The Future of China's Bond Market Jul 16 2021 China's bond market is destined to play an increasingly important role, both at home and abroad. And the inclusion of the country's bonds in global indexes will be a milestone for its financial market integration, bringing big opportunities as well as challenges for policymakers and investors alike. This calls for a good understanding of China's bond market structure, its unique characteristics, and areas where reforms are needed. This volume comprehensively analyzes the different segments of China's bond market, from sovereign, policy bank, and credit bonds, to the rapidly growing local government bond market. It also covers bond futures, green bonds, and asset-backed securities, as well as China's offshore market, which has played a major role in onshore market development.

Red Flags Oct 31 2022 A trusted economic commentator provides a penetrating account of the threats to China's continued economic rise Under President Xi Jinping, China has become a large and confident power both at home and abroad, but the country also faces serious challenges. In this critical take on China's future, economist George Magnus explores four key

traps that China must confront and overcome in order to thrive: debt, middle income, the Renminbi, and an aging population. Looking at the political direction President Xi Jinping is taking, Magnus argues that Xi's authoritarian and repressive philosophy is ultimately not compatible with the country's economic aspirations. Thorough and well researched, the book also investigates the potential for conflicts over trade, China's evolving relationship with Trump, and the country's attempt to win influence and control in Eurasia through the Belt and Road initiative.

China's Rise in the Global South Nov 19 2021 As China and the U.S. increasingly compete for power in key areas of U.S. influence, great power conflict looms. Yet few studies have looked to the Middle East and Africa, regions of major political, economic, and military importance for both China and the U.S., to theorize how China competes in a changing world system. *China's Rise in the Global South* examines China's behavior as a rising power in two key Global South regions, the Middle East and sub-Saharan Africa. Dawn C. Murphy, drawing on extensive fieldwork and hundreds of interviews, compares and analyzes thirty years of China's interactions with these regions across a range of functional areas: political, economic, foreign aid, and military. From the Belt and Road initiative to the founding of new cooperation forums and special envoys, *China's Rise in the Global South* offers an in-depth look at China's foreign policy approach to the countries it considers its partners in South-South cooperation. Intervening in the emerging debate between liberals and realists about China's future as a great power, Murphy contends that China is constructing an alternate international order to interact with these regions, and this book provides policymakers and scholars of international relations with the tools to analyze it.

China's Global Engagement Feb 20 2022 Assessing China's rapidly changing role on the international stage China is again

undergoing a period of significant transition. Internally, China's leaders are addressing challenges to the economy and other domestic issues after three decades of dramatic growth and reforms. President Xi Jinping and other leaders also are refashioning foreign policy to better fit what they see as China's place in the world. This has included a more proactive approach to trade and related international economic affairs, a more vigorous approach to security matters, and a more focused engagement on international cultural and educational affairs. In this volume, China specialists from around the world explore key issues raised by a changing China's interaction with a changing world. They chronicle China's emergence as a more capable actor whose engagement is reshaping international affairs in many dimensions. These include: global currency and trading systems; patterns of cooperation and competition in technological innovation; economic and political trends in the developing world; the American-led security order in the Asia-Pacific region; the practice of international military and humanitarian intervention; the use of naval power; the role of international law in persistent territorial and maritime disputes in the East and South China Seas; the international human rights regime; the circulation of Chinese talent trained abroad; a more globalized film industry; and programs to reshape global cultural awareness about China through educational initiatives. Across these diverse areas, China's capacity--and desire--to influence events and outcomes have risen markedly. The results so far are mixed, and the future trajectory remains uncertain. But across the wide range of issues addressed in this book, China has become a major and likely an enduring participant.

Chinese Politics and Foreign Policy under Xi Jinping Sep 17 2021 This book focuses on China's future under Xi Jinping's authoritarian leadership by examining various facets of the political, economic, social and foreign policy trajectories of

contemporary China. It assesses Xi Jinping's power dynamic as the 'core' leader of the Communist Party of China (CPC) and analyses the impact of Xi's signature domestic policies which demonstrate his political authority within the domestic sphere. Moreover, the book presents Xi's pro-active, assertive and action-oriented outlook as a foundation for China's diplomacy in the 'new era'. Bringing together an international set of experts in the field who explore critical facets of China under Xi Jinping that deeply influence the regional as well as the global order, the book investigates the impact of Chinese initiatives such as the grand Belt and Road Initiative (BRI), the Asian Infrastructure Investment Bank (AIIB) and the BRICS New Development Bank (NDB). Importantly, the book illustrates US-China relations and outlines how this relationship will intensify in the post-COVID-19 era, which is poised to be one of the biggest challenges and turning points of the 'Asian Century'. Offering a timely insight into China's future and the trajectory of Xi Jinping's consolidation of power, this book will be of interest to academics in the fields of China Studies, Asian and International Politics and International Relations.

Social Economy in China and the World Oct 07 2020 Thirty-years of economic transformation has turned China into one of the major players in the global capitalist economy. However, its economic growth has generated rising problems in inequality, alienation, and sustainability with the agrarian crises of the 1990s giving rise to real social outcry to the extent that they became the object of central government policy reformulations. Contributing to a paradigm-shift in the theory and practices of economic development, this book examines the concept of social economy in China and around the world. It offers to rethink space, economy and community in a trans-border context which moves us beyond both planned and market economies. The chapters address theoretical issues, critical reflections and case studies on the practice of social economy in the context of globalization and

its attempt to create an alternative modernity. Through this, the book builds a platform for further cross-disciplinary and cross-boundary dialogue on the future of social economy in China and the world. With examples from Asia, North America, Latin America and Europe this book will not only appeal to students and scholars of Chinese and Asian social policy and development, but also those of social economy from an international perspective.

The Contentious Public Sphere Aug 24 2019 Using interviews, newspaper articles, online texts, official documents, and national surveys, Lei shows that the development of the public sphere in China has provided an unprecedented forum for citizens to organize, influence the public agenda, and demand accountability from the government.

The Long Game Sep 29 2022 For more than a century, no US adversary or coalition of adversaries - not Nazi Germany, Imperial Japan, or the Soviet Union - has ever reached sixty percent of US GDP. China is the sole exception, and it is fast emerging into a global superpower that could rival, if not eclipse, the United States. What does China want, does it have a grand strategy to achieve it, and what should the United States do about it? In *The Long Game*, Rush Doshi draws from a rich base of Chinese primary sources, including decades worth of party documents, leaked materials, memoirs by party leaders, and a careful analysis of China's conduct to provide a history of China's grand strategy since the end of the Cold War. Taking readers behind the Party's closed doors, he uncovers Beijing's long, methodical game to displace America from its hegemonic position in both the East Asia regional and global orders through three sequential "strategies of displacement." Beginning in the 1980s, China focused for two decades on "hiding capabilities and biding time." After the 2008 Global Financial Crisis, it became more assertive regionally, following a policy of "actively accomplishing something." Finally, in the aftermath populist elections of 2016,

China shifted to an even more aggressive strategy for undermining US hegemony, adopting the phrase "great changes unseen in century." After charting how China's long game has evolved, Doshi offers a comprehensive yet asymmetric plan for an effective US response. Ironically, his proposed approach takes a page from Beijing's own strategic playbook to undermine China's ambitions and strengthen American order without competing dollar-for-dollar, ship-for-ship, or loan-for-loan.

Law and the Party in Xi Jinping's China Sep 25 2019 Provides an in-depth study of the ideological and organisational features of China's legal system, as it is embedded in the Party-state.

Before and Beyond Divergence Jan 22 2022 China has reemerged as a powerhouse in the global economy, reviving a classic question in economic history: why did sustained economic growth arise in Europe rather than in China? Many favor cultural and environmental explanations of the nineteenth-century economic divergence between Europe and the rest of the world. This book, the product of over twenty years of research, takes a sharply different tack. It argues that political differences which crystallized well before 1800 were responsible both for China's early and more recent prosperity and for Europe's difficulties after the fall of the Roman Empire and during early industrialization. Rosenthal and Wong show that relative prices matter to how economies evolve; institutions can have a large effect on relative prices; and the spatial scale of politics can affect the choices of institutions in the long run. Their historical perspective on institutional change has surprising implications for understanding modern transformations in China and Europe and for future expectations. It also yields insights in comparative economic history, essential to any larger social science account of modern world history.

Media at Work in China and India Apr 12 2021 Anyone who visits India or China will puzzle over their vast media systems. Though they exercise immense influence, the world knows very

little about the media landscape in the two countries. The world's two most populous countries, comprising close to 40 per cent of the global population, have disputed boundaries and the legacy of the 1962 war. Mass media in both countries plays a pivotal role in domestic politics and is capable of telling provocative nationalist stories. This book helps readers to understand the complexities of media in India and China, and their similarities and differences. It introduces the two media systems, the people who work in them, the work they produce and the pressures that influence their work. It analyses how economic forces drive media, how newsrooms work and how governments in each country manage the coverage of disasters. Media at Work in China and India fosters greater reflection, curiosity and, perhaps, even wisdom, about fast-changing media in these 21st century powerhouses.

Power and Restraint in China's Rise Jun 14 2021 Conventional wisdom holds that China's rise is disrupting the global balance of power in unpredictable ways. However, China has often deferred to the consensus of smaller neighboring countries on regional security rather than running roughshod over them. Why and when does China exercise restraint—and how does this aspect of Chinese statecraft challenge the assumptions of international relations theory? In *Power and Restraint in China's Rise*, Chin-Hao Huang argues that a rising power's aspirations for acceptance provide a key rationale for refraining from coercive measures. He analyzes Chinese foreign policy conduct in the South China Sea, showing how complying with regional norms and accepting constraints improves external perceptions of China and advances other states' recognition of China as a legitimate power. Huang details how member states of the Association of Southeast Asian Nations have taken a collective approach to defusing tension in maritime disputes, incentivizing China to support regional security initiatives that it had previously resisted. Drawing on this empirical analysis, Huang develops new theoretical perspectives on why great powers eschew coercion in

favor of restraint when they seek legitimacy. His framework explains why a dominant state with rising ambitions takes the views and interests of small states into account, as well as how collective action can induce change in a major power's behavior. Offering new insight into the causes and consequences of change in recent Chinese foreign policy, this book has significant implications for the future of engagement with China.

Chinese Politics in the Xi Jinping Era Jan 10 2021 Chinese politics are at a crossroads as President Xi Jinping amasses personal power and tests the constraints of collective leadership. In the years since he became general secretary of the Chinese Communist Party in 2012, Xi Jinping has surprised many people in China and around the world with his bold anti-corruption campaign and his aggressive consolidation of power. Given these new developments, we must rethink how we analyze Chinese politics—an urgent task as China now has more influence on the global economy and regional security than at any other time in modern history. *Chinese Politics in the Xi Jinping Era* examines how the structure and dynamics of party leadership have evolved since the late 1990s and argues that "inner-party democracy"—the concept of collective leadership that emphasizes deal making based on accepted rules and norms—may pave the way for greater transformation within China's political system. Xi's legacy will largely depend on whether he encourages or obstructs this trend of political institutionalization in the governance of the world's most populous and increasingly pluralistic country. Cheng Li also addresses the recruitment and composition of the political elite, a central concern in Chinese politics. China analysts will benefit from the meticulously detailed biographical information of the 376 members of the 18th Central Committee, including tables and charts detailing their family background, education, occupation, career patterns, and mentor-patron ties.

Urban China Aug 05 2020 Currently there are more than 125

Chinese cities with a population exceeding one million. The unprecedented urban growth in China presents a crucial development for studies on globalization and urban transformation. This concise and engaging book examines the past trajectories, present conditions, and future prospects of Chinese urbanization, by investigating five key themes - governance, migration, landscape, inequality, and cultural economy. Based on a comprehensive evaluation of the literature and original research materials, Ren offers a critical account of the Chinese urban condition after the first decade of the twenty-first century. She argues that the urban-rural dichotomy that was artificially constructed under socialism is no longer a meaningful lens for analyses and that Chinese cities have become strategic sites for reassembling citizenship rights for both urban residents and rural migrants. The book is essential reading for students and scholars of urban and development studies with a focus on China, and all interested in understanding the relationship between state, capitalism, and urbanization in the global context.

China's Media in the Emerging World Order Aug 17 2021

China is challenging the mighty behemoths, Google and Facebook, and creating alternative New Media. 750 million people are active on its Social Mediascape and there are a billion mobile phones deploying the innovative apps with which the Chinese conduct their lives. Though late starters, already four of the world's leading New Media companies are Chinese. China's old media - television, newspapers, radio - challenge the established powers which were long thought unassailable, such as CNN and BBC. Produced in many languages on every continent, they are re-defining the agenda and telling the story in China's way, with not just news and documentary series but also entertainment. The world's biggest manufacturer of TV drama is now making its stories for export. China's Media tells you why and how. It investigates the Chinese media, their strengths and weaknesses and how they are different. from the West. This

detailed and comprehensive guide aims to showcase their immense variety and diversity, and demonstrates how they came to be a powerful new force in the media world.

Food in China Dec 09 2020 This volume is a study of Chinese food from a cultural and historical perspective. Its focus is on traditional China before establishment of the People's Republic. It identifies and provides comprehensive information on a broad range of Chinese food plants and animals for general readers, as well as for specialists whose interests have led them to questions relating to the food of China. Readers will find discussions regarding origins, how things came to be, time and place of food-plant and animal domestication, the spread of plants and animals from and to China, and other historical questions regarding the foods used by the Chinese people. The book is written with Canton and the southeast as points of departure, but embraces all of China and is directed towards people unfamiliar with China.

Technology, Politics, And Society In China Feb 08 2021 This study is the first to summarize the major technological policies implemented in China since 1949 and to place them in their social and historical context. Dr. Volti looks at technological change in China as part of a broader process of economic, political, cultural, and organizational change, focusing primarily on four key areas—agriculture, energy, ground transportation, and medicine and public health. He emphasizes how technological change has been shaped by political and ideological structures, notes how China's unique cultural heritage has affected adoption of technologies developed outside China, and assesses China's success in developing technologies appropriate to its specific needs as an economically and politically developing nation. He draws on interviews with technicians engaged in the transfer of technology to China as well as extensive primary source materials.

World Report 2021 Jul 24 2019 The best country-by-country assessment of human rights. The human rights records of more

than ninety countries and territories are put into perspective in Human Rights Watch's signature yearly report. Reflecting extensive investigative work undertaken by Human Rights Watch staff, in close partnership with domestic human rights activists, the annual World Report is an invaluable resource for journalists, diplomats, and citizens, and is a must-read for anyone interested in the fight to protect human rights in every corner of the globe.

Early Ch'an in China and Tibet Jun 02 2020 Ch'an (Zen) Buddhism was popularized in the West by writers such as D.T. Suzuki and Alan Watts as a kind of romantic abstraction outside of history. The papers in this volume, originally presented as a unique conference sponsored by UC-Berkeley and the San Francisco Zen Center, go a long way towards revealing the complex historical development of Ch'an theory and practice both in China and Tibet. The papers on China reveal Ch'an not as a single line of transmission from Bodhidharma, but as a complex of contending and even hostile factions. Furthermore, the view that sees Ch'an as the sinicization of Buddhism through Taoism is questioned through an examination of the Taoism that was actually prevalent during the establishment of Ch'an in China. The papers on Tibet take us to the heart of the controversies surrounding the origins of Buddhism in that country, based on exciting research into the Tunhuang materials, the indigenous rDzogs-chen system, and the Sudden vs. Gradual Enlightenment controversy. Of particular note in this volume is the inclusion of several translations of papers by noted Japanese scholars who have led the way in this type of research, made available to the Western reader for the first time.

Public Finance in China Mar 12 2021 Since 1980, China's economy has been the envy of the world. Its annual growth rate of more than 9 percent during this period makes China today the world's fourth-largest economy. And this sustained growth has reduced the poverty rate from 60 percent of the population to less than 10 percent. However, such rapid growth has also increased

inequalities in income and access to basic services and stressed natural resources. The government seeks to resolve these and other issues by creating a 'harmonious society' -- shifting priorities from the overriding pursuit of growth to more balanced economic and social development. This volume compiles analyses and insights from high-level Chinese policy makers and prominent international scholars that address the changes needed in public finance for success in the government's new endeavor. It examines such key policy issues as public finance and the changing role of the state; fiscal reform and revenue and expenditure assignments; intergovernmental relations and fiscal transfers; and financing and delivery of basic public goods such as compulsory education, innovation, public health, and social protection. And it offers concrete recommendations for immediate policy changes and for China's future reform agenda. *Public Finance in China* is a must-read for specialists in public finance and for those seeking an understanding of the complex and daunting challenges China is facing.

China's Offensive in Europe Apr 24 2022 A portrait of China's new economic passion toward Europe. For years China's international investment interests focused on a search for natural resources in Africa, Asia, and Latin America. Recently China's focus has shifted to Europe as well as the United States, and to new fields as diverse as real estate, energy, hospitality, transportation, and heavy industry. Chinese foreign investment is expected to grow throughout Europe in the years to come. For instance, the financial crisis centered in Greece and the fall of the euro have helped China and some of its corporations create a new partnership within the European Union, working to expand the country's power through finance and infrastructure. *China's Offensive in Europe* studies the trends, sectors, and target countries of Chinese investments in Europe. It looks at cases of outbound investment trajectories and journeys by some key Chinese private and state-owned companies. It also takes a look

at European perceptions of China, a country with a very different history and very different traditions from the Western world. Philippe Le Corre and Alain Sepulchre examine how China's presence in Europe can serve as a benchmark to other developed economies—especially the United States, which is also seeing a rise in Chinese investments.

China's Influence and the Center-periphery Tug of War in Hong Kong, Taiwan and Indo-Pacific Jul 04 2020 Bringing together a team of cutting-edge researchers based in Hong Kong, Taiwan and Indo-Pacific countries, this book focuses on the tug of war between China's influence and forces of resistance in Hong Kong, Taiwan and selected countries in its surrounding jurisdictions. China's influence has met growing defiance from citizens in Hong Kong and Taiwan who fear the extinction of their valued local identities. However, the book shows that resistance to China's influence is a global phenomenon, varying in motivation and intensity from region to region and country to country depending on the forms of China's influence and the balances of forces in each society. The book also advances a concentric center-periphery framework for comparing different forms of extra-jurisdictional Chinese influence mechanisms, ranging from economic, military and diplomatic influences to united front operations. This book will be of key interest to scholars and students of comparative politics, international relations, geopolitics, Chinese politics, Hong Kong-China relations, Taiwan and Asian politics.

Contemporary China Mar 31 2020 The third edition of this concise core textbook offers students a comprehensive introduction to the politics, economy, culture and society of modern China, while grounding all of these areas in the context of China's recent history in the 19th and 20th centuries. Fully up to date, this accessible text examines the key developments that are taking place in China and that are shaping its place in the world today, from relations with Trump's United States and post-Brexit

Britain, to the use of the internet to crack down on dissent and the establishment of 'Xi Jinping thought' at the 19th Party Congress. Authored by a highly-regarded expert on the topic, this is the essential guide to a country that is no longer just emerging but one which has, in many respects, already emerged as one of the leading powers of the 21st century. The book is an ideal introductory text for undergraduate and postgraduate courses on China studies and contemporary China, regardless of whether students approach the topic from a political, historical, sociological, cultural or geographical viewpoint. It can also be used on modules focussing more specifically on Chinese politics, Chinese history or Chinese society. New to this Edition: - Fully revised and updated throughout, including discussions of Chinese-US relations in the era of Trump, the 2017 19th National Congress of the Communist Party of China, and descriptions of the newest high-ranking figures in Chinese politics - New boxed features highlighting important issues and organisations, including the status of women in China, the telecoms company Huawei, and the on-going conflict over the South and East China Sea - References to the most recent research in the field, along with new recommendations for further reading for each chapter

Obama and China's Rise Oct 26 2019 "Detailed evaluation from an insider of the Obama administration's efforts, between 2009 and spring 2011, to develop a stable relationship with China while countering China's rise by reinforcing and initiating relationships with other nations in the region"--Provided by the publisher.

Weathering the Storm in China and India Sep 05 2020 China and India have in recent years seen a change in leadership, with each wanting to make an impact on their respective societies by bringing about significant changes in governance. This book looks at the impact of major institutional disruptions on large-, medium- and small-sized enterprises in China and India. The book endeavours to systematically assess the impact of major institutional policy changes that seek to transform and overhaul

the status quo at institutional, social and business levels. It also provides a holistic understanding of the impact of a major and turbulent policy shift on Asia's two giant economies. This book is a must-read for those interested in gaining insights into the two dominant powers in Asia.

Under Beijing's Shadow Nov 07 2020 China's rise and stepped-up involvement in Southeast Asia have prompted a blend of anticipation and unease among its smaller neighbors. The stunning growth of China has yanked up the region's economies, but its militarization of the South China Sea and dam building on the Mekong River has nations wary about Beijing's outsized ambitions. Southeast Asians long felt relatively secure, relying on the United States as a security hedge, but that confidence began to slip after the Trump administration launched a trade war with China and questioned the usefulness of traditional alliances. This compelling book provides a snapshot of ten countries in Southeast Asia by exploring their diverse experiences with China and how this impacts their perceptions of Beijing's actions and its long-term political, economic, military, and "soft power" goals in the region.

Governing the Urban in China and India Jul 28 2022 What is urban about urban China and India? -- Land grabs and protests from Wukan to Singur -- Urban redevelopment in Guangzhou and Mumbai -- Airpocalypse in Beijing and Delhi -- Territorial and associational politics in historical perspective.

China's Healthcare System and Reform May 14 2021 This volume provides a comprehensive review of China's healthcare system and policy reforms in the context of the global economy. Following a value-chain framework, the 16 chapters cover the payers, the providers, and the producers (manufacturers) in China's system. It also provides a detailed analysis of the historical development of China's healthcare system, the current state of its broad reforms, and the uneasy balance between China's market-driven approach and governmental regulation.

Most importantly, it devotes considerable attention to the major problems confronting China, including chronic illness, public health, and long-term care and economic security for the elderly. Burns and Liu have assembled the latest research from leading health economists and political scientists, as well as senior public health officials and corporate executives, making this book an essential read for industry professionals, policymakers, researchers, and students studying comparative health systems across the world.

The Changing Legal Orders in Hong Kong and Mainland China: Essays on “One Country, Two Systems” Dec 29 2019 This collection of selected works by Professor Albert H.Y. Chen shows the contours of the author’s scholarship as it developed over 35 years of his academic career, from 1984 to the present. The essays are divided into three sections which cover the three major domains of Professor Chen’s research. Part I covers the legal developments and controversies of “One Country, Two Systems” since the Hong Kong interpretation on “the right of abode” in 1999 to the anti-extradition movement of 2019. Part II shifts to focus on tradition and modernity in Chinese Law, including China’s Confucian and Legalist traditions and how the socialist legal system in China evolved and modernized in the era of “reform and opening”. Part III examines the transplantation of Western thinking and constitutionalism to East Asia in modern times and discusses the achievements and failures of these efforts. In conjunction with an introductory chapter that sets out the basic orientation and paradigm of these legal and constitutional studies and an epilogue that reflects on the main themes, this collection exemplifies the author’s important contributions to the field and provides insight into how the legal orders in Hong Kong and mainland China have changed over the course of Professor Chen’s academic career.

War and State Formation in Ancient China and Early Modern Europe Jun 22 2019 The Eurocentric conventional wisdom holds

that the West is unique in having a multi-state system in international relations and liberal democracy in state-society relations. At the same time, the Sinocentric perspective believes that China is destined to have authoritarian rule under a unified empire. In fact, China in the Spring and Autumn and Warring States periods (656–221 BC) was once a system of sovereign territorial states similar to Europe in the early modern period. Both cases witnessed the prevalence of war, formation of alliances, development of the centralized bureaucracy, emergence of citizenship rights, and expansion of international trade. This book, first published in 2005, examines why China and Europe shared similar processes but experienced opposite outcomes. This historical comparison of China and Europe challenges the presumption that Europe was destined to enjoy checks and balances while China was preordained to suffer under a coercive universal status.

China's Economic Statecraft: Co-optation, Cooperation And Coercion Feb 29 2020 This book aims to study China's economic statecraft in the contemporary era in a comprehensive manner. It attempts to explore China's approaches to using its economic, trade, investment, and financial power for the pursuit of its political, security, and strategic interests at the regional and global levels. The volume addresses three major issue areas in particular. The first issue pertains to how Beijing has used its economic clout to protect what it perceives as its "core interests" in its external relations. Three cases are included: the Taiwan issue, human rights, and territorial dispute in the South China Sea. The second major area of inquiry focuses on how China has employed its economic power in its key bilateral relations, including relations with Japan, North Korea, the United States, and other states in the East Asian region. The third issue concerns China's economic statecraft in the global context. It addresses the impacts of China's economic power and policy on the transformation of the global financial structure, developments

in Africa, the international intellectual property rights regime, and China's food security relations with the outside world.

Economic Reform in China and India Jun 26 2022 The authors (professors of economics at the U. of Queensland, Australia) offer a comparative analysis of the developmental experiences of China and India, applying quantitative analysis to investigation of economic, social, political, and environmental aspects of the countries' development from the 1950s forward. After comparing the initial conditi

Tea War Oct 19 2021 A history of capitalism in nineteenth- and twentieth-century China and India exploring the competition between their tea industries Tea remains the world's most popular commercial drink today, and at the turn of the twentieth century, it represented the largest export industry of both China and colonial India. In analyzing the global competition between Chinese and Indian tea, Andrew B. Liu challenges past economic histories premised on the technical "divergence" between the West and the Rest, arguing instead that seemingly traditional technologies and practices were central to modern capital accumulation across Asia. He shows how competitive pressures compelled Chinese merchants to adopt abstract, industrial conceptions of time, while colonial planters in India pushed for labor indenture laws to support factory-style tea plantations. Further, characterizations of China and India as premodern backwaters, he explains, were themselves the historical result of new notions of political economy adopted by Chinese and Indian nationalists, who discovered that these abstract ideas corresponded to concrete social changes in their local surroundings. Together, these stories point toward a more flexible and globally oriented conceptualization of the history of capitalism in China and India.

China's Grand Strategy May 26 2022 To explore what extended competition between the United States and China might entail out to 2050, the authors of this report identified and

characterized China's grand strategy, analyzed its component national strategies (diplomacy, economics, science and technology, and military affairs), and assessed how successful China might be at implementing these over the next three decades.

Land Reform in China and North Vietnam Mar 24 2022 This first book to consider land reform in both countries show that reform, as the Communists have conducted it, can be justified in China and North Vietnam for both economic reasons and ideological imperatives. Moise argues that the violence associated with land reform was as much a function of the social inequities that preceded reform as it was of the reform policy itself and explains the difficulties the Communist leaders encountered in developing a successful program. Capitalism from Below Jan 28 2020 Over 630 million Chinese escaped poverty since the 1980s, the largest decrease in poverty in history. Studying 700 manufacturing firms in the Yangzi region, the authors argue that the engine of China's economic miracle—private enterprise—did not originate at the top but bubbled up from below, overcoming initial obstacles set up by the government.

America, China, and the Struggle for World Order Nov 27 2019 This book brings together twelve scholars--six Americans and six Chinese--to explore the ways America and China think about international order. What are the traditions, historical experiences, and ideologies that each country brings to debates about how the rules and institutions of the global system should be organized? The book addresses this question by pairing

American and Chinese scholars in each chapter on specific topics related to global order: sovereignty, collective security, resources and the environment, trade, alliances, and monetary and financial relations. The book offers a vivid portrait of how the two countries come to global affairs from richly diverse and divergent starting points, and, in turn, how these factors affect current global dialogues.

China and Sustainable Development in Latin America May 02 2020 During Latin America's China-led commodity boom, governments turned a blind eye to the inherent flaws in the region's economic policy. Now that the commodity boom is coming to an end, those flaws cannot be ignored. High on the list of shortcomings is the fact that Latin American governments--and Chinese investors--largely fell short of mitigating the social and environmental impacts of commodity-led growth. The recent commodity boom exacerbated pressure on the region's waterways and forests, accentuating threats to human health, biodiversity, global climate change and local livelihoods. China and Sustainable Development in Latin America documents the social and environmental impact of the China-led commodity boom in the region. It also highlights important areas of innovation, like Chile's solar energy sector, in which governments, communities and investors worked together to harness the commodity boom for the benefit of the people and the planet.

Learning from SARS Dec 21 2021 The emergence of severe acute respiratory syndrome (SARS) in late 2002 and 2003 challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it had reached more than 25 other countries within a matter of months. In addition to the number of patients infected with the SARS virus, the disease had profound economic and political repercussions in many of the affected regions. Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert

for any indications of possible new outbreaks. This report examines the response to SARS by public health systems in individual countries, the biology of the SARS coronavirus and related coronaviruses in animals, the economic and political fallout of the SARS epidemic, quarantine law and other public health measures that apply to combating infectious diseases, and the role of international organizations and scientific cooperation in halting the spread of SARS. The report provides an illuminating survey of findings from the epidemic, along with an assessment of what might be needed in order to contain any future outbreaks of SARS or other emerging infections.
