Florence: Capital of the Kingdom of Italy, 1865-71 Jan 24 2022
This edited collection provides the first comprehensive history of Florence as the mid-19th century capital of the fledgling Italian nation. Covering various aspects of politics, economics, culture and society, this book examines the impact that the short-lived experience of becoming the political and administrative centre of the Kingdom of Italy had on the Tuscan city, both immediately and in the years that followed. It reflects upon the urbanising changes that affected the appearance of the city and the introduction of various economic and cultural innovations. The volume also analyses the crisis caused by the eventual relocation of the capital to Rome and the subsequent bankruptcy of the communality which hampered Florence on the long road to modernity. Florence: Capital of the Kingdom of Italy, 1865-71 is a

fascinating study for all students and scholars of modern Italian history.

Between the Real and the Ideal May 04 2020 This book examines the Accademia degli Arcadi in its heyday, a little known phenomenon in Italian history in the first part of the eighteenth century. The Roman academy aimed for a peninsula-wide cultural renewal induced by literary reform. Operating within a papal-court society, it eschewed extant patronage systems and social hierarchies and introduced enlightened ideas to its members. By about 1730, the Arcadi was on the wane, the reform largely unmet. It was an easy target for critics, both its proponents and opponents, in part because of the visible role it assigned to women. By attending to the institution's policies, this book provides a rich understanding of the Arcadi's goals. It locates the organization's interest in theater, including the physical environment of the theatrical drama, as central to its operations.

Race and Modern Architecture Nov 21 2021 Although race—a concept of human difference that establishes hierarchies of power

and domination—has played a critical role in the development of modern architectural discourse and practice since the Enlightenment, its influence on the discipline remains largely underexplored. This volume offers a welcome and long-awaited intervention for the field by shining a spotlight on constructions of race and their impact on architecture and theory in Europe and North America and across various global contexts since the eighteenth century. Challenging us to write race back into architectural history, contributors confront how racial thinking has intimately shaped some of the key concepts of modern architecture and culture over time, including freedom, revolution, character, national and indigenous style, progress, hybridity, climate, representation, and radicalism. By analyzing how architecture has intersected with histories of slavery, colonialism, and inequality—from eighteenth-century neoclassical governmental buildings to present-day housing projects for immigrants—Race and Modern Architecture challenges, complicates, and revises the standard association of modern architecture with a universal project of emancipation and progress.

MIRRORWORK PALACE in TEHERAN Sustainability and Competition / Palazzo Di Specchi in Teheran - Sostenibilità and Concorso Mar 02 2020 full colour printing, 106 pages of text & images

Mirrorwork Palace experiments with new methods SUSTAINABILITY as a PRE-REQUISITE both in technology and expression of the LOCAL CONTEXT, its history, identity of the site: climate and ways of life in the region, comparing urban growth, new needs, behaviour, customs, means of communication with the SENSITIVITY, peculiar to Islamic and pre-Islamic culture. LIGHT, COLOUR, REFLECTIVITY & SPECULARITY, since

500 AD invented the unique pattern of MIRRORWORK PALACE: in Persia, Rajastan and whole ISLAM world. The project looks at the needs and urgency for a Plan for the NEW MILLENNIUM, but attributes essential importance to the dialogue with the most IMAGINATIVE aspects of LOCAL TRADITION, into which are interwoven the struggles and parsimony, subtleties and flaunted opulence of millennia interpreting, WITHOUT PATRONISING EMULATION OF STYLE, but with self-critical HUMOUR, indispensable and NOT IRONICAL, which is our trademark.

The School of Mathematics at Rome's University Campus

Mar 26 2022 The School of Mathematics is a masterpiece of the early 1930s by Gio Ponti, who is today regarded as a master of Italian Modernism. Although World War II bombings shattered the coloured stained-glass window that once adorned the balanced and harmonious white travertine façade, the building remains a striking and significant piece of architecture. Although it underwent a series of transformations over the years before its historical and artistic relevance was recognised, it can still be appreciated and admired for its magnificent expressivity. Its uniqueness derives from its complexity, such as is often found in Italian monuments of all ages: a rare synthesis of urban design, architecture, art, industrial design, historical archives and – perhaps the first of its kind – scientific production in the field of mathematics. This illustrated report is a synopsis of the extensive technical research documents produced by the research team for each step of the work. It is also a premise for the conservation management plan proposed at the end of the full report. As in any area of science, knowledge is at the basis of future action: we need to understand today how to take care of the historical buildings of our campus tomorrow – buildings recognised worldwide as architectural and historical monuments.

Building Knowledge, Constructing Histories, volume 2 Aug 31 2022 Building Knowledge, Constructing Histories brings together the papers presented at the Sixth International Congress on Construction History (6ICCH, Brussels, Belgium, 9-13 July 2018). The contributions present the latest research in the field of construction history, covering themes such as: - Building actors - Building materials - The process of building - Structural theory and analysis - Building services and techniques - Socio-cultural aspects - Knowledge transfer - The discipline of Construction History The papers cover various types of buildings and structures, from ancient times to the 21st century, from all over the world. In addition, thematic papers address specific themes and highlight new directions in construction history research, fostering transnational and interdisciplinary collaboration. Building Knowledge, Constructing Histories is a must-have for academics, scientists, building conservators, architects, historians, engineers, designers, contractors and other professionals involved or interested in the field of construction history. This is volume 2 of the book set.

The First English Book for Teachers and Headmasters

100% Oct 28 2019 Questo non è un libro come gli altri, di quelli

che potete trovare sugli scaffali delle librerie perché è nato da un'esigenza personale ben precisa: trovare una metodologia efficiente ed efficace per studiare – e quindi a priori sistematizzare –, la non esigua quantità di documenti in lingua inglese oggetto delle prove del concorso per aspiranti Dirigenti scolastici. Mi sono resa conto, nel prosieguo dell'iter concorsuale, che questa mia esigenza trovava esatto riscontro in quella di molti altri colleghi che, come me, si apprestavano a sostenere le prove. Quello che avete tra le mani, inoltre, non è nemmeno uno dei soliti manuali di preparazione che avete probabilmente già acquistato negli anni. Non c'è nulla di più indispensabile di ciò che avete di fronte e che, finora, avete cercato ma non trovato: un vestito tagliato su misura per prepararsi su tutto quello che c'è da sapere per i concorsi nella Pubblica Amministrazione: concorso per Dirigenti scolastici, concorso per Direttore dei servizi generali e amministrativi (DSGA), concorso docenti scuola primaria e dell'infanzia, concorso docenti scuola superiore, concorso per il personale delle scuole italiane all'estero, concorso Tirocinio formativo attivo (TFA) per le attività didattiche di sostegno. In realtà, il testo vista la sua duttilità, si rivolge a chiunque sia interessato a leggere la scuola italiana in chiave europea e a mettere a fuoco i temi sociologici più importanti ed attuali. Un testo rigorosamente stilato sui documenti europei del quadro di riferimento del concorso dirigenziale e sui documenti più recenti in lingua inglese, ma rivisitati in modo più fruibile ed accessibile. Il compendio, aggiornato alle ultime novità dei documenti Europei, Eurydice [febbraio 2019], è diviso in sei capitoli che toccano tutte le aree di interesse dei concorsi pubblici: 1. the future of learning specie in relazione alle intercultural competences, the early leavers, foreign students' issues and inclusion, 2. new technologies and learning environments in teaching, 3. education in European Union con l'approfondimento dei sistemi educativi europei, 4. European policy in education, in riferimento al rapporto Eurydice 2019

sull'integrazione degli migranti, 5. school management, con un ampio riferimento alla macrotematica dell'autonomia scolastica, la sicurezza e l'evoluzione storica delle riforme scolastiche, 6. the European Union, con focus sulle istituzioni europee, il decision-making process e la Brexit. Tali e tanti riferimenti potrebbero far desistere anche i più resilienti: nessun timore! Tutti gli argomenti sono proposti con tratto scorrevole per una lettura motivante e il materiale è sistematizzato in modo da favorire un apprendimento rapido e completo, nonché i collegamenti trasversali. Clara Peruzzi, laureata cum laude in Lingue e letterature straniere presso l'Università degli Studi di Bari, docente di lingua inglese di scuola superiore a tempo indeterminato da ventisei anni, con esperienza quadriennale di lavoro presso le Nazioni Unite a Vienna (IEAE), nonché traduttrice in lingua inglese, francese e tedesca presso il Tribunale di Trani, è docente formatrice delle insegnanti di scuola primaria di lingua inglese, formatrice per corsi per adulti e ragazzi con certificazioni CAMBRIDGE di vario livello e referente esami TRINITY. Inoltre, ha da sempre svolto un ruolo attivo nella scuola: ideatrice e referente del progetto sperimentale AUTONOMIA 2000 (progetto di didattica sperimentale) presso l'istituto professionale Archimede di Barletta (BT), funzione strumentale area 3 - studenti dall'a.s. 2012-2013, oltre a ricoprire il ruolo di referente per l'orientamento. È animatrice digitale ed esperta in didattica multimediale. Negli anni ha curato vari volumi collettanei.

Between Concept and Identity Aug 07 2020 The identity of places of worship is one of the most difficult problems faced by religious architecture at the start of this new millennium. Contemporary globalising experiences demand, peremptorily, a reflection, both conceptual and situational, on the origin of objects, people and institutions. Nevertheless, the chance of these migration flows annihilating already-existing religious identities is perceived as a problem. This problem is directly linked to the survival of architecture as a system carrying a material representation of the

divine and constituting a self-reference system for the community of believers. Therefore, it is important to define the extent to which the new religious architecture has given room to an abstract type of formal experimentation which is disconnected from social reality. Does this architecture maintain its bridging, sacramental value, or, on the contrary, has it given way to the conceptualist trends still alive in the artistic world? Is metaphor a valid concept for the Christian religion? Is there an essential aspect linking this architecture to the centuries-old tradition of the Catholic Church? Different architectural, pedagogical, exhibition and formal initiatives have arisen in recent years and it is necessary to get to know them, with the purpose of understanding where contemporary religious architecture is heading in its eternal search for a permanent identity.

Fascism, Architecture, and the Claiming of Modern Milan,

1922-1943 Feb 22 2022 Fascism, Architecture, and the Claiming of Modern Milan, 1922-1943 chronicles the dramatic architectural and urban transformation of Milan during the nearly twenty years of fascist rule. The commercial and financial centre of Italy and the birthplace of fascism, Milan played a central role in constructing fascism's national image and identity as it advanced from a revolutionary movement to an established state power. Using a wide range of archival sources, Lucy M. Maulsby analyses the public buildings, from the relatively modest party headquarters to the grandiose Palace of Justice and the Palazzo del Popolo d'Italia, through which Mussolini intended to enhance the city's image and solidify fascism's presence in Milan. Maulsby establishes the extent to which Milan's economic structure, social composition, and cultural orientation affected Il Duce's plans for the city, demonstrating the influences on urban development that were beyond the control of the fascist regime. By placing Milan's urban change in its historic context, this book expands our understanding of the relationship between fascism and the modern city.

Modern Architecture, Empire, and Race in Fascist Italy Mar 14 2021 In *Modern Architecture, Empire, and Race in Fascist Italy*, Brian L. McLaren examines the architecture of the late-Fascist era in relation to the various racial constructs that emerged following the occupation of Ethiopia in 1936 and intensified during the wartime.

[The Third Rome, 1922-43](#) Jun 04 2020 What kind of city was the Fascist 'third Rome'? Imagined and real, rooted in the past and announcing a new, 'revolutionary' future, Fascist Rome was imagined both as the ideal city and as the sacred centre of a universal political religion. Kallis explores this through a journey across the sites, monuments, and buildings of the fascist capital. *Taurinen. beatificationis, et canonizationis ... Patris Ignatii a S. Agatha ... Summarium super dubio an constet de virtutibus, etc* Apr 02 2020

The Built Work of Giuseppe Pizzigoni Feb 10 2021 Giuseppe Pizzigoni, architect of classical and postwar modernism in northern Italy, owes his reputation to his connections with the Novecento movement, his independence from fascism, and his interest in innovative residential floor plans. Using redrawn plans of some 60 realized buildings, the design achievements are systematically analyzed, supplemented by explanations on the historical background, a systematic catalog, and up-to-date photographic documentation.

Libero Cecchini Oct 09 2020

La Città Altra. Storia E Immagine Della Diversità Urbana: Luoghi E Paesaggi Dei Privilegi E Del Benessere, Dell'isolamento, Del Disagio, Della Multiculturalità. Ediz. Italiana E Inglese Jun 28 2022

This volume proposes a rich corpus of papers about the 'Other City', a subject only few times dealt with, but worthy of all our attention: it imposes itself on the scene of international modern and contemporary historiography for its undeniable topicality. Throughout history, the city has always had to deal with social 'otherness', i.e. with class privileges and, consequently, with discrimination and marginalization of minorities, of the less well-off, of foreigners, in short, with the differences in status, culture, religion. So that the urban fabric has ended up structuring itself also in function of those inequalities, as well as of the strategic places for the exercise of power, of the political, military or social control, of the spaces for imprisonment, for the sanitary isolation or for the 'temporary' remedy to the catastrophes. From the first portraits of cities, made and diffused at the beginning of the fifteenth century for political exaltation purposes or for religious propaganda and for devotional purposes, which often, through increasingly refined graphic techniques, distort or even deny the

true urban image, we reach, at the dawn of contemporary history, the new meaning given by scientific topography and new methods of representation; these latter aimed at revealing the structure and the urban landscape in their objectivity, often unexpected for who had known the city through the filter of 'regime' iconography. The representation of the urban image still shows the contradictions of a community that sometimes includes and even exalts the diversities, other times rejects them, showing the unease of a difficult integration.

[A Short Treatise on the Wealth and Poverty of Nations \(1613\)](#) Dec 11 2020 Although no less an authority than Joseph A. Schumpeter proclaimed that Antonio Serra was the world's first economist, he remains something of a dark horse of economic historiography. 'A 'Short Treatise' on the Wealth and Poverty of Nations' presents, for the first time, an English translation of Serra's 'Breve Trattato' (1613), one of the most famous tracts in the history of political economy. The treatise is accompanied by Sophus A. Reinert's illuminating introduction which explores its historical context, reception, and relevance for current concerns.

Alessandro Anselmi Frammenti di Futuro Jun 24 2019

Racial Theories in Fascist Italy Jul 06 2020 Racial Theories in Fascist Italy examines the role played by race and racism in the development of Italian identity during the fascist period. The book examines the struggle between Mussolini, the fascist hierarchy, scientists and others in formulating a racial persona that would gain wide acceptance in Italy. This book will be of interest to historians, political scientists concerned with the development of fascism and scholars of race and racism.

[Mussolini, Architect](#) Nov 09 2020 During the fascist years in Italy, architecture and politics enjoyed a close alliance. Benito Mussolini used architecture to educate the masses, exploiting its symbolic prowess as a powerful tool for achieving political consensus. Mussolini, Architect examines Mussolini in Italy from 1922 to 1943 and expands the traditional interpretations of

fascism, advancing the claim that Mussolini devised and implemented architecture as a tool capable of determining public behaviour and influencing opinion. Paolo Nicoloso challenges the assertion that Mussolini was of minimal influence on Italian architecture and argues that in fact the fascist leader played a strong role in encouraging civic architectural development in order to reflect the totalitarian values of the period. Drawing on archival documents, Nicoloso lists the architects who gave Mussolini ideas and describes the times when the dictator himself sometimes picked up a pencil and suggested changes. Examining the political, social, and architectural history of the fascist period, *Mussolini, Architect* gives careful attention to the final years of fascist rule in order to demonstrate the extent to which Mussolini was intent on shaping Italy and its citizens through architectural projects.
