[Memoirs of Indonesian Doctors](#) Aug 21 2021 This is a book depicting the lives of twenty Chinese Indonesian doctors who left Indonesia to immigrate to the USA and to start a new chapter of their lives. Many of the stories started after they graduated from the Medical School. Some of them were placed in remote villages outside Java. Many of those villages had not been served by Physicians before. Support from the Central Government was scarce. At that time, the late President Sukarno declared that graduated from Medical schools had to serve the country for

three years before they were allowed to specialize or pursue their future plans. These doctors must complete the ECFMG, English and health tests before they could be considered for accredited for internship/residency. After successfully doing their training, they now could apply for a position as a specialist in a hospital or a medical center. Many times they had to be under the supervision of a hospital Director of Education for a period of 2 years. In the meantime, they had to take their Specialty Boards exam to be qualified. Many have successfully done their practice and some became well known in their fields. Their Children went to Colleges and Universities and have pursued careers in Medicine Law, Engineering and others.

My Life as an OB-GYN Mar 28 2022 For most women, a visit to the OB-GYN is a dreaded experience. It invokes images of sitting on an examination table in a flimsy, tissue paper gown, of staring nervously at the dreaded "stirrups," of feeling exposed, of being poked and prodded, and of being asked embarrassing questions about sex and reproduction. If it is a first visit, the patient will inevitably wonder: "What is my doctor really like? Is he cold and clinical or friendly and down to earth? How did he become a doctor? And why?" In a book that is as eye-opening as it is compelling, retired OB-GYN Douglas Edwin Heritage invites us to share the joy, humor, and tragedy of his 43-year career as a medical student, intern, resident, and physician in private practice. Through a series of short vignettes, Heritage leads us through experiences ranging from the unconventional pranks of medical school to the solemnity of pronouncing his first patient. He candidly brings to life the colorful and often bizarre encounters that define the unique medical subculture of obstetrics and gynecology. Stimulating, irreverent, and often droll, My Life as an OB-GYN will delight both practitioners and laymen alike.
