British Autobiography in the Seventeenth Century Jul 31 2022 Originally published in 1969. In the seventeenth century neither the literary genre nor the term 'autobiography' existed but we see in seventeenth-century literature many kinds of autobiographical writings, to which their authors gave such titles as 'Journal of the Life of Me, Confessions, etc. This work is a study of nearly two hundred of these, published and unpublished, which together represent a very varied group of writings. The book begins with an examination of the rise of autobiography as a genre during the Renaissance. It discusses seventeenth-century autobiographical writings under two main headings - 'religious', where the autobiographies are grouped according to the denomination of their writer, and 'secular', where a wide variety of writings is examined, including accounts of travel and of military and political life, as well as more personal accounts. Autobiographies by women are treated separately, and the author shows that they in general have a deeper revelation of sentiments and more subtle self-analyses than is found in comparable works by men. Sources and influences are recorded and also the essential historical details of each work. This book gives a critical analysis of the autobiographies as literary works and suggests relationships between them and the culture and society of their time. Review of the original publication: "...a contribution to cultural history which is of quite exceptional merit. Its subject is of great intrinsic interest and manifest importance and Professor Delany has treated it with exemplary thoroughness, lucidity, and intelligence." Lionel Trilling

Dr. Haggard's Disease Feb 23 2022 "A stormy tale of obsession...this is a haunting portrayal of a man broken by passion" (Library Journal). Dr. Edward Haggard is a lonely, pain-racked romantic, standing at the window of his house on the edge of a cliff, watching as the clouds of war draw near, and reflecting on the nature of love, death, medicine, war—but most of all on the wife of the senior pathologist, and the few brief months of bliss they shared. Shortly after the outbreak of World War II, a fighter pilot appears in Dr. Haggard's surgery, reawakening memories of the single grand passion of Haggard's life. For this young man is the son of the woman Haggard loved, and as the doctor becomes more and more intrigued by the bizarre changes occurring in his new patient's body, his old passion gives way to a fresh one, a passion altogether odder, and darker, than the first. In true gothic fashion, Patrick McGrath brings to his narration of a doomed love affair and bizarre aftermath an acute erotic intensity, portraying a man whose disease is passion—disease that can exalt a man, but can also destroy him.
