**Qur'an and Woman** Aug 31 2022 Fourteen centuries of Islamic thought have produced a legacy of interpretive readings of the Qu'ran written almost entirely by men. Now, with Qu'ran and Woman, Amina Wadud provides a first interpretive reading by a woman, a reading which validates the female voice in the Qu'ran and brings it out of the shadows. Muslim progressives have long argued that it is not the religion but patriarchal interpretation and implementation of the Qu'ran that have kept women oppressed. For many, the way to reform is the reexamination and reinterpretation of religious texts. Qu'ran and Woman contributes a gender inclusive reading to one of the most fundamental disciplines in Islamic thought, Qu'ranic exegesis. Wadud breaks down specific texts and key words which have been used to limit women's public and private role, even to justify violence toward Muslim women, revealing that their original meaning and context defy such interpretations. What her analysis clarifies is the lack of gender bias, precedence, or prejudice in the essential language of the Qur'an. Despite much Qu'ranic evidence about the significance of women, gender reform in Muslim society has been stubbornly resisted. Wadud's reading of the Qu'ran confirms women's equality and constitutes legitimate grounds for contesting the unequal treatment that women have experienced historically and continue to experience legally in Muslim communities. The Qu'ran does not prescribe one timeless and unchanging social structure for men and

women, Wadud argues lucidly, affirming that the Qu'ran holds greater possibilities for guiding human society to a more fulfilling and productive mutual collaboration between men and women than as yet attained by Muslims or non-Muslims.

*The Medical Basis of Psychiatry* Oct 21 2021 Four years have passed since the last edition (3rd) of this book was published. In the intervening years, several reviews of this book have provided highly encouraging remarks about the value of this book in transmitting information on classification and treatment of psychiatric disorders to the audience. We are proposing to revise all chapters with an eye on accuracy and ease of use, and this is an especially timely endeavor with the upcoming publication of the Diagnostic and Statistical Manual V. All the appropriate new information on biology, etiology, diagnosis and treatment of psychiatric disorders will be added to the current proposed edition. It is our goal to recruit the same authors (if possible) who contributed to the previous edition. While all chapters will be updated (see TOC), those marked by asterisks will be the most likely to undergo more revision. Psychiatry has emerged as a burgeoning scientific field with major advances in etiology and treatment of several disorders. Just as there was excitement in the anatomic advances that took place a hundred years ago when Emil Kraepelin and his collaborators took on the enormous task of classification of psychiatric disorders based on rational scientific thinking, new advances in genetics, biochemistry, neuroanatomy and pharmacotherapy of mental disorders have brought us even closer to a better understanding of complex disorders like schizophrenia, bipolar disorder, depression and even autism. The major goal of the previous edition of this classic book was to update the busy clinician, psychiatric resident and medical student with the most up-to-date information on etiology, diagnosis and treatment of psychiatric disorders. This goal remains the focus of the fourth edition of this book. In this updated and expanded edition, the reader will be provided with the most contemporary information and literature supported by a close survey of the field. This new edition of this classic title, with its focus on biologic and medical aspects of psychiatry, will continue to be of significant help to all interested in the scientific practice of psychiatry.

**Marsilius of Padua: The Defender of the Peace** Aug 07 2020 The Defender of the Peace of Marsilius of Padua is a massively influential text in the history of western political thought. Marsilius offers a detailed analysis and explanation of human political communities, before going on to attack what he sees as the obstacles to peaceful human coexistence - principally the contemporary papacy. Annabel Brett's authoritative rendition of the Defensor Pacis was the first new translation in English for fifty years, and a major contribution to the series of Cambridge Texts: all of the usual series features are provided, including chronology, notes for further reading, and up-to-date annotation aimed at the student reader encountering this classic of medieval thought for the first time. This edition of The Defender of the Peace is a scholarly and a pedagogic event of great importance, of interest to historians, political theorists, theologians and philosophers at all levels from second-year undergraduate upwards.

*Argumentation in Higher Education* Sep 27 2019 Argumentation in Higher Education offers professors, lecturers and researchers informative guidance for teaching effective argumentation skills to their undergraduate and graduate students. This professional guide aims to make the complex topic of argumentation open and transparent. Grounded in empirical research and theory, but with student voices heard strongly throughout, this book fills the gap of argumentation instruction for the undergraduate and graduate level. Written to enlighten even the most experienced professor, this text contributes to a better understanding of the demands of speaking, writing, and visual argumentation in higher education, and will undoubtedly inform and enhance course design. The book argues for a more explicit treatment of argument (the product) and argumentation (the process) in higher education, so that the ground rules of the academic discipline in question are made clear. Each chapter concludes with practical exercises for staff development use. Topics discussed include: The importance of argument The current state of argumentation in higher education Generic skills in argumentation The balance between generic and discipline specific skills Information communication technologies and visual argumentation How can we best teach argumentation so that students feel fully empowered in their academic composition? Professors (new and experienced), lecturers, researchers, professional developers and writing coaches worldwide grappling with this question will find this accessible text to be an extremely valuable resource. Richard Andrews is Professor in English at the Institute of Education, University of London.

**Interest in Mathematics and Science Learning** Jan 12 2021 Interest in Mathematics and Science Learning, edited by K. Ann Renninger, Martin Nieswandt, and Suzanne

Hidi, is the first volume to assemble findings on the role of interest in mathematics and science learning. As the contributors illuminate across the volume's 22 chapters, interest provides a critical bridge between cognition and affect in learning and development. This volume will be useful to educators, researchers, and policy makers, especially those whose focus is mathematics, science, and technology education.

**Enochian World of Aleister Crowley** Sep 19 2021 Many consider Enochiana the most powerful and least understood system of Western Occult practice. This book makes it truly accessible and easy to understand. Crowley's work was the launching pad for all that followed. Originally published in 1912, it rent the veil of the Inner Order of the Golden Dawn and revealed its most precious jewel for all to see. And now, for the first time, the reader is provided with instructions that bridge the gap between the material and spiritual worlds by integrating Enochiana with Sex Magick. Mr DuQuette and Dr Hyatt bring over forty years of practical experience in the field to show you how to start using this powerful system right now. It also includes an Enochian dictionary.

*International Handbook of Jewish Education* May 16 2021 The International Handbook of Jewish Education, a two volume publication, brings together scholars and practitioners engaged in the field of Jewish Education and its cognate fields world-wide. Their submissions make a significant contribution to our knowledge of the field of Jewish Education as we start the second decade of the 21st century. The Handbook is divided broadly into four main sections: Vision and Practice: focusing on issues of philosophy, identity and planning –the big issues of Jewish Education. Teaching and Learning: focusing on areas of curriculum and engagement Applications, focusing on the ways that Jewish Education is transmitted in particular contexts, both formal and informal, for children and adults. Geographical, focusing on historical, demographic, social and other issues that are specific to a region or where an issue or range of issues can be compared and contrasted between two or more locations. This comprehensive collection of articles providing high quality content, constitutes a definitive statement on the state of Jewish Education world wide, as well as through a wide variety of lenses and contexts. It is written in a style that is accessible to a global community of academics and professionals.

*Enciclopedia Internacional de Pseudónimos* Nov 21 2021 This Encyclopedia is the first to compile pseudonyms from all over the world, from all ages and occupations in a single work: some 500,000 pseudonyms of roughly 270,000 people are deciphered here. Besides pseudonyms in the narrower sense, initials, nick names, order names, birth and married names etc. are included. The volumes 1 to 9 list persons by their real names in alphabetical order. To make the unequivocal identification of a person easier, year and place of birth and death are provided where available, as are profession, nationality, the pseudonym under which the person was known, and finally, the sources used. The names of professions given in the source material have been translated into English especially for this encyclopaedia. In the second part, covering the volumes 10 to 16, the pseudonyms are listed alphabetically and the real names provided. Approx. 500,000 pseudonyms of about 270,000 persons First encyclopedia including pseudonyms from all over the world, all times and all occupations Essential research tool for anyone wishing to identify persons and names for his research within one single work

**Understanding Young People's Science Aspirations** Dec 11 2020 Understanding Young People's Science Aspirations offers new evidence and understanding about how young people develop their aspirations for education, learning and, ultimately, careers in science. Integrating new findings from a major research study with a wide ranging review of existing international literature, it brings a distinctive sociological analytic lens to the field of science education. The book offers an explanation of how some young people do become dedicated to follow science, and what might be done to increase and broaden this population, exploring the need for increased scientific literacy among citizens to enable them to exercise agency and lead a life underpinned by informed decisions about their own health and their environment. Key issues considered include: why we should study young people's science aspirations the role of families, social class and science capital in career choice the links between ethnicity, gender and science aspirations the implications for research, policy and practice. Set in the context of widespread international policy concern about the urgent need to improve, increase and diversify participation in post-16 science, this key text considers how we must encourage a supply of appropriately qualified future scientists and workers in STEM industries and ensure a high level of scientific literacy in society. It is a crucial read for all training and practicing science teachers, education researchers and academics, as well as anyone invested in the desire to help fulfil young people's science aspirations.

**UFOs Over America** Jul 26 2019 In this collection of terrifying possibilities, follow a New York Field Investigator for the Mutual UFO Network (MUFON) as he investigates and discusses over 70 important Ufology topics that gravely affect the US. This book is broken into three parts The Biggest, Baddest, Scariest UFO Events In America;

Crashes, Chases, Shoot-downs, and Mysteries; and Alien Abductions. Find out how ordinary citizens are involved with the Greys, insectoids, reptilians, and Nordics. Follow military jets, trying to protect the populace, as they hunt down and chase alien craft; and meet abductees who may never be the same after horrifying nonhuman encounters. Discover that government agents may be around you: soldiers of the Anti-UFO-Army. Be careful how you approach the study of UFOs and aliens. The author believes that if you want to meet extraterrestrials and experience their high strangeness or abductions, you will; find out how at your own risk"

*Laszlo Moholy-Nagy* May 28 2022 Marking the centenary of the birth of Laszlo Moholy-Nagy (1895–1946), this book offers a new approach to the Bauhaus artist and theorist's multifaceted life and work—an approach that redefines the very idea of biographical writing. In *Laszlo Moholy-Nagy*, Louis Kaplan applies the Derridean deconstructivist model of the "signature effect" to an intellectual biography of a Constructivist artist. Inhabiting the borderline between life and work, the book demonstrates how the signature inscribed by "Moholy" operates in a double space, interweaving signified object and signifying matter, autobiography and auto-graphy. Through interpretative readings of over twenty key artistic and photographic works, Kaplan graphically illustrates Moholy's signature effect in action. He shows how this effect plays itself out in the complex of relations between artistic originality and plagiarism, between authorial identity and anonymity, as well as in the problematic status of the work of art in the age of technical reproduction. In this way, the book reveals how Moholy's artistic practice anticipates many of the issues of postmodernist debate and thus has particular relevance today. Consequently, Kaplan clarifies the relationship between avant-garde Constructivism and contemporary deconstruction. This new and innovative configuration of biography catalyzed by the life writing of Moholy-Nagy will be of critical interest to artists and writers, literary theorists, and art historians.

**Journal of the Common Council ...** Dec 23 2021

Arabia Felix Jun 24 2019 A riveting account of a landmark expedition that left only one survivor, now back in print for the first time in decades. Arabia Felix is the spellbinding true story of a scientific expedition gone disastrously awry. On a winter morning in 1761 six men leave Copenhagen by sea—a botanist, a philologist, an astronomer, a doctor, an artist, and their manservant—an ill-assorted band of men who dislike and distrust one another from the start. These are the members of the Danish expedition to Arabia Felix, as Yemen was then known, the first organized foray into a corner of the world unknown to Europeans. The expedition made its way to Turkey and Egypt, by which time its members were already actively seeking to undercut and even kill one another, before disappearing into the harsh desert that was their destination. Nearly seven years later a single survivor returned to Denmark to find himself forgotten and all the specimens that had been sent back ruined by neglect. Based on diaries, notebooks, and sketches that lay unread in Danish archives until the twentieth century, Arabia Felix is a tale of intellectual rivalry and a comedy of very bad manners, as well as an utterly absorbing adventure. Arabia Felix includes 33 line drawings and maps.

**Manganese in Soils and Plants** Apr 14 2021 Sixty years ago at the Waite Agricultural Research Institute, G. Samuel, a plant pathologist, and C. S. Piper, a chemist, published their conclusion that the cause of roadside take-all, a disease of oats, was manganese deficiency. This report, together with the concurrent and independent studies of W. M. Carne in Western Australia were the first records of manganese deficiency in Australia and came only six years after McHargue's paper which is generally accepted as the final proof of the essentiality of this element. There must have been a few doubts for some people at the time, however, as the CAB publication, 'The Minor Elements of the Soil' (1940) expressed the view that further evidence to this effect was provided by Samuel and Piper. Their historic contributions are recognised by the International Symposium on Manganese in Soils and Plants as it meets on the site of their early labours to celebrate the 60th anniversary. This year Australians also acknowledge 200 years of European settlement in this country and so the Symposium is both a Bicentennial and a diamond jubilee event which recognises the impact of trace elements on agricultural development in Australia. In a broader sense, a symposium such as this celebrates, as it reviews, the efforts of all who over the ages have contributed to our knowledge of manganese in soils and plants.

Turn It and Turn It Again Sep 07 2020 The study of classical Jewish texts is flourishing in day schools and adult education, synagogues and summer camps, universities and yeshivot. But serious inquiry into the practices and purposes of such study is far rarer. In this book, a diverse collection of empirical and conceptual studies illuminates particular aspects of the teaching of Bible and rabbinic literature to, and the learning of, children and adults. In addition to providing specific insights into the pedagogy of Jewish texts, these studies serve as models of what the disciplined study of pedagogy can look like. The book will be of interest to teachers of Jewish texts in all contexts, and

will be particularly valuable for the professional development of Jewish educators.
