Empowering Teachers to Build a Better World Jun 19 2021 This open access book presents a comparative study on how large-scale professional development programs for teachers are designed and implemented. Around the world, governments and educators are recognizing the need to educate students in a broad range of higher order cognitive skills and socio-emotional competencies, and providing effective opportunities for teachers to develop the expertise needed to teach these skills is a crucial aspect of effective implementation of curricula which include those goals. This study examines how large-scale efforts to empower teachers for deeper instruction have been designed, how they have been implemented, and their outcomes. To do so, it investigates six programs from England, Colombia, Mexico, India, and the United States. Though all six are intended to broaden and deepen students' curricular aspirations, each takes this expansion of curricular goals in a different direction. The ambitious education reforms studied here explicitly focus on building teachers' capacity to teach on a broader set of goals. Through a discerning analysis of program documents, evaluations, and interviews with senior leaders and participants in the programs, the book identifies the various theories of action used in these programs, examines how they were implemented, and discusses what they achieved. As such, it offers an indispensable resource for education leaders interested in designing and implementing professional development programs for teachers that are aligned with ambitious instructional goals.

The Square and the Tower Jan 03 2020 The instant New York Times bestseller. A brilliant recasting of the turning points in world history, including the one we're living through, as a collision between old power hierarchies and new social networks. "Captivating and compelling." --The New York Times "Niall Ferguson has again written a brilliant book...In 400 pages you will have restocked your mind. Do it." --The Wall Street Journal "The Square and the Tower, in addition to being provocative history, may prove to be a bellwether work of the Internet Age." --Christian Science Monitor Most history is hierarchical: it's about emperors, presidents, prime ministers and field marshals. It's about states, armies and corporations. It's about orders from on high. Even history "from below" is often about trade unions and workers' parties. But what if that's simply because hierarchical institutions create the archives that historians rely on? What if we are missing the informal, less well documented social networks that are the true sources of power and drivers of change? The 21st century has been hailed as the Age of Networks. However, in *The Square and the Tower*, Niall Ferguson argues that networks have always been with us, from the structure of the brain to the food chain, from the family tree to freemasonry. Throughout history, hierarchies housed in high towers have claimed to rule, but often real power has resided in the networks in the town square below. For it is networks that tend to innovate. And it is through networks that revolutionary ideas can contagiously spread. Just because conspiracy theorists like to fantasize about such networks doesn't mean they are not real. From the cults of ancient Rome to the dynasties of the Renaissance, from the founding fathers to Facebook, *The Square and the Tower* tells the story of the rise, fall and rise of networks, and shows how network theory--concepts such as clustering, degrees of separation, weak ties, contagions and phase transitions--can transform our understanding of both the past and the present. Just as *The Ascent of Money* put Wall Street into historical perspective, so *The Square and the Tower* does the same for Silicon Valley. And it offers a bold prediction about which hierarchies will withstand this latest wave of network disruption--and which will be toppled.

Murder on Union Square Jul 29 2019 When a murder hits close to home, Frank finds himself in an unusual position--the prime suspect in the latest installment of the national bestselling Gaslight Mystery series... Sarah and Frank Malloy are enjoying married life and looking to make their family official by adopting Catherine, the child whom Sarah rescued and has been raising as her daughter. The process seems fairly straightforward, but at the last minute, the newlyweds discover that Parnell Vaughn, Catherine's legal father, has a claim on the child, and his grasping fiancée is demanding a financial settlement to relinquish parental rights. Even though exchanging money for a child is illegal, Frank and Sarah's love for Catherine drives them to comply. When Frank returns with the money and finds Vaughn beaten to death, all evidence points to Frank as the culprit. A not-quite-famous actor with modest means, Vaughn seems an unlikely candidate for murder, particularly such a violent crime of passion. But Frank soon uncovers real-life intrigue as dramatic as any that appears on stage. Sarah and Frank enlist those closest to them to help hunt for Vaughn's killer as Frank's own life--and the future of their family--hang in the balance.

International Building Code 2018 Oct 24 2021 This code applies to all buildings except detached one- and two-family dwellings and townhouses up to three stories. The 2018 IBC contains many important changes such as: Accessory storage spaces of any size are now permitted to be classified as part of the occupancy to which they are accessory. New code sections have been introduced addressing medical gas systems and higher education laboratories. Use of fire walls to create separate buildings is now limited to only the determination of permissible types of construction based on allowable building area and height. Where an elevator hoistway door opens into a fire-resistance-rated corridor, the opening must be protected in a manner to address smoke intrusion into the hoistway. The occupant load factor for business uses has been revised to one occupant per 150 square feet. Live loads on decks and balconies increase the deck live load to one and one-half times the live load of the area served. The minimum lateral load that fire walls are required to resist is five pounds per square foot. Wind speed maps updated, including maps for the state of Hawaii. Terminology describing wind speeds has changed again with ultimate design wind speeds now called basic design wind speeds. Site soil coefficients now correspond to the newest generation of ground motion attenuation equations (seismic values). Five-foot tall wood trusses requiring permanent bracing must have a periodic special inspection to verify that the required bracing has been installed. New alternative fastener schedule for construction of mechanically laminated decking is added giving equivalent power-driven fasteners for the 20-penny nail. Solid sawn lumber header and girder spans for the exterior bearing walls reduce span lengths to allow #2 Southern Pine design values.

Only the Rich Can Play Mar 29 2022 In a *Winners Take All* meets *This Town* narrative, a New York Times bestselling author tells the story of the creation of a massive tax break, in which political and economic elites attend to the care and feeding of the super-rich, and inequality compounds. David Wessel's incredible tale of how Washington works--and why the rich keep getting richer--starts when a Silicon Valley entrepreneur develops an idea intended as a way to help poor people that will save rich people money on their taxes. He organizes and pays for an effective lobbying effort that pushes his idea into law with little scrutiny or fine-tuning by congressional or Treasury tax experts--and few safeguards against abuse. With an unbeatable pair of high-profile sponsors, bumper-sticker simplicity and deft political marketing, the Opportunity Zone became an unnoticed part of the 2017 Trump tax bill. The gold rush followed immediately thereafter. David Wessel follows the money to see who profited from this plan that was supposed to spur development of blighted areas and help people out of poverty: the Las Vegas strip, the Portland (Oregon) Ritz-Carlton, the Mall of America, and self-storage facilities--lucrative areas where the one percent can park money profitably and avoid capital gains taxes. And the best part: unlike other provisions for eliminating capital gains taxes (inheritance, for example) you don't have to die to take advantage of this one. Wessel provides vivid portraits of the proselytizers, political influencers, motivational speakers, consultants, real estate dealmakers, and individual money-seekers looking to take advantage of this twenty-first century bonanza. He looks at places for which Opportunity Zones were supposedly designed (Baltimore, for example) and how little money they've drawn. And he finds a couple of places (Erie, PA) where zones are actually doing what they were supposed to, a lesson on how a better designed program might have helped more left-behind places. But what Wessel reveals is the gritty reality: The dark underbelly of a system tilted in favor of the few, with the many left out in the cold.

Designing the Global City Dec 14 2020 This text explores how architectural and urban design values have been co-opted by global cities to enhance their economic competitiveness by creating a superior built environment that is not just aesthetically memorable but more productive and sustainable. It focuses on the experience of central Sydney through its policy commitment to 'design excellence' and more particularly to mandatory competitive design processes for major private development. Framed within broader contexts that link it to comparable urban policy and design issues in the Asia-Pacific region and globally, it provides a scholarly but accessible volume that provides a balanced and critical overview of a policy that has changed the design culture, development expectations, public realm and skyline of central Sydney, raising issues surrounding the uneven distribution of benefits and costs, professional practice, representative democracy, and implications of globalization.

Madison Square Murders Jan 15 2021 Everett Larkin works for the Cold Case Squad: an elite--if understaffed and overworked--group of detectives who solve the forgotten deaths of New York City. Larkin is different from others, but his deduction skills are unmatched and his memory for minute details is unparalleled. So when a spring thunderstorm uproots a tree in Madison Square Park, unearthing a crate with human remains inside, the best Cold Case detective is assigned the job. And when a death mask, like those prominent during the Victorian era, is found with the body, Larkin requests assistance from the Forensic Artists Unit and receives it in the form of Detective Ira Doyle, his polar opposite in every way. Factual reasoning and facial reconstruction puts Larkin and Doyle on a trail of old homicide cases and a murderer obsessed with casting his victims' likeness in death. Include some unapologetic flirting from Doyle, and this case just may end up killing Everett Larkin.
