For Protection and Promotion May 16 2021 Safety nets are noncontributory transfer programs targeted to the poor or vulnerable. They

play important roles in social policy. Safety nets redistribute income, thereby immediately reducing poverty and inequality; they enable households to invest in the human capital of their children and in the livelihoods of their earners; they help households manage risk, both ex ante and ex post; and they allow governments to implement macroeconomic or sectoral reforms that support efficiency and growth. To be effective, safety nets must not only be well intended, but also well designed and well implemented. A good safety net system and its programs are tailored to country circumstances, adequate in their coverage and generosity, equitable, cost-effective, incentive compatible, and sustainable. Good safety nets are also dynamic and change over time as the economy changes or as management problems are solved and new standards are set. Drawing on a wealth of research, policy, and operational documents from both academia and the World Bank's work in over 100 countries, *For Protection and Promotion* provides pragmatic and informed guidance on how to design and implement safety nets, including useful information on how to define eligibility and select beneficiaries, set and pay benefits, and monitor and evaluate programs and systems. The book synthesizes the literature to date and enriches it with new examples on various program options cash transfers (conditional and unconditional), in-kind transfers, price subsidies, fee waivers, and public works. It concludes with a comprehensive diagnostic for fitting safety net systems and programs to specific circumstances.

Beyond the Panama Papers. The Performance of EU Good Governance Promotion Nov 21 2021 This last title in the series covers the most important findings of the five years EU sponsored ANTICORRP project dealing with corruption and organized crime. How prone to corruption are EU funds? Has EU managed to improve governance in the countries that it assists? Using the new index of public integrity and a variety of other tools created in the project this issue looks at how EU funds and norms affected old member states (like Spain), new member states (Slovakia, Romania), accession countries (Turkey) and the countries recipient of development funds (Egypt, Tanzania, Tunisia). The data covers over a decade of structural and development funds, and the findings show the challenges to

changing governance across borders, the different paths that each country has experienced and suggest avenues of reforming development aid for improving governance.

The World Bank Jun 16 2021 This effort constitutes the most comprehensive and authoritative work to date on the history of the International Bank for Reconstruction and Development, or the World Bank. Author-editors John Lewis, Richard Webb, and Devesh Kapur chronicle the evolution of this institution and offer insights into its successes, failures, and prospects for the future. The result of their intense labors is an invaluable resource for other researchers and a fascinating study in its own right. The work is divided into two volumes. The first is organized thematically and examines the critical events and policy issues in the World Bank's development over the last fifty years. Chapter topics include poverty alleviation, structural adjustment lending, environmental programs, the International Finance Corporation (IFC), the International Development Association (IDA), and the evolution of the Bank as an institution. The second volume contains case studies written by experts with experience in the various regions in which the Bank operates. There are chapters on the Bank's activities in Korea, Mexico, Africa, South Asia, and Eastern Europe. Volume 2 also contains essays on the World Bank's relationship with the United States, Japan, and Western Europe, and its partnership with the International Monetary Fund (IMF). By special arrangement, the authors have had wide-ranging access to confidential documents at the World Bank, making this work a unique source of information on the internal workings of this critical institution. They have also drawn on extensive interviews with current and past Bank officials. Moreover, publication could not be more timely, coming as it does when many in the development community and in the U.S. Congress are questioning the Bank's track record and even its reason for existence. *The World Bank: Its First Half Century* will be of great interest not only to development practitioners but also to students of international relations, development economics, and global finance. During the course of the project, John P. Lewis and Richard Webb were nonresident

senior fellows, and Devesh Kapur was a program associate, in the Foreign Policy Studies program at the Brookings Institution.
