[The Rank and File of 19th Century Major League Baseball](#) Jan 27 2020 With this volume, David Nemec completes his remarkable trilogy of 19th-century baseball biographies, covering every major league player, manager, umpire, owner and league official. It provides in-depth information on many figures unknown to most historians. Each detailed entry includes vital statistics, peer-driven analysis of baseball-related skills, and an overview of the individual's role in the game. Also chronicled are players' first and last major league games, most important achievements, movements from team to team, and much more. By bringing attention to these overlooked baseball personalities, this reference work immeasurably enriches our knowledge of 19th century major league baseball.

[Missing Millie Benson](#) Mar 21 2022 Growing up in Ladora, Iowa, Mildred "Millie" Benson had ample time to develop her imagination and sense of adventure. While still a journalism graduate student at the University of Iowa, Millie began writing for the Stratemeyer Syndicate, which published the phenomenally popular Hardy Boys series, among others. Soon, Millie was tapped for a new series starring amateur sleuth Nancy Drew, a young, independent woman not unlike Millie herself. Under the pen name Carolyn Keene, Millie wrote the first book, *The Secret of the Old Clock*, and twenty-two other Nancy Drew Mystery Stories. In all, Millie wrote more than a hundred novels for young people. Millie was also a journalist for the Toledo Times and the Toledo Blade. At sixty-two, she obtained her pilot's license. Follow the clues throughout *Missing Millie* to discover the story of this ghostwriter, journalist, and adventurer.

The Spy and Counterspy file Oct 28 2022 "An exciting adventure in homicide and an inside picture of a fabulous scientific operation...The rocket-testing grounds of White Sands, New Mexico, are the setting for this Kelland thriller. The author was especially authorized by the Defense Department to explore the closely-guarded confines of White Sands. Thus, with all his accustomed skill and humor, he presents an inside story of fantastic happenings at this vital research center. The result is a fascinating glimpse behind the scenes of scientists and security and espionage. And, last but not least, a rocket-paced and colorful novel in the finest Kelland tradition." —Yesterday's Muse "The greatest mystery story of the year and a tantalizing spy story. ... Which of the two lovely women is the spy?" —Indianapolis News More pixilated dialogue, delightfully eccentric characters, and midcentury zeitgeist in bestselling romantic suspense author Clarence Budington Kelland's enthralling peek into the period's most top-secret program. The goings-on at the U.S. rocket testing grounds at White Sands, New Mexico, and the development of guided missiles, were some the nation's most closely guarded secrets—secrets the "Reds" would kill for. Dr. Thomas Alva Edison Gimp—one of Kelland's quintessential geek heroes—had been brought there as a leader in the development of the electronic brains needed to guide these missiles. His problems began on the train out, where he first encountered a very alluring and flirtatious woman, then a much-too-friendly professor of art history, and then—murder. His trip didn't get any easier when he arrived at White Sands and met Miss Brown, a woman from his own past, whose job seemed to be anything she wanted it to be and her taste in acquaintances was...questionable. And it all seemed to come to a climax when he met William George Thomas, a man of enormous girth and intellect, whose first encounter with Dr. Gimp may not have been as accidental as it seemed. "Gives the reader a peep through the barbed wire at White Sands Proving Ground. The government allowed the author to visit White Sands to pick up background for his book, and he incorporated a good deal of perfectly sound elementary information about missiles in it. There are also four murders, romance and plenty of the kind of excitement that would turn a security officer's hair white if it were ever actually to occur." —Sayre, PA Evening Times "[Kelland is] a writer of distinction." —The Detroit News

Tinkering Jun 12 2021 In the first decades after mass production, between 1913 and 1939, middle-class Americans not only bought cars but also enthusiastically redesigned them. By examining the ways Americans creatively adapted their automobiles, *Tinkering* takes a fresh look at automotive design from the bottom up, as a process that included manufacturers, engineers, advice experts, and consumers in various guises. Franz argues that automobile ownership opened new possibilities for ingenuity among consumers even as large corporations came to control innovation. Franz weaves together a variety of sources, from serial fiction to corporate documents, to explore tinkering as a form of authority in a culture that valued ingenuity. Women drivers represented one group of consumers who used tinkering to advance their claim to social autonomy. Some canny drivers moved beyond modifying their individual cars to become independent inventors, patenting and selling automotive accessories for the burgeoning national demand for aftermarket products. Earl S. Tupper was one such tinkerer who went on to invent Tupperware. These savvy tinkerers worked in a changing landscape of invention shaped increasingly by automotive giants. By the 1930s, Ford and General Motors worked to change the popular discourse of ingenuity and used the world's fairs of the Depression as a stage to promote a hierarchy of innovation. Franz not only demonstrates the entrepreneurial spirit of American consumers but she engages larger historical questions about gender, consumption and ingenuity while charting the impact corporate expansion on tinkering during the first half of the twentieth century.

Battle for Congress Dec 06 2020 Just in time for the coming election year, this book looks at the changing of the guard in 2006 and speculates on where the system may be heading in 2008. It provides an in-depth examination of the ways in which candidates, interest groups, and parties perceived their opportunities and allocated their campaign resources during the midterm elections. The role of money, which was influenced by campaign finance reform, is a special focus in this book. The theme of political scandal has frequently raised concerns that Republican leadership had become a "culture of corruption" that had flourished under their watch, which is also addressed in this book. The war in Iraq, however, may be the most important factor—not only in the 2006 battle for Congress, but for the 2008 battle for the White House as well.
