Budget of the United States Government Sep 29 2019
The Story of French Jun 26 2019 Why does everything sound better if it's said in French? That fascination is at the heart of *The Story of French*, the first history of one of the most beautiful languages in the world that was, at one time, the pre-eminent language of literature, science and diplomacy. In a captivating narrative that spans the ages,

from Charlemagne to Cirque du Soleil, Jean-Benoît Nadeau and Julie Barlow unravel the mysteries of a language that has maintained its global influence despite the rise of English. As in any good story, *The Story of French* has spectacular failures, unexpected successes and bears traces of some of history's greatest figures: the tenacity of William the Conqueror, the staunchness of Cardinal Richelieu, and the

endurance of the Lewis and Clark expedition. Through this colorful history, Nadeau and Barlow illustrate how French acquired its own peculiar culture, revealing how the culture of the language spread among francophones the world over and yet remains curiously centered in Paris. In fact, French is not only thriving—it still has a surprisingly strong influence on other languages. As lively as it is fascinating, *The Story of French* challenges long held assumptions about French and shows why it is still the world's other global language.

Inquiry-Guided Learning

Aug 28 2019 Is inquiry-guided learning a universal answer for various teaching and learning ills in higher education? With eight institutional case studies drawn from colleges and universities in English-speaking countries, this volume provides a clear description of inquiry-guided learning based on best practice. It also provides a window into the dynamics of undergraduate education reform using inquiry-

guided learning, with a helpful final chapter that compares the eight institutions on key dimensions. This issue is a valuable resource for:

Institutions attempting undergraduate reform through inquiry-guided learning
Practitioners and scholars of inquiry-guided learning
Instructors seeking good texts for courses on higher education administration
Administrators seeking to understand and lead undergraduate education reform. This is the 129th volume of this Jossey-Bass higher education series. *New Directions for Teaching and Learning* offers a comprehensive range of ideas and techniques for improving college teaching based on the experience of seasoned instructors and the latest findings of educational and psychological researchers.

America the Vulnerable Nov 23 2021 Now available in a new edition entitled GLASS HOUSES: Privacy, Secrecy, and Cyber Insecurity in a Transparent World. A former top-level National Security Agency insider goes behind the headlines to explore America's next great battleground: digital security. An urgent wake-up call that identifies our foes; unveils their methods; and charts the dire consequences for government, business, and individuals. Shortly after 9/11, Joel Brenner entered the inner

sanctum of American espionage, first as the inspector general of the National Security Agency, then as the head of counterintelligence for the director of national intelligence. He saw at close range the battleground on which our adversaries are now attacking us-cyberspace. We are at the mercy of a new generation of spies who operate remotely from China, the Middle East, Russia, even France, among many other places. These operatives have already shown their ability to penetrate our power plants, steal our latest submarine technology, rob our banks, and invade the Pentagon's secret communications systems. Incidents like the WikiLeaks posting of secret U.S. State Department cables hint at the urgency of this problem, but they hardly reveal its extent or its danger. Our government and corporations are a "glass house," all but transparent to our adversaries. Counterfeit computer chips have found their way into our fighter

aircraft; the Chinese stole a new radar system that the navy spent billions to develop; our own soldiers used intentionally corrupted thumb drives to download classified intel from laptops in Iraq. And much more. Dispatches from the corporate world are just as dire. In 2008, hackers lifted customer files from the Royal Bank of Scotland and used them to withdraw \$9 million in half an hour from ATMs in the United States, Britain, and Canada. If that was a traditional heist, it would be counted as one of the largest in history. Worldwide, corporations lose on average \$5 million worth of intellectual property apiece annually, and big companies lose many times that. The structure and culture of the Internet favor spies over governments and corporations, and hackers over privacy, and we've done little to alter that balance. Brenner draws on his extraordinary background to show how to right this imbalance and bring to cyberspace the freedom, accountability, and security we

expect elsewhere in our lives. In America the Vulnerable, Brenner offers a chilling and revelatory appraisal of the new faces of war and espionage-virtual battles with dangerous implications for government, business, and all of us.

The International Baccalaureate Diploma Programme

May 30 2022

The International Baccalaureate (IB) is a respected qualification gaining increasing currency around the world, and which has been adopted by a wide variety of schools, both public and private. In the UK, growing dissatisfaction with the A-level

system has led to an intense debate about alternative qualifications, and in many schools IB courses have been introduced alongside conventional A-level courses. This practical introduction to the IB takes a balanced look at the pros and cons and features a wealth of advice from those actually involved in teaching and implementing it in schools. Providing comparative material on how IB courses differ from A-levels and a subject-by-subject account of best practice in teaching the IB, this book offers a rich source of practical advice for teachers, school leaders or managers involved in teaching or implementing the IB programmes.
