*Loose Leaf for Financial Accounting Nov 08 2020 Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Short is the only financial accounting text to successfully implement a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting.*

*Murder at the Abbey Mar 01 2020 The Brand NEW instalment in the bestselling Exham-on-Sea series. An unsolved murder echoes down the corridors of Cleeve Abbey for years. The Exham-on-Sea's History Society's annual summer picnic comes to an abrupt end when human bones are discovered in Washford River, beside historic Cleeve Abbey. Thrilled to find evidence of a possible centuries-old murder mystery, the members of the society organise a ghost-hunting night in the ruins of Cleeve Abbey, despite amateur sleuth Libby Forest's reservations. Libby is a woman of many talents, a baker, chocolatier, even a reluctant sleuth, but she's no fan of the supernatural and her doubts are justified when a friend is attacked under cover of darkness at the ghost-hunt. Distressed and angry, Libby sets out with her new husband Max and their two dogs Bear and Shipley to uncover the connection between the murder of a sixteenth century monk and a present-day attack in picturesque Somerset. With friends and neighbours as suspects, Libby and Max close in on the culprit only to find that others are still in danger. There's no time to lose as the sins of the past threaten lives in the community. Murder at the Abbey is the eighth in a series of Exham-on-Sea Murder Mysteries from the small English seaside town full of quirky characters, sea air, and gossip. If you love Agatha Christie-style mysteries, cosy crime, clever dogs and cake, then you'll love these intriguing whodunnits.'*

*The Atlas Six* May 03 2020 The much-acclaimed BookTok sensation, Olivie Blake's *The Atlas Six*--now newly revised and edited with additional content. • The tag #theatlassix has millions of views on TikTok • A dark academic debut fantasy with an established cult following that reads like *THE SECRET HISTORY* meets *THE UMBRELLA ACADEMY* • The first in an explosive trilogy *The Alexandrian Society*, caretakers of lost knowledge from the greatest civilizations of antiquity, are the foremost secret society of magical academicians in the world. Those who earn a place among the Alexandrians will secure a life of wealth, power, and prestige beyond their wildest dreams, and each decade, only the six most uniquely talented magicians are selected to be considered for initiation. Enter the latest round of six: Libby Rhodes and Nico de Varona, unwilling halves of an unfathomable whole, who exert uncanny control over every element of physicality. Reina Mori, a naturalist, who can intuit the language of life itself. Parisa Kamali, a telepath who can traverse the depths of the subconscious, navigating worlds inside the human mind. Callum Nova, an empath easily mistaken for a manipulative illusionist, who can influence the intimate workings of a person's inner self. Finally, there is Tristan Caine, who can see through illusions to a new structure of reality—an ability so rare that neither he nor his peers can fully grasp its implications. When the candidates are recruited by the mysterious Atlas Blakely, they are told they will have one year to qualify for initiation, during which time they will be permitted preliminary access to the Society's archives and judged based on their contributions to various subjects of impossibility: time and space, luck and thought, life and death. Five, they are told, will be initiated. One will be eliminated. The six potential initiates will fight to survive the next year of their lives, and if they can prove themselves to be the best among their rivals, most of them will. Most of them. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

*Financial Accounting* Nov 01 2022 Libby/Libby/Short wrote this text based on their belief that the subject of financial accounting is inherently interesting, but financial accounting textbooks are often not. They believe most financial accounting textbooks fail to demonstrate that accounting is an exciting field of study and one that is important to future careers in business. When writing this text, they considered career relevance as their guide when selecting material, and the need to engage the student as their guide to style, pedagogy, and design. Libby/Libby/Short successfully implements a real-world, single focus company approach in every chapter. Students and instructors have responded very favorably to the use of focus companies and the real-world financial statements. The companies chosen are engaging and the decision-making focus shows the relevance of financial accounting regardless of whether or not the student has chosen to major in accounting. Libby/Libby/Short believes in the building-block approach to teaching transaction analysis. Most faculty agree that mastery of the accounting cycle is critical to success in financial accounting. And yet all other financial books introduce and develop transaction analysis in one chapter, bombarding a student early in the course with an overload of new concepts and terms. The authors believe that most faculty take more time with the accounting cycle, but other financial accounting textbooks don't. By slowing down the introduction of transactions and giving students time to practice and gain mastery, this building-block approach leads to greater student success in their study of later topics in financial accounting such as adjusting entries.

Galaxy Girls Sep 06 2020 Filled with beautiful full-color illustrations, a groundbreaking compendium honoring the amazing true stories of fifty inspirational women who helped fuel some of the greatest achievements in space exploration from the nineteenth century to today—including Hidden Figure's Mary Jackson and Katherine Johnson as well as former NASA Chief Astronaut Peggy Whitson, the record-holding American biochemistry researcher who has spent the most cumulative time in space. When Neil Armstrong stepped off the ladder of the lunar module, Eagle, he famously spoke of "one small step for man." But Armstrong would not have reached the moon without the help of women. Today, females across the earth and above it—astronauts and mathematicians, engineers and physicists, test pilots and aerospace psychophysicologists—are pushing the boundaries of human knowledge, helping us to understand the universe and our place in it. Galaxy Girls celebrates more than four dozen extraordinary women from around the globe whose contributions have been fundamental to the story of humankind's quest to reach the stars. From Ada Lovelace in the nineteenth century to the "colored computers" behind the Apollo missions, from the astronauts breaking records on the International Space Station to the scientific pioneers blazing the way to Mars, Galaxy Girls goes boldly where few books have gone before, celebrating this band of heroic sisters and their remarkable and often little known scientific achievements. Written by Libby Jackson, a leading British expert in human space flight, and illustrated with striking artwork from the students of London College of Communication, Galaxy Girls will fire the imaginations of trailblazers of all ages.

*Unlearning the Colonial Cultures of Planning Jan 23 2022* Colonialization has never failed to provoke discussion and debate over its territorial, economic and political projects, and their ongoing consequences. This work argues that the state-based activity of planning was integral to these projects in conceptualizing, shaping and managing place in settler societies. Planning was used to appropriate and then produce territory for management by the state and in doing so, became central to the colonial invasion of settler states. Moreover, the book demonstrates how the colonial roots of planning endure in complex (post)colonial societies and how such roots, manifest in everyday planning practice, continue to shape land use contests between indigenous people and planning systems in contemporary (post)colonial states.

*Girl on a Wire Aug 18 2021* It wasn't until Libby Phelps was an adult, a twenty-five year old, that she escaped the Westboro Baptist Church. She is the granddaughter of its founder, Fred Phelps, and when she left, the church and its values were all she'd known. She didn't tell her family she was leaving. It happened in just a few minutes; she ran into her house, grabbed a bag, and fled. No goodbyes. Based in Topeka, Kansas, the Westboro Baptist Church community is one the country's most notorious evangelical groups. Its members are known for their boisterous picketing—their zealous members with anti-military, anti-Semitic, and anti-gay signs—"Thank God for Dead Soldiers," "God Hates Jews," or "Thank God for 9/11"—and their notorious catchphrase "God hates fags." Search for them online and you're directed to their website, [www.godhatesfags.com](http://www.godhatesfags.com). The church makes headlines in news across the country. You've driven past its picketers or seen them on TV. It has seventy members and ninety percent of them are part of Libby's family. They picket concerts, football games, other churches, and, most notoriously, the funerals of servicemen and victims of hate crimes. For its members, to question its rules is to risk going to hell—where worms eat at your body and fire shoots out of your eyeballs. In *Girl on a Wire*, Libby is candid about her experience and what's happened since her escape. On *Anderson Cooper Live*, she was confronted by the mother of a soldier whose funeral had been picketed, and had to respond. Despite it all, she cares for her family. Her grandfather's sermons were fear mongering, but she loves him. This unusual memoir presents a rare, inside look into a notorious cult, and is an astonishing story of strength, bravery, and determination.
