Using a case-based approach, students are encouraged to reason and collaborate about due process, the distribution of educational resources, institutional unresponsiveness, professional relationships, conflicts among parents and teachers, and confidentiality. **Does Compliance Matter in Special Education?** Nov 11 2020 This book asks a question that many educators may think, but won't say out loud: Does

compliance with IDEA legislation matter? The author acknowledges that, while compliance with IDEA (Individuals with Disabilities Education Act) is important, it can also be an administrative burden that detracts from practitioners' capacity to adequately serve students with disabilities. Using data collected from three suburban school districts, Voulgarides helps us to understand how compliance with IDEA intersects with decades of evidence of racial inequities in student outcomes. This timely and thought-provoking book unpacks the civil rights history of IDEA, examines the impact of its procedural focus on educational practice, and questions why racial inequities in special education persist despite good intentions by policymakers, educators, and school personnel. Book Features: Uses empirical evidence to examine the common assumption that compliance with IDEA leads to educational equity. Focuses on the different dimensions of the equity concern that lie at the intersection between race, disability, and educational policy. Challenges practitioners to think about the roles they play in both the production and the disruption of educational inequities.

From the first efforts to teach disabled people in early Christian and Medieval eras to such current mandates as Public Law 94-142, this study breaks new ground in assessing the development of special education as a formal discipline. "The History of Special Education" presents a four-part narrative that traces its emergence in fascinating detail from 16th-century Spain through the Age of Enlightenment in 17th-century France and England to 18th-century issues in Europe and North America of placement, curriculum, and early intervention. The status of teachers in the 19th century and social trends and the movement toward integration in 20th century programs are considered as well. -- From product description.

Special Education in Tibet Jan 26 2022 This book analyses the value orientation system of education in Tibet and examines the special education interventions aimed at children with disabilities in the region. The authors draw on their interviews with students, parents, and teachers to shed light on how education is viewed by the general population in Tibet. The book looks at themes such as traditional Tibetan education, the ways in which value orientation affects the development of disabled children, the role of special education interventions in building self-esteem and confidence, and the importance of developing pedagogical care and special schools in Tibet. It also reviews China's existing legal provisions and policies dedicated to persons with disabilities in comparison with Tibet. Finally, it emphasizes the role of practicing social acceptance for children with special educational needs and recommends developing special education interventions based on the cultural foundation and real social conditions of the ethnic group. Based on in-depth qualitative and quantitative research, this book will be of interest to teachers, students, and researchers of education, special education, curriculum studies, sociology, anthropology, disability studies, minority studies and cultural studies. Reimagining Special Education Jul 20 2021 "As the COVID-19 era continues to expose inequities, inefficiencies, and areas of need across our education system, leaders and educators have a unique opportunity to press pause and reimagine school. Now is the time to take the lessons of 2020 and turn them into action: by closely examining the "old ways," letting go of practices that don't serve students, and creating new routines and environments that meet the needs of every learner. Education professionals need to investigate critical questions: Which established routines and practices have always worked in school? Did those practices really work for all students? What hasn't worked so well? What would it look like to rethink school in a way that eliminates practices that keep some students struggling while others thrive? Explore the answers to these questions--and more--in this forthcoming release, a visionary guide to the reimagined school from inclusion experts Jenna Rufo, Ed.D., and Julie Causton, Ph.D"--

Toward a Theology of Special Education Sep 02 2022 "Professor, mentor, author, disability advocate, seminar leader around the world—Dr. David Anderson corralled his many talents and worldwide experiences to author this important book. The volume should prove invaluable to Christians concerned about disabilities, especially teachers. Without flinching, Dr. Anderson tackles the tough issues: How could a good and benevolent God permit disabled children? Are disabilities the result of sin? How does a Christian teacher of the disabled differ from secular counterparts? Especially helpful is his emphasis on the reflective teacher integrating faith and learning. Certainly this is a volume that belongs on the bookshelves of anyone concerned with disabilities." —Steven A. Kaatz PhD, Graduate Programs in Special Education, Bethel University, St. Paul, Minnesota "I have had the privilege of traveling with Dr. Anderson as he has taught the concepts addressed in this book to educators, pastors, and parents in a variety of countries. I've seen the material come alive as leaders discover the importance of thinking Christianly about disability. This book has the potential of impacting all readers in similar ways. Dr. Anderson challenges all of us to come to grips with a biblical worldview and then to live it out within our spheres of influence. *Toward a Theology of Special Education* thus encourages all readers to think Christianly about disability. Such thinking will then motivate us to care with God's care and to serve with God's concern for justice and compassion." —Dr. Richard Schoenert, pastor emeritus, Calvary Church, Roseville, Minnesota

Who Benefits From Special Education? Sep 21 2021 *Who Benefits From Special Education?: Remediating (Fixing) Other People's Children* addresses the negative consequences of labeling and separating education for students with "disabilities," the cultural biases inherent in the way that we view children's learning difficulties, the social construction of disability, the commercialization of special education, and related issues. The theme that unifies the chapters is that tension exists between professional ideology and practice, and the wishes and expectations of the recipients of professional practice—children, adolescents, and adults with disabilities and their families. These voices have rarely taken center stage in formulating important decisions about the quality and characteristics of appropriate practice. The dominant view in the field of special education has been that disability is a problem in certain children, rather than an artifact that results from the general structure of schooling; it does not take into consideration the voices of people with disabilities, their families, or their teachers. Offering an alternative perspective, this book deconstructs mainstream special education ideologies and highlights the personal perspectives of students, families, and front-line professionals such as teachers and mental health personnel. It is particularly relevant for special education/disabilities studies graduate students and faculty and for readers in general education, curriculum studies, instruction theory, and critical theory.

Case Studies in Special Education May 30 2022 Special education law and practice have undergone profound transformation over the past 50 years. Students

with disabilities are now more likely to receive a free and appropriate education in the least restrictive environment possible; however, the ideals of the law have not always been manifested in effective practice. Although special education services are vastly better today than they were in the early years of public education, current policies and practices continue to result in the under-education of many children with disabilities. This book illustrates key failures of the system within the context of real children's experiences. The case study approach gives voice to the students, families, and educators who have been let down by the special education process. The goal is to shed light on the flaws and injustices of the status quo. After identifying these problems, the authors offer sound solutions. Section 1 is devoted to issues surrounding identification of students with learning disabilities. These topics include occurrence of inconsistencies in assessment and diagnoses, understanding the struggles of the "slow learner," and the interference of behavioral challenges with students' educational performance. Section 2 addresses problems within the evaluation process that negatively influence diagnoses. Discussions include disproportionate representation of students from low socioeconomic backgrounds as well as students of color and bilingual students. Section 3 highlights significant concerns with service provision within the special education realm. The narratives throughout the book present stories of children on the receiving end of a severely fractured special education system. Recommendations focus on solving specific problems, such as inconsistent identification processes and categories, disproportionate representation, ill-conceived IEPs, ineffective specially designed instruction, and poorly implemented RTI programs. The book's methodological approach affirms that there is much room for reform within both the special education system and the public education system as a whole. This book will be an excellent resource for graduate-level students, practitioners, and teachers in the fields of special education, disability studies, early intervention, school psychology, and child and family services. Additionally, it will be of interest to social workers, counselors, and researchers.

Most importantly, they outline the central rights you and your child have regarding your child's education. Did you know that you can refer your child for a special education evaluation? That you can ask for a second opinion if you disagree with the results of some or all of the testing? That you are entitled to parent counseling, training, and more? They also show you how to take that knowledge and apply it to advocating for your child. Inclusive Special Education Feb 01 2020 Much has been written about special education and about inclusive education, but there have been few attempts to pull these two concepts and approaches together. This book does just that: sets special education within the context of inclusive education. It posits that to include, effectively, all children with special educational needs in schools requires an integration of both concepts, approaches, and techniques. It has never been more timely to publish a book that helps professionals who work with schools, such as psychologists, special education professionals, and counselors, to identify effective practices for children with special needs and provide guidelines for implementing these in inclusive schools.

New Directions in Special Education Jun 18 2021 A comprehensive study that is also practical and realistic, *New Directions in Special Education* outlines principles for decisionmaking about special education at every level—from the family to the classroom, school, and district—and for state and federal policy. With this volume, leading scholar and disability advocate Thomas Hehir opens a new round of debate on the future of special education. Extending the conceptual framework developed in his seminal 2002 article in the *Harvard Educational Review*, "Eliminating Ableism in Education," Hehir examines the ways that cultural attitudes about disability systematically distort the education of children with special needs and uses this analysis to lay out a fresh approach to special education policy and practice. Hehir traces the roots of "ableism"—the pervasive devaluation of people with disabilities—and shows how negative

attitudes continue to shape debates in the field. He assesses recent trends in special education policy, particularly the shift of emphasis from compliance to outcomes, and discusses in depth the successes and limitations of the inclusion movement. He also investigates the impact of standards-based reforms on children with disabilities and critically examines the promise of Universal Design for Learning.
