Solid, Safe, Secure Nov 20 2021 This 'how to' guide provides advice for building archives big and small. It focuses on housing archives in Australia, making this the first guide for Australian conditions. Winner of 1998 Mander Jones Award - Publication making the greatest contribution to archives in Australia (ASA).

Handbook of Research on Advocacy, Promotion, and Public Programming for Memory Institutions May 27 2022 Memory institutions such as archives, libraries, and museums collect, arrange, describe, and preserve their collections and holdings in order to make them accessible to the community. However, these institutions remain underutilized and are struggling to raise awareness of their existence and

attract users and funders. The Handbook of Research on Advocacy, Promotion, and Public Programming for Memory Institutions is a collection of innovative research on emerging strategies such as advocacy, outreach, marketing, and public programming to promote memory institutions and engage the community. While highlighting topics including customer service solutions, social media, and collection development strategies, this book is ideally designed for heritage management and information professionals, curators, museum management, archival specialists, librarians, policymakers, researchers, and academicians.

Castles Magnified Mar 01 2020 Grab your magnifying glass and charge into battle with this search-and-find history adventure packed with more than 200 things to spot in each eye-boggling illustration. Meet history's most heroic knights as you travel back in time to follow Sir Gallahad into the court of King Arthur, Joan of Arc into battle, and Richard the Lionheart on his last crusade. Use the magnifying glass to explore cutaway castles, epic medieval battlefields, and impressive royal tournaments, then learn about chivalry, armor, and jousting. Written by the Blue Peter award-winning David Long, this book will delight and inform the most inquisitive young squires and ladies! Continue your up-close, search-and-find history adventures with Pirates Magnified and Egypt Magnified.

Building an Electronic Records Archive at the National Archives and Records Administration Oct 20 2021 Like its constituent agencies and other organizations, the federal government generates and increasingly saves a large and growing fraction of its records in electronic form. Recognizing the greater and greater importance of these electronic records for its mission of preserving "essential evidence," the National Archives and Records Administration (NARA) launched a major new initiative, the Electronic Records Archives (ERA). NARA plans to commence the initial procurement for a production-quality ERA in 2003 and has started a process of defining the desired capabilities and requirements for the system. As part of its preparations for an initial ERA procurement, NARA asked the National Academies' Computer Science and Telecommunications Board (CSTB) to provide independent technical advice on the design of an electronic records archive, including an assessment of how work sponsored by NARA at the San Diego Supercomputer Center (SDSC) helps inform the ERA design and what key issues should be considered in ERA's design and operation. Building an Electronic Records Archie at the National Archives and Records Administration provides preliminary feedback to NARA on lessons it should take from the SDSC work and identifies key ERA design issues that should be addressed as the ERA procurement process proceeds in 2003.

Alden B. Dow Apr 01 2020 Alden Dow (active 1930s-1970s) produced more than five hundred designs—often daringly modern structures. This book traces Alden Dow's life and work as well as the intensely personal philosophy that governed everything he did: houses, churches, schools, business and civic structures, and even a new town in Texas. Dow changed the face of his hometown of Midland, Michigan, leaving more than one hundred buildings, including his Home and Studio, a National Historic Landmark. 185 color and 220 black-and-white illustrations.

How Buildings Learn Sep 26 2019 Buildings have often been studied whole in space, but never before have they been studied whole in time. How Buildings Learn is a masterful new synthesis that proposes that buildings adapt best when constantly refined and reshaped by their occupants, and that architects can mature from being artists of space to becoming artists of time. From the connected farmhouses of New England to I.M. Pei's Media Lab, from "satisficing" to "form follows funding," from the evolution of bungalows to the invention of Santa Fe Style, from Low Road military surplus buildings to a High Road English classic like Chatsworth—this is a far-ranging survey of unexplored essential territory. More than any other human artifacts, buildings improve with time—if they're allowed to. How Buildings Learn shows

how to work with time rather than against it.

The federal government generates and increasingly saves a large and growing fraction of its records in electronic form. In 1998, the National Archives and Record Administration (NARA) launched its Electronic Archives (ERA) program to create a system to preserve and provide access to federal electronic records. To assist in this project, NARA asked the NRC to conduct a two-phase study to provide advice as it develops the ERA program. The first two reports (phase one) provided recommendations on design, engineering, and related issues facing the program. This report (phase two) focuses on longer term, more strategic issues including technology trends that will shape the ERA system, archival processes of the ERA, and future evolution of the system. It also provides an assessment of technical and design issues associated with record integrity and authenticity.

[Forts](#) Feb 09 2021 Ever since humans began to live together in settlements they have felt the need to organise some kind of defence against potentially hostile neighbours. Many of the earliest city states were built as walled towns, and during the medieval era, stone castles were built both as symbols of the defenders' strength and as protection against potential attack. The advent of cannon prompted fortifications to become lower, denser and more complex, and the forts of the eighteenth and nineteenth centuries could appear like snowflakes in their complexity and beautiful geometry. Without forts, the history of America could have taken a very different course, pirates could have sailed the seas unchecked, and Britain itself could have been successfully invaded. This book explains the history of human fortifications, and is beautifully illustrated using photographs, plans, drawings and maps to explain why they were built, their various functions and their immense historical legacy in laying the foundations of empire.

The National Archives: the Buildings That Made London Nov 01 2022 Take an incredible journey through the streets of London and see beautiful buildings as you've never seen them before! An elegant horizon of historic masterpieces mixed with sleek modern skyscrapers, the familiar London skyline seems to change every year. Using original architectural drawings from The National Archives brought to life by stunning artwork by Josie Shenoy, discover the rich heritage of some of London's most iconic buildings. Watch Buckingham Palace transform from a large country house into an opulent palace, spot Henry VII playing tennis on the lawn of Hampton Court Palace and get lost in the Palm House at Kew, London's very own tropical rainforest. This beautiful book from Blue Peter Award-winning author David Long and exceptionally talented artist Josie Shenoy is a historical kaleidoscope celebrating the magnificent buildings that made London.
