, and a testament to the potential for women in leadership to blaze a path forward while supporting those who follow in their footsteps. Both/And describes Abedin's journey through the opportunities and obstacles, the trials and triumphs, of a full and complex life. Abedin's compassion and courage, her resilience and grace, her work ethic and mission are an inspiration to people of all ages. "This journey has led me through exhilarating milestones and devastating setbacks," said Abedin. "I have walked both with great pride

and in overwhelming shame. It is a life I am—more than anything—enormously grateful for and a story I look forward to sharing.”

I have a magical form of synesthesia that senses danger and uncovers lies—making me a stealthy operative. I'm trudging through another day when one of Section's cleaners—assassins—takes an interest in me. I don't need my synesthesia to realize that he is extremely dangerous and that he will do anything to achieve his goals—even if it means putting me in the line of fire. . . . AND AN ASSASSIN I'm Desmond Percy, one of Section 47's most lethal cleaners. I'm also a man on a mission, and I need Charlotte Locke's skills to help me keep a promise, settle a score, and kill some extremely bad people. **The Rhythm Section** Mar 13 2021 "Have you ever killed anyone? Not in self-defense." "What are you asking that for? "Because I'm curious." "You can't know what it feels like by being told." "I don't want to know what it feels like. I want to know how you actually make the leap from planning to do it to actually pulling the trigger." Stephanie Patrick's life is destroyed by the crash of flight NEO027. Her family was on board and there were no survivors. Devastated, she drops out of college and her life spins out of control as she enters a world of drugs and prostitution—until a journalist discovers that the crash wasn't an accident. A bomb was planted on the plane that killed her family. Filled with rage, and with nothing left to lose, she focuses on one goal: revenge. The opportunity to obtain it arrives quickly when Stephanie is approached and recruited by an extremely covert intelligence organization. She is young, smart, and beautiful—and has no family, making her the perfect candidate. The organization offers her a deal. She must undergo rigorous training; learn how to control her heart rate and breathing ("the rhythm section"), how to operate various weapons skillfully and efficiently, and she must improve her physical requirements, she will be given a new identity and asked to commit acts of terrorism on behalf of the organization. When she completes these assignments successfully—and proves her loyalty—she will be offered the opportunity to take out the terrorists who brought down flight NEO027. Stephanie agrees to all of the organization's demands without hesitation. As "Petra," a mercenary terrorist based out of Germany, and as "Marina," an international businesswoman based in London, she enters the brutal world of international espionage, and adapts quickly. She is able to numb her feelings and act on instinct alone. But as the stakes get higher, Stephanie begins to question what her value really is. Is the organization telling her the truth--do they know who caused flight NEO027 to explode? Or are they using her for some other agenda? More important: Is avenging her family worth the price she is paying? And if it isn't--will the organization that created her let her go? Violent, edgy, and unpredictable, The Rhythm Section takes readers deep into the world of international espionage , it is a nonstop thriller from the first page to the last.

**Finding What Works in Health Care** Nov 08 2020 Healthcare decision makers in search of reliable information that compares health interventions increasingly turn to systematic reviews for the best summary of the evidence. Systematic reviews identify, select, assess, and synthesize the findings of similar but separate studies, and can help clarify what is known and not known about the potential benefits and harms of drugs, devices, and other healthcare services. Systematic reviews can be helpful for clinicians who want to integrate research findings into their daily practices, for patients to make well-informed choices about their own care, for professional medical societies and other organizations that develop clinical practice guidelines. Too often systematic reviews are of uncertain or poor quality. There are no universally accepted standards for developing systematic reviews leading to variability in how conflicts of interest and biases are handled, how evidence is appraised, and the overall scientific rigor of the process. In Finding What Works in Health Care the Institute of Medicine (IOM) recommends 21 standards for developing high-quality systematic reviews of comparative effectiveness research. The standards address the entire systematic review process from the initial steps of formulating the topic and building the review team to producing a detailed final report that synthesizes what the evidence shows and where knowledge gaps remain. Finding What Works in Health Care also proposes a framework for improving the quality of the science underpinning systematic reviews. This book will serve as a vital resource for both sponsors and producers of systematic reviews of comparative effectiveness research.

Psychology and the Conduct of Everyday Life Feb 09 2021 Psychology and the Conduct of Everyday Life moves psychological theory and research practice out of the laboratory and into the everyday world. Drawing on recent developments across the social and human sciences, it examines how people live as active subjects within the contexts of their everyday lives, using this as an analytical basis for understanding the dilemmas and contradictions people face in contemporary society. Early chapters gather the latest empirical research to explore the significance of context as a cross-disciplinary critical tool; they include a study of homeless M?ori men reaffirming their cultural identity via gardening, and a look at how the dilemmas faced by children in difficult situations can provide insights into social conflict at school. Later chapters examine the interplay between everyday life around the world and contemporary global phenomena such as the rise of the debt economy, the hegemony of the labor market, and the increased reliance on digital technology in educational settings. The book concludes with a consideration of how social psychology can deepen our understanding of how we conduct our lives, and offer possibilities for collective work on the resolution of social conflict.

Cochrane Handbook for Systematic Reviews of Interventions Jun 27 2022 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library ([www.thecochranelibrary.com](http://www.thecochranelibrary.com)). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

**We Don't Know Ourselves: A Personal History of Modern Ireland** Feb 21 2022 "[L]ike reading a great tragicomic Irish novel." —James Wood, *The New Yorker* "Masterful . . . astonishing." —Cullen Murphy, *The Atlantic* "A landmark history . . . Leavened by the brilliance of O'Toole's insights and wit." —Claire Messud, *Harper's Winner • 2021 An Post Irish Book Award — Nonfiction Book of the Year •* from the judges: "The most remarkable Irish nonfiction book I've read in the last 10 years"; "[A] book for the ages." A celebrated Irish writer's magisterial, brilliantly insightful chronicle of the wrenching transformations that dragged his homeland into the modern world. Fintan O'Toole was born in the year the revolution began. It was 1958, and the Irish government—in despair, because all the young people were leaving—opened the country to foreign investment and popular culture. So began a decades-long, ongoing experiment with Irish national identity. In *We Don't Know Ourselves*, O'Toole, one of the Anglophone world's most consummate stylists, weaves his own experiences into Irish social, cultural, and economic change, showing how Ireland, in just one lifetime, has gone from a reactionary "backwater" to an almost totally open society—perhaps the most astonishing national transformation in modern history. Born to a working-class family in the Dublin suburbs, O'Toole served as an altar boy and attended a Christian Brothers school, much as his forebears did. He was enthralled by American Westerns suddenly appearing on Irish television, which were not that far from his own experience, given that Ireland's main export was beef and it was still not unknown for herds of cattle to clatter down Dublin's streets. Yet the Westerns were a sign of what was to come. O'Toole narrates the once unthinkable collapse of the all-powerful Catholic Church, brought down by scandal and by the activism of ordinary Irish, women in particular. He relates the horrific violence of the Troubles in Northern Ireland, which led most Irish to reject violent nationalism. In O'Toole's telling, America became a lodestar, from John F. Kennedy's 1963 visit, when the soon-to-be martyred American president was welcomed as a native son, to the emergence of the Irish technology sector in the late 1990s, driven by American corporations, which set Ireland on the path toward particular disaster during the 2008 financial crisis. A remarkably compassionate yet exacting observer, O'Toole in coruscating prose captures the peculiar Irish habit of "deliberate unknowing," which allowed myths of national greatness to persist even as the foundations were crumbling. Forty years in the making, *We Don't Know Ourselves* is a landmark work, a memoir and a national history that ultimately reveals how the two modes are entwined for all of us.

**Down to Earth** Apr 01 2020 The present ecological mutation has organized the whole political landscape for the last thirty years. This could explain the deadly cocktail of exploding inequalities, massive deregulation, and conversion of the dream of globalization into a nightmare for most people. What holds these three phenomena together is the conviction, shared by some powerful people, that the ecological threat is real and that the only way for them to survive is to abandon any pretense at sharing a common future with the rest of the world. Hence their flight offshore and their massive investment in climate change denial. The Left has been slow to turn its attention to this new situation. It is still organized along an axis that goes from investment in local values to the hope of globalization and just at the time when, everywhere, people dissatisfied with the ideal of modernity are turning back to the protection of national or even ethnic borders. This is why it is urgent to shift sideways and to define politics as what leads toward the Earth and not toward the global or the national. Belonging to a territory is the phenomenon most in need of rethinking and careful redescription; learning new ways to inhabit the Earth is our biggest challenge. Bringing us down to earth is the task of politics today.

**Infinite Country** Dec 10 2020 A REESE'S BOOK CLUB PICK and INSTANT NEW YORK TIMES BESTSELLER WINNER OF THE 2021 NEW AMERICAN VOICES AWARD, LONGLISTED FOR THE 2022 ANDREW CARNEGIE MEDAL, A 2022 DAYTON LITERARY PEACE PRIZE FINALIST, AND A NATIONAL ENDOWMENT OF THE ARTS "BIG READS" SELECTION "A profound, beautiful novel." —People \* "Poignant." —BuzzFeed \* "A breathtaking story of the unimaginable prices paid for a better life." —Esquire This "heartbreaking portrait of a family dealing with the realities of migration and separation" (Time) is "a sweeping love story and tragic drama [and] an authentic vision of what the American Dream looks like in a nationalistic country" (Elle). I often wonder if we are living the wrong life in the wrong country. Talia is being held at a correctional facility for adolescent girls in the forested mountains of Colombia after committing an impulsive act of violence that may or may not have been warranted. She urgently needs to get out and get back home to Bogotá, where her father and a plane ticket to the United States are waiting for her. If she misses her flight, she might also miss her chance to finally be reunited with her family. How this family came to occupy two different countries, two different worlds, comes into focus like twists of a kaleidoscope. We see Talia's parents, Mauro and Elena, fall in love in a market stall as teenagers against a backdrop of civil war and social unrest. We see them leave Bogotá with their firstborn, Karina, in pursuit of safety and opportunity in the United States on a temporary visa, and we see the births of two more children, Nando and Talia, on American soil. We witness the decisions and indecisions that lead to Mauro's deportation and the family's splintering—the costs they've all been living with ever since. Award-winning, internationally acclaimed author Patricia Engel, herself a dual citizen and the daughter of Colombian immigrants, gives voice to all five family members as they navigate the particulars of their respective circumstances. Rich with Bogotá urban life, steeped in Andean myth, and tense with the daily reality of the undocumented in America, *Infinite Country* "is as much an all-American story as it is a global one" (Booklist, starred review).

**Positive Psychology** Sep 18 2021 This book provides an accessible and balanced introduction to positive psychology scholarship and its applications, incorporating an overview of the development of positive psychology. *Positive Psychology: The Basics* delineates positive psychology's journey as a discipline, takes stock of its achievements and provides an updated overview of its core topics, exploring the theory, research and interventions in each. Launched as a rebellious discipline just over two decades ago, positive psychology challenged the emphasis of applied psychology on disease and dysfunction and offered a new, more balanced perspective on human life. From its foundations in the late 20th century to recent "second-wave" theories around the importance of recognizing negative emotions, this compact overview covers the key ideas and principles, from research around emotional wellbeing, optimism and change, to posttraumatic growth and positive relationships. The first jargon-free introduction to the subject, Hart introduces the reader to a range of issues, including self-regulation and flow, character strengths and virtues and positive relationships, concluding with a chapter on how interventions can affect happiness and wellbeing. *Positive Psychology: The Basics* is an essential resource for students, practitioners, academics and anyone who is interested in understanding the essence of a life well lived.

**Seven Games: A Human History** Oct 20 2021 A group biography of seven enduring and beloved games, and the story of why—and how—we play them. Checkers, backgammon, chess, and Go. Poker, Scrabble, and bridge. These seven games, ancient and modern, fascinate millions of people worldwide. In *Seven Games*, Oliver Roeder charts their origins and historical importance, the delightful arcana of their rules, and the ways their design makes them pleasurable. Roeder introduces thrilling competitors, such as evangelical minister Marion Tinsley, who across forty years lost only three games of checkers; Shusai, the Master, the last Go champion of imperial Japan, defending tradition against "modern

rationalism"; and an IBM engineer who created a backgammon program so capable at self-learning that NASA used it on the space shuttle. He delves into the history and lore of each game: backgammon boards in ancient Egypt, the Indian origins of chess, how certain shells from a particular beach in Japan make the finest white Go stones. Beyond the cultural and personal stories, Roeder explores why games, seemingly trivial pastimes, speak so deeply to the human soul. He introduces an early philosopher of games, the aptly named Bernard Suits, and visits an Oxford cosmologist who has perfected a computer that can effectively play bridge, a game as complicated as human language itself. Throughout, Roeder tells the compelling story of how humans, pursuing scientific glory and competitive advantage, have invented AI programs better than any human player, and what that means for the games—and for us. Funny, fascinating, and profound, *Seven Games* is a story of obsession, psychology, history, and how play makes us human.
