*Internet of Things, Smart Spaces, and Next Generation Networks and Systems* Oct 01 2022 This book constitutes the joint refereed proceedings of the 14th International Conference on Next Generation Wired/Wireless Advanced Networks and Systems, NEW2AN 2014, and the 7th Conference on Internet of Things and Smart Spaces, ruSMART 2014, held in St. Petersburg, Russia, in August 2014. The total of 67 papers was carefully reviewed and selected for inclusion in this book. The 15 papers selected from ruSMART are organized in topical sections named: smart spaces core technologies, smart spaces for geo-location and e-tourism apps, smart space supporting technologies, and video solutions for smart spaces. The 52 papers from NEW2AN deal with the following topics: advances in wireless networking, ad hoc networks and enhanced services, sensor- and machine-type communication, networking architectures and their modeling, traffic analysis and prediction, analytical methods for performance evaluation, materials for future communications, generation and analysis of signals, business aspects of networking, progress on upper layers

and implementations, modeling methods and tools, techniques, algorithms, and control problems, photonics and optics, and signals and their processing.

**Strategic Integrated Marketing Communications** Nov 29 2019 An essential book for today's marketer now that integrated marketing communications form a critical success factor in building strong brands and strong companies This new edition is still the only textbook on the market to deal with all aspects of IMC from a strategic perspective Corporate image, identity and reputation have never been more important and this book unlocks the key factors in achieving and enhancing this Integrated Marketing Communications is not just about utilizing different communication options in your marketing campaign; it is about planning in a systematic way to determine the most effective and consistent message for your target audience. As such, it depends upon identifying the best positioning, generating positive brand attitude, a consistent reinforcement of the brand's message through IMC channels, and ensuring that all marketing communication supports the company's overall identity, image, and reputation. This textbook is a roadmap to achieving this, thoroughly updated to reflect the dynamic changes in the area since the first edition was published. New to this edition: New sections on social media and how to integrate them into your marketing function New chapter on message development and an enhanced chapter on the IMC plan Robust pedagogy to help reinforce learning and memory Enhanced teaching materials online to help lecturers prepare their courses Brand new real-life case study vignettes

**Teaching Computational Thinking** Mar 02 2020 A guide for educators to incorporate computational thinking—a set of cognitive skills applied to problem solving—into a broad range of subjects. Computational thinking—a set of mental and cognitive tools applied to problem solving—is a fundamental skill that all of us (and not just computer scientists) draw on. Educators have found that computational thinking enhances learning across a range of subjects and reinforces students' abilities in reading, writing, and arithmetic. This book offers a guide for incorporating computational thinking into middle school and high school classrooms, presenting a series of activities, projects, and tasks that employ a range of pedagogical practices and cross a variety of content areas. As students problem solve, communicate, persevere, work as a team, and learn from mistakes, they develop a concrete understanding of the abstract principles used in computer science to create code and other digital artifacts. The book guides students and teachers to integrate computer programming with visual art and geometry, generating abstract expressionist-style images; construct topological graphs that represent the relationships between characters in such literary works as Harry Potter and the Sorcerer's Stone and Romeo and Juliet; apply Newtonian physics to the creation of computer games; and locate, analyze, and present empirical data relevant to social and political issues. Finally, the book lists a variety of classroom resources, including the programming languages Scratch (free to all) and Codesters (free to teachers). An accompanying website contains the executable programs used in the book's activities.

**Health and Wellness Measurement Approaches for Mobile Healthcare** Jun 28 2022 This book reviews existing sensor technologies that are now being coupled with computational intelligence for the remote monitoring of physical activity and ex vivo biosignatures. In today's frenetic world, consumers are becoming ever more demanding: they want to control every aspect of their lives and look for options specifically tailored to their individual needs. In many cases, suppliers are catering to these new demands; as a result, clothing, food, social media, fitness and banking services are all being democratized to the individual. Healthcare provision has finally caught up to this trend and is currently being rebooted to offer personalized solutions, while simultaneously creating a more effective, scalable and cost-effective system for all. The desire for personalisation, home monitoring and treatment, and provision of care in remote locations or in emerging and impoverished nations that lack a fixed infrastructure, is leading to the realisation that mobile technology might be the best candidate for achieving these goals. A combination of several technological, healthcare and financial factors are driving this trend to create a new healthcare model that stresses preventative 'health-care' rather than 'sick-care', and a shift from volume to value. Mobile healthcare (mhealth), which could also be termed the "internet of people", refers to the integration of sensors and smartphones to gather and interpret clinical data from patients in real-time. Most importantly, with an ageing population suffering multiple morbidities, mhealth could provide healthcare solutions to enhance chronically

**Seaside** Apr 14 2021 Awalnya, dia hanya gadis biasa. Juga mulai terbiasa menghadapi guncangan besar ketika ayahnya masuk penjara akibat ulah musuh-musuhnya. Tapi, begitu dibutakan oleh amarah, dia mulai mengumpulkan setiap informasi dan menyusun rencana balas dendam. Gadis itu membuat kesepakatan dengan iblis. Langkah penuh risiko dia lalui, dibantu oleh seseorang yang masih misterius. Satu demi satu targetnya berjatuh. Dan dia menikmati setiap tetes darah yang mengalir di tangannya. Apakah masih ada tempat untuk nurani? Apakah dia masih mampu memaafkan?

*Global ICT Industry and Market Report: 2013 Edition* Aug 31 2022 The rigid economic conditions in 2012 stemming from the European debt crisis, slow recovery of mature economies, and less expected growth in the emerging markets had caused government and enterprise sectors to cut down their spending and led to low consumer confidence. Improved broadband service quality and increased income per capita in emerging countries have made smart handheld devices and other consumer electronic devices the engine of growth for the ICT Industry. This report profiles the development of motherboard, notebook PC (including netbook), server, tablet, smartphone, large-, medium, and small LCD panels, LCD TV, and DSC (Digital Still Camera) in 2013 and examines their future trends beyond.
