Bodies of Subversion Jan 02 2020 "In this provocative work full of intriguing female characters from tattoo history, Margot Mifflin makes a persuasive case for the tattooed woman as an emblem of female self-expression." —Susan Faludi *Bodies of Subversion* is the first history of women's tattoo art, providing a fascinating excursion to a subculture that dates back into the nineteenth-century and includes many never-before-seen photos of tattooed women from the last century. Author Margot Mifflin notes that women's interest in tattoos surged in the suffragist 20s and the feminist 70s. She chronicles: * Breast cancer survivors of the 90s who tattoo their mastectomy scars as an alternative to reconstructive surgery or prosthetics. * The parallel rise of tattooing and cosmetic surgery during the 80s when women tattooists became soul doctors to a nation afflicted with body anxieties. * Maud Wagner, the first known woman tattooist, who in 1904 traded a date with her tattooist husband-to-be for an apprenticeship. * Victorian society women who wore tattoos as custom couture, including Winston Churchill's mother, who wore a serpent on her wrist. * Nineteenth-century sideshow attractions who created fantastic abduction tales in which they claimed to have been forcibly tattooed. "In *Bodies of Subversion*, Margot Mifflin insightfully chronicles the saga of skin as signage. Through compelling anecdotes and cleverly astute analysis, she shows and tells us new histories about women, tattoos, public

pictures, and private parts. It's an indelible account of an indelible piece of cultural history."

The Complete Guide to Women's Health Nov 23 2021

Discusses all aspects of women's health care, including birth control, pregnancy and childbirth, sexuality, drug use, and menopause. **Sourcebook on Violence Against Women** Nov 04 2022 Jonathan Letterman was an outpost medical officer serving in Indian country in the years before the Civil War, responsible for the care of just hundreds of men. But when he was appointed the chief medical officer for the Army of the Potomac, he revolutionized combat medicine over the course of four major battles: Antietam, Fredericksburg, Chancellorsville, and Gettysburg that produced unprecedented numbers of casualties. He made battlefield survival possible by creating the first organized ambulance corps and a more effective field hospital system. He imposed medical professionalism on a chaotic battlefield. Where before 20 percent of the men were unfit to fight because of disease, squalid conditions, and poor nutrition, he improved health and combat readiness by pioneering hygiene and diet standards. Based on original research, and with stirring accounts of battle and the struggle to invent and supply adequate care during impossible conditions, this new biography recounts Letterman's life from his small-town Pennsylvania beginnings to his trailblazing wartime years and his subsequent life as a wildcatter and the medical examiner of San Francisco. At last, here is the missing portrait of a key figure of Civil War history and military medicine. His principles of battlefield care continue to be taught to military commanders and first responders.

Women in the Church (Third Edition) Mar 16 2021 The role of women in the church is more hotly debated today than ever. Modernizing Women Feb 01 2020 Extrait de la préface : "The subject of this study is social change in the Middle East, North Africa, and Afghanistan ; its impact on women's legal status and social positions ; and women's varied responses to, and involvement in, change processes. It also deals with constructions of gender during periods of social and political change. Social change is usually described in terms of modernization, revolution, cultural challenges, and social movements. Much of the standard literature on these topics does not examine women or gender, and thus [the author] hopes this study will contribute to an appreciation of the significance of gender in the midst of change. Neither are there many sociological studies on MENA and Afghanistan or studies on women in MENA and Afghanistan from a sociological perspective. Myths and stereotypes abound regarding women, Islam, and the region, and the events of September 11 and since have only compounded them. This book is intended in part to "normalize" the Middle East by underscoring the salience of structural determinants other than religion. It focuses on the major social-change processes in the region to show how women's lives are shaped not only by "Islam" and "culture", but also by economic development, the state, class location, and the world system. Why the focus on women? It is [the author's] contention that middle-class women are consciously and unconsciously major agents of social change in the region, at the vanguard of movements for modernity, democratization and citizenship."
