Drive May 07 2020 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

It Will Be Fun and Terrifying Jan 03 2020 "The National Bolshevik Party, founded in the mid-1990s by Eduard Limonov and Aleksandr Dugin, began as an attempt to combine radically different ideologies: bolshevism and nationalism. In the years that followed, Limonov, Dugin,

and the movements they led underwent dramatic shifts that eventually led to the support of Putin's conservative, imperialist regime over social justice and fundamental civil liberties. To illuminate the role of these right-wing ideas in contemporary Russian society, Fabrizio Fenghi examines the public pronouncements and aesthetics of this influential movement. He analyzes a diverse range of media, including novels, art exhibitions, performances, seminars, punk rock concerts, and even protest actions. His interviews with key figures reveal an attempt to create an alternative intellectual class, or a "counter-intelligensia." This volume shows how certain forms of art can transform into political action through the creation of new languages, institutions, and modes of collective participation"--
