Neoliberalism and Public Education Finance Policy in Canada 2022 This book uses a multi-dimensional conceptual framework to demonstrate how neoliberal forces have been manifested through changes to K-12 public education finance policy in British Columbia, Canada between 2001 and 2015. The text offers in-depth critical policy analysis to illustrate how the public education system impacted by the emergence of a hybrid model of public-private funding. By examining the impacts of this neoliberalized model, in which school districts must compete for public funding across activities, the book highlights emerging financial inequalities; exacerbated inequities for students; increased entrepreneurialism; closer alignment of administrators' subjectivities with a market to educational leadership; and an illusion of local autonomy. Ultimately, the text makes powerful contributions by calling attention to detrimental processes of neoliberalization, marketization within public education, as well as the managerialization of educational leadership. This text will benefit researchers, academics, educators, and educational leaders with an interest in the policy and finance, school district leadership, international and comparative education, and the sociology of education.

International Trade in Financial Services: The NAFTA Provision 02 2020 This book examines the new and rapidly developing area of law relating to trade in financial services, with a particular focus on the rules contained in Chapter 14 of the North American Free Trade Agreement (NAFTA). After a detailed analysis of the relevant provisions and their effect on financial institutions in Canada and the United States, the author examines the impact of the NAFTA rules on the legal position of banks operating in countries outside NAFTA, particularly in the context of the WTO financial services agreement. The book concludes with a chapter on the effects of a potential NAFTA expansion. The book aims to contribute to the development of a new legal and regulatory framework distinct from financial services law, and offers a valuable insight into how trade in financial services within a regional trade agreement develops its own legal dynamic. Although the financial services provisions form the cornerstone of NAFTA, until now there has been very little in-depth analysis of these provisions, or of the effects on those not party to NAFTA, in the literature in general. This book's focus makes it of considerable interest to practitioners and researchers in international banking, trade and economic law.

Show Me the Money 21 2021 This paper examines access to business finance by Canadian small and medium-sized enterprises (SMEs) and to housing finance by Canadian households (particularly prime borrowers) against the background of a fairly concentrated and protected banking industry. It finds access broadly adequate for the former group. However, given the dominance of banks and their fairly low risk tolerance, financing of riskier projects is a challenge. Problems with venture capital, plausibly related to the prevalence of tax-advantaged labor-sponsored funds, exacerbate the problem for the most innovative SMEs. The paper also finds the market for housing finance to be highly advanced and sophisticated. However, non-prime mortgage financing is in its infancy in Canada. The development of that sector (while avoiding the excesses that beset the U.S. market in the last few years) would be beneficial. More broadly, despite recent innovations, options available to finance housing purchases are still somewhat limited, with scarce availability of mortgage maturities beyond five years particularly surprising. Further advances in securitization could help improve these areas.

**Crisis and Reform** Jan 24 2022 The financial crisis that erupted in 2008 severely affected the global economy, plunging most countries into a recession with aftershocks still being felt today. To weather the crisis well in comparison to many euro-zone countries and the United States, but it did not escape unscathed. Two major themes are explored in this volume: Canada's role in the global financial system and the Canadian policy response to the global financial crisis. These themes are examined in light of the shift from the classical gold standard to Bretton Woods to the post-war financial system and the Canadian policy response to the global financial crisis. These themes are examined in light of the shift from the classical gold standard to Bretton Woods to the post-war financial-trade crossover agenda, the changing role of central banks, the European Monetary Union, developing countries and a post-financial crisis global political economy. What becomes clear in this volume is that Canada plays a powerful role, which belies its size, in the development of the financial system and its regulation at an international level. **Crisis and Reform: Canada and the Global Financial System** — the 28th volume of the influential *Canada Among Nations* series — examines the global financial crisis through Canada's historical and current role in the international financial system. Canada has been held up as a shining example of good governance during the financial crisis, and its prominent role within international financial institutions should grow as Canada continues to be a major player in the global financial system.

With a specific focus on the public policy process, Geneviève Tellier walks readers through the five steps involved in the budget process including setting, formulation, adoption, implementation, and evaluation. Taking a close look at how much influence key decision-makers actually have over the budget process, Tellier highlights recent trends in the political, social, and economic constraints that impact budgetary decisions. Tellier uses key words and textboxes at the end of each chapter to reflect on current issues and new developments in public finance, such as gender-sensitive budgets, performance-based budgeting, and fiscal transparency.

**Worry-Free Money** Sep 07 2020 NATIONAL BESTSELLER "A fresh way to think about your money." David Chilton, author of *The Wealthy Barber* Stop budgeting. Start living. Managing your money is frustrating and confusing. Life is expensive. Whether you make \$30,000 or \$130,000 a year, it can feel like you're constantly broke. Can you afford that new car, that vacation, that night out? It feels impossible to know. And rigid budgets that force you to spend your money in unrealistic ways (like \$9.50 per week for pants) don't make things any clearer. But what if there was a better way to manage your money? One that left you certain you had your bases covered—both for your monthly bills and your future retirement—and then let you enjoy your money by spending it. (Yes, really.) Enter Shannon Simmons, a fresh voice in the world of personal finance, one who understands the new and very real pressures to survive modern life and keep up in the age of social media. Shannon does not patronize. The founder of the wildly popular New School of Finance, Shannon recognized that most of her thousands of financial planning clients felt broke, no matter what their income. And she was as bad as actually being broke, because it leads to overspending and misery. So she came up with a new plan: *Worry-Free Money*. *Worry-Free Money* takes a fresh approach to finances by focusing on the cause of the pressure to spend and showing why traditional budgets don't work. It is a deeply practical book that will help you break the cycle of guilt, understand why you overspend, and learn from your life, learn to recognize your f\*ck it moments and find hope—and fun—in getting your money under control.

**Personal Finance 101 Canada's Housing Market Analysis Buying Vs Renting** Oct 12 2020 Real estate market growth in Canada experienced unprecedented growth in the last five years, driving housing prices to an unaffordable level for an average household and giving an impression of a housing bubble, similar to the one seen in the United States in 2007. Yet a large number of Canadians are dreaming of becoming homeowners at any cost (even if they are not able to afford it) without clear understanding of risks and costs associated with a home purchase. But under current conditions, homeownership is a luxury rather than a profitable investment. The book provides a real-life illustration of two options available for a family debating between buying and leasing a townhouse. Readers are able to easily extend this analysis to other types of residential properties). One of the findings from this mathematical exercise is that an unchanged house price by the end of the year results in a \$90,000 loss by the homeowner. This implies that the only rational explanation for a desire to buy the townhouse is expectations of capital appreciation that will be sufficient to cover the additional costs of homeownership. The analytical section of the book provides an insight into an upcoming price moderation stage for the Canadian housing market. Analysis includes a discussion of supply and demand that drove the Canadian housing prices to the level where they are today and an outlook on what is likely to happen with these forces in years to come. The user-friendly format is available for download by readers free of charge and can be used for evaluation of their own personal options.

**Maturing in Hard Times** Jul 18 2021 Focusing on the causes and extent of the Depression of the 1930s and its impact on a wide range of governmental policies, Bryce describes the department's involvement in the formation and conduct of economic policies. The department was involved in events ranging from the collapse of the gold standard in 1931, to the possible default of the western provinces, to the introduction of federal unemployment and housing policies, to the founding of the Bank of Canada. Bryce presents a fascinating portrait of the early Department of Finance, the informality of the policy process in what was obviously a smaller, simpler Ottawa. From the vantage point of his years of experience within the department, he offers insightful analyses of the issues of this century.
