Trading the Measured Move Dec 13 2020 A timely guide to profiting in markets dominated by high frequency trading and other computer driven strategies Strategies employing complex computer algorithms, and often utilizing high frequency trading tactics, have placed individual traders at a significant disadvantage in today's financial markets. It's been estimated that high-frequency traders—one form of computerized trading—accounts for more than half of each day's total equity market trades. In this environment, individual traders need to learn new techniques that can help them navigate modern markets and avoid being whipsawed by larger, institutional players. Trading the Measured Move offers a blueprint for profiting from the price waves created by computer-driven algorithmic and high-frequency trading strategies. The core of author David Halsey's approach is a novel application of Fibonacci retracements, which he uses to set price targets and low-risk entry points. When properly applied, it allows traders to gauge market sentiment, recognize institutional participation at specific support and resistance levels, and differentiate between short-term and long-term trades at various price points in the market. Provides guidance for individual traders who fear they can't compete in today's high-frequency dominated markets Outlines specific trade set ups, including opening gap strategies, breakouts and failed breakout strategies, range trading strategies, and pivot trading strategies Reveals how to escape institutional strategies designed to profit from slower-moving market participants Engaging and informative, Trading the Measured Move will provide you with a new perspective, and new strategies, to successfully navigate today's computer driven financial markets

How to Actually Day Trade for a Living Oct 23 2021 ?????????????? Here's a Secret Other Authors Won't Tell You... ?????????????? Day Trading is Hard and Most Day Trading "Educators" Don't Actually Day Trade! You heard that right! They don't make their money from stocks, but from the chatroom memberships, video courses, and monthly subscriptions they sell to you! Before we get started, let me first go over what I don't include in this book... • I have no "day trading" chatroom which charges your credit card each month for a service you'll never use. • I have no monthly website subscription service for "more advanced strategies" that are needed to get started, but not included in the book. • I have no Lamborghini I rented to put behind me in a video, or fake money on a table in front of me. What I do have is a book that will teach you how the day trading industry actually works, my own wisdom from being in the stock market for almost a decade, and strategies you can use to actually start day trading. Here's What You'll Learn In This Book: ?????????????? • Chapter 1: The Industry - In the first part of the book, I peel

back the curtain and go over the actual day trading industry with you. I show you how so called "pro" traders are able to fake charts, statistics, and trades to make it appear like they actually make money day trading, when they really don't. I then go over the tactics they use to scam traders, and even a website which exposes all the fake educators. • Chapter 2: Terminology - Here we go over all the terms you'll need to know as we progress to through the book. Volume, chart types, indicators, order types... it's all covered! • Chapters 3 + 4: Pre-Trading Basics - In these chapters, I go over the basics of day trading. This includes what software and broker to use, finding mentors who you can refer to for help, and what the typical day in the life of a day trader looks like. I then show you how to set up your trading screen, what time frame to use, and the most beneficial types of stocks to trade. • Chapter 5: Day Trading Strategies - This is the heart of the book, and where I spend the most time. In this section, I give you 8 different strategies you can immediately start using to day trade. I include detailed explanations, charts, and examples so you know exactly how to implement the strategies I go over. • Chapter 6: Additional Advice - In the last part of the book, I give you my final bits of advice. This includes how to increase the probability of your trades, using a practice account, and more bits of wisdom I have learned over the years. I must admit to you, day trading is not easy and there is no guarantee of actually making it. However I feel this book gives you the best chance of actually getting started, as well providing a big picture of the day trading industry. If you've been on the fence about day trading, now is your chance to finally learn what it's all about! As a complimentary bonus, only for book buyers, you'll receive my special report titled Crush the Market! Forex Trading Sep 09 2020 Do you want to learn how to trade in the Forex market? Do you want to understand the secrets and the strategies to become a successful Forex trader? If yes, then keep reading... The Forex market is a complex world, and everyone is trying to look for the goose that lays the golden egg. In this case, we are talking about that one trade that will simply propel someone to new heights. People imagine that getting into the Forex market is easy, that pretty soon they will be diving into cash the way Scrooge McDuck takes a joyful dive into his pile of gold coins. That rarely happens. But the prospect of making some incredible profits still exists, provided you are ready to navigate the complexities of the Forex market. In fact, here is something you should know. This is a real market. It is the largest financial market in the world, and you have to treat it as such. You can trade in this market part-time, or you can do it every day. In fact, you can make it your business-the business of trading. People have actually quit their day jobs to get into the world of Forex trading. However, that is something that you should not even consider if you are starting out. Do not make rash decisions in the hope that you are going to master the markets and strike rich in no time. Those are wonderful ambitions but are not backed by experience. You see, trading can be learned, of course, but the experience can't be transmitted. It has to be constructed by every individual through a personal effort of understanding and hard work. Another thing that is important to understand is that you will never ever stop learning. Markets are changing every day, and the Forex is a living organism that evolves in the same way as all its traders. Always remember that although it seems to be an unknown entity, at the end of the day, the market is merely made up of investors, large and small, from all corners of the world, each with his or her own emotions, psychology, and predictable behaviors and reactions. Do you ever walk up to a doctor and ask him or her if there is a shortcut to reaching where he or she has reached? Would you do that to an engineer or a renowned sportsperson? These people have developed their skills over time. They have honed their abilities as much as possible before they could use them fluently. It is the same with trading in the Forex market. You need to put in effort to learn the tricks of the trade (no pun intended). Learn to move on after losses. Don't dwell on missed trades or lost revenue after you decide to close. There will be hundreds of opportunities in the future. Follow your plan, and follow your system. Practice every day, and experience will come with time, patience, and discipline. Don't look outside for what's already inside. Leave your ego behind. Be humble and smart. You can't decide where the market will go, so learn to see where it wants to lead you, not the other way around. Exit bad trades, and hold on to good trades. Set yourself a goal and stop trading when you have reached it.

This book covers the following topics: Introduction to the Forex Market Forex Terminology Defining Forex Trading Benefits of Forex Trading The Principle Currencies Explained The Rules and The Players ...And much more Do you want to learn more? Don't wait anymore, press the buy now button and get started.

How to Day Trade for a Living Sep 02 2022 Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In *How to Day Trade for a Living*, I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. This book is definitely NOT a difficult, technical, hard to understand, complicated and complex guide to the stock market. It's concise. It's practical. It's written for everyone. You can learn how to beat Wall Street at its own game. And, as a purchaser of my book, you will also receive a membership in my community of day traders at www.vancouver-traders.com. You can monitor my screen in real time, watch me trade the strategies explained in his book, and ask questions of me and other traders in our private chat room. I invite you to join me in the world of day trading. I'm a real person who you can connect with. I'm not just a photograph here on the Amazon site. I love what I do. You can follow my blog post under Author Updates on my Author page on Amazon. It's honest. You'll see I lose some days. You can read the reviews of my book. I know you will learn much about day trading and the stock market from studying my book. You can join at no cost and with no obligation my community of day traders at www.vancouver-traders.com. You can ask us questions. Practical, hands-on knowledge. That's *How to Day Trade for a Living*.

The Lifecycle Trade Oct 11 2020 The Lifecycle Trade provides unique insight into the behavior of Super Growth Stocks starting with their initial public offerings (IPOs). Using extensive proprietary research, this practical guide contains never-before-published findings that provide revelatory statistics that can help you learn how to find big, winning stocks early. Full color charts and graphics for easy reference. "Which of the following statements are true? 1. 20% of IPOs gain 100% or more within their first year. 2. Over 90% of IPOs eventually trade below their

first day low. They are both true! IPOs provide great opportunities, but they are also replete with severe drawdowns that can leave traders with net losses, even for those stocks that are eventual big winners. This succinct volume dispels some of the misconceptions about IPOs and should serve as a useful aid in navigating the treacherous waters of IPO trading and in formulating your own trading plan for these unique stocks." -Jack Schwager, Market Wizards, The New Market Wizards, Stock Market Wizards, Hedge Fund Market Wizards, The Little Book of Market Wizards, Market Sense and Nonsense, Schwager on Futures, Getting Started in Technical Analysis, Complete Guide to Mastering the Markets "As a career futures and forex trader, I have always been intrigued by growth stocks, but never developed the skill to identify the 10X or 20X winners. The Lifecycle Trade is the first book I have read that could help an equities trader gain that skill in a methodical and systematic way. Kudos to the authors for putting a bookend to the earlier works by Peter Lynch." -Peter Brandt, Diary of a Professional Commodity Trader, Trading Commodity Futures with Classical Chart Patterns "A fabulous read for anyone wanting to get an understanding of how to jump on a large, winning IPO and avoid getting ruined by Wall Street's pump-and-dump scheme, which can ruin the average investor." -Dan Zanger, Chartpattern.com, Momentum Masters "An important idea conveyed by Boboch, Donnelly, Krull, and Daill is that stocks follow a Lifecycle Pattern from IPO-infancy to maturation. Understanding where a stock is in its lifecycle provides important clues as to how to trade and invest." -Brett H. Steenbarger, Ph.D. Trading Psychology 2.0, The Daily Trading Coach, The Psychology of Trading, Enhancing Trader Performance, A Trader's Guide to Self-Discipline "After thirty years of managing money, this book has opened my eyes to new ideas and made me realize that there is always more to learn." -James Roppel, Founder and Managing Member, Roppel Capital Management "As a long-time growth stock advisor, I value research that is based in fact and proven through history to give you an edge. That's just what The Lifecycle Trade does. The team has performed exhaustive studies on how IPOs act after they come public, and they identify easy-to-understand patterns and guidelines to take advantage of that action. It's an eye-opener and sure to help any investor who wants in on new, exciting growth situations." - Mike Cintolo, Chief Analyst, Cabot Growth Investor and Cabot Top Ten Trader "The Lifecycle Trade is a great research tool for stock traders to add to their knowledge toolkit. One can always learn more about trading and the markets, and this book offers valuable guidelines. The selling points and rules are especially insightful since selling is usually the greatest challenge to the trader. I would suggest everyone read The Lifecycle Trade and expand their market research knowledge." -John Boik, Lessons From the Greatest Stock Traders of All Time, How Legendary Traders Made Millions, Monster Stocks

How to Trade, Put, and Call Options Jul 08 2020 Under normal circumstances, when an investor buys a stock, he or she makes no profit in two out of three possible occurrences -- (1) when the price of the stock goes down; (2) when the price of the stock remains the same. The investor only profits if the stock increases in price. However, selling options on stock owned or purchased makes it possible for the investor to earn handsome annual rates of return, frequently 40% or more on an annualized basis! Unlike regular stock purchases where a profit is possible only if the stock increases, options make it possible to make a substantial profit even if the stock remains at the purchase price. For more venturesome investors, annualized rates of return of 100% or more are possible under bearish market conditions by selling "naked options" (without actually buying any stock). In this instance the investor can realize a profit if the price of the stock remains the same or declines. Risks as well as rewards are discussed.

Common Sense Options Jun 06 2020 Common Sense Options was written with the sole purpose of teaching someone to trade options for a living or for increasing ones profits in the Futures markets. If you have ever wanted to learn to trade options in the past or if you are just looking to add options to your trading strategy then Common Sense Options is just what you have been looking for. Trading options don't have to be difficult even though some educators try to impress you with how much they know by complicating something that is in reality pretty easy to learn. I'm not going to impress you with how much I know. But what I'm going to impress you with is how fast you are going to learn how to trade options and how much money can be made trading them. After all, isn't that what's really important? This course is unlike anything you have ever seen before. First we start out with the concept that you don't even know what an option is, much less how to trade them. Then I show you several different very simple option strategies that can you start using on day one to make money. Then the fun stuff starts. I'm going to teach you how to use options along with Futures to increase your reward potential while at the same time reducing your risk on those trades. Well, if that sounds too good to be true it's really not. You are going to find that options give you more trading opportunities than you ever dreamed of. If you are like most people, you look at a chart and see what you think is a great trade setting up but there is just too much risk. Not anymore! I don't care what market you are trading or if the market is going up, down or even sideways, you will now be able to trade it and trade it with less risk and often with even more potential profits. I'm going to show you dozens of different strategies that will allow you to trade any market at any time and without any of the complicated techno jargon you might have seen in other courses. Not only have I made this course easy to understand, I've also made it fun! The course is over 250 pages printed in full color and comes with 39 separate videos that show you exactly how each of the strategies work in the real markets. And at the end of each lesson there is a homework section just to make sure you are grasping the concepts that you are learning. As a Common Sense Options student you will be able to join my other students around the world who have taken this course in my student forum and on special option webinars that I do every month. I have students in over 67 countries and have been teaching people to trade since 1997. I'm also going to include a free 14 day trial to some software that you can start using day one to practice what you are learning in the course and on the videos. It's the same software that I use every day too. You will get a discount if you decide to buy the software because you are one of my students. I also do two different online seminars lasting two days each. One is going to be on futures trading and the other on options trading. There are going to be other big name educators co-hosting these seminars with me. My Common Sense Options course comes with a no questions ask refund policy. Get the course read and study it, watch the videos, join in the special webinars and student forum and if for any reason you

don't feel that you got more than you monies worth, just send it back for a full refund and keep the ten hours of videos just for trying out the course.
