[A Killer by Design](#) Sep 21 2021 A vivid behind-the-scenes look into the creation of the FBI's Behavioral Science Unit and the evolution of criminal profiling, written by the pioneering forensic nurse who transformed the way the FBI studies, profiles, and catches serial killers. Lurking beneath the progressive activism and sex positivity in the 1970-80s, a dark undercurrent of violence rippled across the American landscape. With reported cases of sexual assault and homicide on the rise, the FBI created a specialized team—the "Mindhunters" better known as the Behavioral Science Unit—to track down the country's most dangerous criminals. And yet narrowing down a seemingly infinite list of potential suspects seemed daunting at best and impossible at worst—until Dr. Ann Wolbert Burgess stepped on the scene. In *A Killer By Design*, Burgess reveals how her pioneering research on sexual assault and trauma caught the attention of the FBI, and steered her right into the middle of a chilling serial murder investigation in Nebraska. Over the course of the next two decades, she helped the budding unit identify, interview, and track down dozens of notoriously violent offenders, including Ed Kemper ("The Co-Ed Killer"), Dennis Rader ("BTK"), Henry Wallace ("The Taco Bell Strangler"), Jon Barry Simonis ("The Ski-Mask Rapist"), and many others. As one of the first women trailblazers within the FBI's hallowed halls, Burgess knew many were expecting her to crack under pressure and recoil in horror—but she was determined to protect future victims at any cost. This book pulls us directly into the investigations as she experienced them, interweaving never-before-seen interview transcripts and crime scene drawings alongside her own vivid recollections to provide unprecedented insight into the minds of deranged criminals and the victims they left behind. Along the way, Burgess also paints a revealing portrait of a formidable institution on the brink of a seismic scientific and cultural reckoning—and the men forced to reconsider everything they thought they knew about crime. Haunting, heartfelt, and deeply human, *A Killer By Design* forces us to confront the age-old question that has long plagued our criminal justice system: "What drives someone to kill, and how can we stop them?" Serial Killers and the Phenomenon of Serial Murder Apr 28 2022 A superbly targeted resource for those learning about serial killings. Serial Killers and the Phenomenon of Serial Murder examines and analyses some of the best known (as well as lesser) cases from English criminal history, ancient and modern. It looks at the lifestyles, backgrounds and activities of those who become serial killers and identifies clear categories of individuals into which most serial killers fall. Led by Professor David Wilson the authors are all experts and teachers concerning the ever-intriguing subject of serial killing: why, when and how it happens and whether it can be predicted. Taking some of the leading cases from English law and abroad they demonstrate the patterns that emerge in the lives and backgrounds of those who kill a number of times over a period. The book is designed for those studying the topic at advanced level, whether as an academic discipline on one of the many courses now run by universities and colleges or as a private quest for understanding. It contains notes on key terms and explanations of topics such as co-activation, Munchausen syndrome, cooling-off period, psychopathy checklist, social construction, case linkage, family annihilation, activity space, rational choice theory, medicalisation and rendezvous discipline. As the first textbook of its kind it will be an invaluable resource for teachers and students of serious crime. Serial Killers Dec 01 2019 This volume tackles the issue of criminal responsibility in the case of serial killers, and other 'mad' people who are nonetheless deemed to be answerable before the law in most jurisdictions. Killers of the Flower Moon Dec 13 2020 NATIONAL BOOK AWARD FINALIST • NATIONAL BESTSELLER • A twisting, haunting true-life murder mystery about one of the most monstrous crimes in American history, from the author of *The Lost City of Z*. In the 1920s, the richest people per capita in the world were members of the Osage Nation in Oklahoma. After oil was discovered beneath their land, the Osage rode in chauffeured automobiles, built mansions, and sent their children to study in Europe. Then, one by one, the Osage began to be killed off. The family of an Osage woman, Mollie Burkhardt, became a prime target. One of her relatives was shot. Another was poisoned. And it was just the beginning, as more and more Osage were dying under mysterious circumstances, and many of those who dared to investigate the killings were themselves murdered. As the death toll rose, the newly created FBI took up the case, and the young director, J. Edgar Hoover, turned to a former Texas Ranger named Tom White to try to unravel the mystery. White put together an undercover team, including a Native American agent who infiltrated the region, and together with the Osage began to expose one of the most chilling conspiracies in American history. Look for David Grann's new book, *The Wager*, coming in April 2023!

The Killer Across the Table Apr 16 2021 The legendary FBI criminal profiler, number-one New York Times bestselling author, and inspiration for the hit Netflix show *Mindhunter* delves deep into the lives and crimes of four of the most disturbing and complex predatory killers, offering never-before-revealed details about his profiling process, and divulging the strategies used to crack some of America's most challenging cases. The FBI's pioneer of criminal profiling, former special agent John Douglas, has studied and interviewed many of America's most notorious killers—including Charles Manson, "Son of Sam Killer" David Berkowitz and "BTK Strangler" Dennis Rader—trained FBI agents and investigators around and the world, and helped educate the country about these deadly predators and how they operate, and has become a legend in popular culture, fictionalized in *The Silence of the Lambs* and the hit television shows *Criminal Minds* and *Mindhunter*. Twenty years after his famous memoir, the man who literally wrote the book on FBI criminal profiling opens his case files once again. In this riveting work of true crime, he spotlights four of the most diabolical criminals he's confronted, interviewed and learned from. Going deep into each man's life and crimes, he outlines the factors that led them to murder and how he used his interrogation skills to expose their means, motives, and true evil. Like the hit Netflix show, *The Killer Across the Table* is centered around Douglas' unique interrogation and profiling process. With his longtime collaborator Mark Olshaker, Douglas recounts the chilling encounters with these four killers as he experienced them—revealing for the first time his profile methods in detail. Going step by step through his interviews, Douglas explains how he connects each killer's crimes to the specific conversation, and contrasts these encounters with those of other deadly criminals to show what he learns from each one. In the process, he returns to other famous cases, killers and interviews that have shaped his career, describing how the knowledge he gained from those exchanges helped prepare him for these. A glimpse into the mind of a man who has pierced the heart of human darkness, *The Killer Across the Table* unlocks the ultimate mystery of depravity and the techniques and approaches that have countered evil in the name of justice.

Serial Killers May 18 2021 In this provocative cultural study, the serial killer emerges as a central figure in what Mark Seltzer calls 'America's wound culture'. From the traumas displayed by talk show guests and political candidates, to the violent entertainment of *Crash* or *The Alienist*, to the latest terrible report of mass murder, we are surrounded by the accident from which we cannot avert our eyes. Bringing depth and shadow to our collective portrait of what a serial killer must be, Mark Seltzer draws upon popular sources, scholarly analyses, and the language of psychoanalysis to explore the genesis of this uniquely modern phenomenon. Revealed is a fascination with machines and technological reproduction, with the singular and the mass, with definitions of self, other, and intimacy. What emerges is a disturbing picture of how contemporary culture is haunted by technology and the instability of identity.

My Life Among the Serial Killers Aug 21 2021 Over the course of twenty-five years, Dr. Helen Morrison has profiled more than eighty serial killers around the world. What she learned about them will shatter every assumption you've ever had about the most notorious criminals known to man. Judging by appearances, Dr. Helen Morrison has an ordinary life in the suburbs of a major city. She has a physician husband, two children, and a thriving psychiatric clinic. But her life is much more than that. She is one of the country's leading experts on serial killers, and has spent as many as four hundred hours alone in a room with depraved murderers, digging deep into killers' psyches in ways no profiler before ever has. In *My Life Among the Serial Killers*, Dr. Morrison relates how she profiled the Mad Biter, Richard Otto Macek, who chewed on his victims' body parts, stalked Dr. Morrison, then believed she was his wife. She did the last interview with Ed Gein, who was the inspiration for Alfred Hitchcock's *Psycho*. John Wayne Gacy, the clown-obsessed killer of young men, sent her crazed Christmas cards and gave her his paintings as presents. Then there was Atlanta child killer Wayne Williams; rapist turned murderer Bobby Joe Long; England's Fred and Rosemary West, who killed girls and women in their "House of Horrors"; and Brazil's deadliest killer of children, Marcelo Costa de Andrade. Dr. Morrison has received hundreds of letters from killers, read their diaries and journals, evaluated crime scenes, testified at their trials, and studied photos of the gruesome carnage. She has interviewed the families of the victims -- and the spouses and parents of the killers -- to gain a deeper understanding of the killer's environment and the public persona he adopts. She has also studied serial killers throughout history and shows how this is not a recent phenomenon with psychological autopsies of the fifteenth-century French war hero Gilles de Rais, the sixteenth-century Hungarian Countess Bathory, H. H. Holmes of the late nineteenth century, and Albert Fish of the Roaring Twenties. Through it all, Dr. Morrison has been on a mission to discover the reasons why serial killers are compelled to murder, how they choose their victims, and what we can do to prevent their crimes in the future. Her provocative conclusions will stun you.

Why We Love Serial Killers Mar 28 2022 A chilling investigation into the deviant mind, "so powerful and provocative, you cannot put it down" (Rita Cosby, New York Times – bestselling author). We know the names: Ted Bundy, Ed Gein, Jeffrey Dahmer, John Wayne Gacy, among them—serial killers transformed by the media into ghoulish celebrities. And their iconic fictional counterparts—from Norman Bates to Hannibal Lecter to Dexter—reveal just how eager we are to watch a psychopath in action. But why? Are we curious about the root of their terrifying compulsions? Or is it something more? Why We Love Serial Killers "attempts to solve some of these mysteries . . . What made serial killers this way? Why did they kill, and why did they do it so gruesomely? How are they different from us? (Please let them be different from us)" (The Atlantic). In exploring our appetite for the macabre, criminology professor Dr. Scott Bonn also provides a unique view into the world of serial killers, having corresponded with two of the most notorious examples: David Berkowitz, a.k.a. Son of Sam, and the BTK Killer, Dennis Rader. In addition, Bonn examines the criminal profiling techniques used to identify serial predators, the charisma of the sociopath, the rise in "murderabilia" collecting, and how and why these killers often become pop-culture icons, escalating both our fears and our fascination. The result is "powerful and a must-read . . . insightful, compelling, and an excellent source of myth-busting information for laymen and professionals alike" (Burl Barer, Edgar Award – winning author of *The Saint*).

Serial and Mass Murder Jul 08 2020 This book reframes the study of multicide (that is, serial and mass murder) to use objective measures, and aims to expand our understanding of multicide offending through descriptive and inferential statistical analyses of different homicide patterns of the offenders. Criminal homicide and multiple murders are rare occurrences that typically account for a very small percentage of all violent crimes in most countries. Despite this low occurrence, homicide continues to be an area of intense study, with a focus on subjective measures and classifications. The research and analysis based on a database of over 1,300 cases contributes to the criminological study of violence and draws distinctions between types of offenders (partnered and solo, serial and mass, male and female, etc.) from a range of different countries and across decades. Traditionally, studies of homicide focus on male offenders and theories of offending are then applied to females and co-offenders. The research presented in this book reveals that women and partnered offenders have very different homicide patterns from men. Looking at the history of multicide offending, this book uses descriptive and inferential statistical analyses to directly compare differences in offending and outcome patterns across multicide offender types. This exploration of the multidimensionality of homicide at an international level is useful for scholars and students interested in criminal justice, criminology, psychology, sociology, or law.

American Evil Nov 23 2021 American Evil deals with the 'sordid' world of serial killers, their calculating methods and distorted thinking, based around the author's ground-breaking work as a prison psychologist, government advisor and consultant to three TV series including *Voice of a Serial Killer*. Based on clinical experience of killers. Includes a selection of USA/UK serial killer studies. Exposes police and other failings and shortcomings and the perversity of 'defences', 'excuses', etc. Strongly critical of USA gun laws and attitudes or perspectives making for an unhealthy environment, moral vacuum and lack of official/individual awareness and responsibility. The book describes how the author was 'so profoundly moved' by his inescapable conclusions about how serial killers are 'made' that he was compelled to set out his findings. Bemoaning the serial killer 'growth industry', 'unhealthy interest' and ill-informed comment he sets the record straight. Serial killers are made not born. But his central polemic is that serial killers are one of several malign human by-products of a dysfunctional modern permissive society, overwhelmingly American, brought about by modern-day culture in the USA, lax moral standards as also reflected in other countries to the extent that they pursue a comparable way of life.

Talking with Serial Killers: Sleeping with Psychopaths Dec 25 2021 Bestselling writer and criminologist Christopher Berry-Dee turns his attention to a new kind of victim: the wives or partners of serial murderers who remained unaware of exactly who they had fallen for until after their other half's arrest or, in some cases, conviction, for multiple murders. Sonia Sutcliffe first discovered that her husband, Peter, was leading a secret existence as 'the Yorkshire Ripper' only when he was arrested. The wife of the 'Hillside Strangler' only learned of her husband's crimes when state police smashed down her door in search of him. On finding out the truth, these innocents often experience a strange kind of guilt for not having recognised the killer in their home, as well as having to face the grim reality of betrayal and deceit. Christopher Berry-Dee speaks directly to killers and their oblivious loved ones to get inside the minds of the men and women who fall for murderers.

After disappearing for nine years, he suddenly reappeared, complaining that no one was paying enough attention to him and claiming that he had committed other crimes for which he had not been given credit. When he was ultimately captured, BTK was shockingly revealed to be Dennis Rader, a 61-year-old married man with two children.

Listening to Killers Jun 18 2021 Listening to Killers offers an inside look at twenty years' worth of murder files from Dr. James Garbarino, a leading expert psychological witness who listens to killers so that he can testify in court. The author offers detailed accounts of how killers travel a path that leads from childhood innocence to lethal violence in adolescence or adulthood. He places the emotional and moral damage of each individual killer within a larger scientific framework of social, psychological, anthropological, and biological research on human development. By linking individual cases to broad social and cultural issues and illustrating the social toxicity and unresolved trauma that drive some people to kill, Dr. Garbarino highlights the humanity we share with killers and the role of understanding and empathy in breaking the cycle of violence.

Talking with Female Serial Killers - A chilling study of the most evil women in the world Jun 06 2020 Christopher Berry-Dee, criminologist and bestselling author of books about the serial killers Aileen Wuornos and Joanne Denney, turns his uncompromising gaze upon women who not only kill, but kill repeatedly. Because female murderers, and especially serial murderers, are so rare compared with their male counterparts, this new study will surprise as well as shock, particularly in the cases of women like Beverley Allitt, who killed children, and Janie Lou Gibbs, who killed her three sons and a grandson, as well as her husband. Here too are women who kill under the influence of their male partners, such as Myra Hindley and Rosemary West, and whose lack of remorse for their actions is nothing short of chilling. But the author also turns his forensic gaze on female killers who were themselves victims, like Aileen Wuornos, whose killing spree, for which she was executed, can be traced directly to her treatment at the hands of men. Christopher Berry-Dee has no equal as the author of hard-hitting studies of the killers who often walk among us undetected for many years, and who in so many cases seem to be acting entirely against their natures.
