The Cinema of Sara Gómez Dec 30 2019 Throughout the 1960s until her untimely death in 1974, Afro-Cuban filmmaker Sara Gómez engaged directly and courageously with the social, political, economic, and cultural transformations promised by the Cuban Revolution. Gómez directed numerous documentary films in 10 prolific years. She also made *De cierta manera* (One way or another), her only feature-length film. Her films navigate complex experiences of social class, race, and gender by reframing revolutionary citizenship, cultural memory, and political value. Not only have her inventive strategies become foundational to new Cuban cinema and feminist film culture, but they also continue to inspire media artists today who deal with issues of identity and difference. *The Cinema of Sara Gómez* assembles history, criticism, biography, methodology, and theory of Gómez's work in scholarly writing; interviews with friends and collaborators; the film script of *De cierta manera*; and a detailed and complete filmography. Featuring striking images, this anthology reorients how we tell Cuban cinema history and how we think about the intersections of race, gender, and revolution. By addressing Gómez's entire body of work, *The Cinema of Sara Gómez* unpacks her complex life and gives weight to her groundbreaking cinema.

Talent Management in Latin America Sep 06 2020 "In a period of about 20 years, Latin America (LATAM) moved from having highly unstable closed economies ruled by authoritarian regimes, to becoming more democratic, stable and open to investment and trade, attracting by 2020 close to 11% of world total foreign direct investment. In parallel, the region has seen the emergence of large multinational companies (so called multilatinas), which have become true global players. There is still relatively little knowledge about how to manage employees in these countries and there is a need for more research addressing people management problems. In comparison with other world regions, Human Resource Management research on Latin America remains scarce. Focusing on this region, this book seeks to offer a more up to date review of the main developments in HRM and talent management that have recently occurred in Latin America, paying attention to local cultural and institutional factors; illustrate examples of idiosyncratic problems or issues that require approaches to TM that differ significantly from those commonly established in current literature; and describe and reflect on the transfer of Talent Management policies from and to LATAM within the context of local and foreign multinational companies. **Talent Management in Latin America** updates main HRM topics in Latin America, with a local focus on culture and institutions. It shows the latest state of knowledge on the topic and will be of interest both to researchers, academics, and students in the fields of human resource management, critical management studies, and international business"--

Physical Education Initiatives for Early Childhood Learners Jun 15 2021 In early childhood education, children find in their own body and movement the main way to get in touch with the reality that surrounds them and, therefore, acquire knowledge about the environment in which they grow and develop. Undoubtedly, the progressive discovery of the body itself as a source of feelings and sensations, as well as exploring the different possibilities of action and bodily functions, constitutes necessary experiences on which children's thinking is built. Furthermore, the affective relationships established in psychomotor education situations, and particularly through play, are essential for the emotional development of children. **Physical Education Initiatives for Early Childhood Learners** offers globalized educational practices, didactic approaches, and proposals for intervention around motor development in the children ages 0-6 years. The book specifically explores laterality, coordination, relaxation, rhythm, etc. and how these are achieved through games, music, and motor stories. This book is ideal for early childhood educators, physical education teachers, administrators, daycares, preschools, early childhood learning centers, researchers, academicians, and

students interested in physical education's role in early child development.

John Wesley, Natural Man, and the 'Ism's' Nov 20 2021 Founder of the Methodist Church, is one of the world's greatest religious figures. A practical rather than systematic theologian, he wrote and preached for the common man. He is well known as a man of one book (the Bible) but he read like no other during his time. We are left with fourteen volumes of his works and eight each of his letters and journals. His brother became the troubadour of Methodism, writing countless hymns. John also took classic Christian works and edited them for the common man to read. And if this were not enough, he preached thousands of times both indoors and out. J. Robert Ewbank examines In what Wesley thought about other religions. Did he think all religions were from God and therefore there was little difference between them, or did he think that there is uniqueness in Christianity? Was he concerned about other philosophies and thoughts about religion popular in his day? What did he think about Natural Man, the Indians, the Deists, the Jews, the Roman Catholics, and the Mystics? Were they also fine with him, or did he discuss the differences between them, revealing where he found them wrong? Furthermore, what did Wesley think about the possibility of salvation for all those who held to these other positions? Did he find that it is possible for them to be saved by a loving God, or have they stepped outside of the bounds, therefore requiring extreme difficulty to be saved? "In a time of enormous stress on the entire human family as we try to understand, appreciate, and celebrate our diversity, J. Robert Ewbank has given us an excellent resource to help us deeply consider the issues and continue to affirm the core values and theology of the Christian movement." Rueben P. Job, author of Three Simple Rules.

The English Armada Oct 08 2020 During the year between July 1588, when the Spanish Armada set sail from Spain and July 1589, when the survivors of the English counterpart of this fleet, the little-known English Armada, reached port in England, two of history's worst naval catastrophes took place. A great deal of attention has been dedicated to the former and precious little to the latter. This book presents a full-scale account of an event which has been neglected for more than four centuries. It reconstructs the military operations day by day for the first time, taking apart the established notion that, with the defeat of the Spanish Armada, England achieved maritime supremacy and the decay of Spain began. This book clearly and in a rigorously documented fashion shows how the defeat of the English Armada counterbalanced that of the Spanish, frustrating England's intention of seizing Philip II's American empire and changing the tide of the war.

Learning to Improve Dec 22 2021 As a field, education has largely failed to learn from experience. Time after time, promising education reforms fall short of their goals and are abandoned as other promising ideas take their place. In Learning to Improve, the authors argue for a new approach. Rather than "implementing fast and learning slow," they believe educators should adopt a more rigorous approach to improvement that allows the field to "learn fast to implement well." Using ideas borrowed from improvement science, the authors show how a process of disciplined inquiry can be combined with the use of networks to identify, adapt, and successfully scale up promising interventions in education. Organized around six core principles, the book shows how "networked improvement communities" can bring together researchers and practitioners to accelerate learning in key areas of education. Examples include efforts to address the high rates of failure among students in community college remedial math courses and strategies for improving feedback to novice teachers. Learning to Improve offers a new paradigm for research and development in education that promises to be a powerful driver of improvement for the nation's schools and colleges.

Microbes at Work Jun 23 2019 Among the goals of environmentally sound waste treatment is the recycling of organic wastes. The most practiced options are composting and anaerobic digestion, both processes being carried out by microorganisms. This book provides an overview of the various ways microbes are doing their job and gives the reader an impression of their potential. The sixteen chapters of this book summarize the advantages and disadvantages of treatment processes, whether they are aerobic like composting or work without oxygen like anaerobic digestion for biogas (methane) production. These chapters show the potential of microorganisms to create valuable resources from otherwise wasted materials. These resources include profitable organic, humus-like soil conditioners or fertilizer components which are often suppressive to plant diseases. Composts may thus improve soil carbon sequestration, or support sustainable agriculture by reducing the need for mineral fertilizers or pesticides. If anaerobic digestion is used, the biogas produced may replace fossil fuels. Thus, proper biological waste treatment with the help of microorganisms should contribute to a reduction of anthropogenic greenhouse gas production.

Home Advantage in Sport Mar 01 2020 This is the first book exploring the concept of home advantage (HA), the well-known beneficial effect that players and teams derive from performing at home in all sports throughout the world. Despite the fact that the existence of HA dates back to the origins of organized sport in the late 19th century, its root causes and how they operate and interact with each other are still unclear and remain the topic of intense research involving many disciplines, all with the potential objective of improving team and individual performance. This book covers a broad review of HA divided into three different sections: (i) Section 1 focuses on the theory of HA in sport (the concept of this phenomenon, its quantification, and factors supposedly associated with the HA are explored; (ii) Section 2 analyses the effects of HA in sports related to both male and female athletes, in relation to tactics and strategies, fans, referees, travel, situational variables and the home disadvantage; and (iii) Section 3 studies the HA as it applies to specific sports worldwide such as outdoor sports (football, rugby, cricket, and Australian Football), indoor sports (basketball, futsal, handball, water polo and volleyball), US professional sports, individual sports,

racket sports, combat sports, minor sports, disabled sports and the Olympic Games. This book has been written in cooperation with top leading experts in this field worldwide.
