The Bishop's Palace Nov 29 2019 This lavishly illustrated book looks at the art and architecture of episcopal palaces as expressions of power and ideology. Tracing the history of the bishop's residence in the urban centers of northern Italy over the Middle Ages, Maureen C. Miller asks why this once rudimentary and highly fortified structure called a domus became a complex and elegant "palace" (palatium) by the late twelfth century. Miller argues that the change reflects both the emergence of a distinct clerical culture and the attempts of bishops to maintain authority in public life. She relates both to the Gregorian reform movement, which set new standards for clerical deportment and at the same time undercut episcopal claims to secular power. As bishops lost temporal authority in their cities to emerging communal governments, they compensated architecturally and competed with the communes for visual and spatial dominance in the urban center. This rivalry left indelible marks on the layout and character of Italian cities. Moreover, Miller contends, this struggle for power had highly significant, but mixed, results for western Christianity. On the one hand, as bishops lost direct governing authority in their cities, they devised ways to retain status, influence, and power through cultural practices. This response to loss was highly creative. On the other hand, their loss of secular control led bishops to emphasize their spiritual powers and to use them to obtain temporal ends. The coercive use of spiritual authority contributed to the emergence of a "persecuting society" in the central Middle Ages.

50 Jahre Wahrheit und Methode Mar 26 2022 The turning point occurred with Heidegger's hermeneutics of facticity saw a great flourishing in Gadamer's works. Hermeneutics becomes the philosophy that undermines the scientific parameters of modernity and it looks for an extra-metodica way that leads up to truth through the rediscovery of the cultural values of our European tradition that is art, taste and culture but above all, rhetoric, practical philosophy, and that particular form of judgment called phronesis, which expresses itself in the understanding of the other and in the dialogue. This sensitivity towards the values of tradition, which represents the authentic authority since it's the consent on which the civil society is based, cannot for Gadamer withdraw into itself but it must open itself to the intercultural dialogue as an ethical answer to the challenge of globalization. PLEASE NOTE: Only three of the book's twenty-two essays are in English language text. (Series: The Dialogue - Yearbook of Philosophical Hermeneutics - Vol. 5)

**The Economic History of Italy 1860-1990** Aug 26 2019 This book gives a full account of the economic and social history of Italy since unification (1860), with an introduction covering the previous period since the Middle Ages. The Economic History of Italy represents a scholarly and authoritative account of Italy's progress from a rural economy to an industrialized nation. The book makes a broad division of the period into three parts: the take-off (1860-1913), the consolidation in the midst of two wars and a world depression (1914-47), and the great expansion (1948-1990). Professor Zamagni traces the growth of industrialization, and argues that despite several advanced areas Italy only became an industrialized nation after the Second World War, and that during the 1980s the South was still clearly behind the rest of the country. Zamagni analyses data both from a macroeconomic position, in looking at the growth of the finance sector, or the role of the State, and from a microeconomic position when she draws conclusions from the changing population structure, or from the actions of individual businesses. Professor Zamagni reveals that even though the population more than doubled during this time the level of national income rose 19-fold, to move Italy from a peripheral status in Europe to a central position as a prosperous country. A central theme of the book is Professor Zamagni's argument that the Italian economy has been successful not by any great individuality of its own but by being flexible enough to incorporate the successes of other countries: Japan's integrated business network, for example, or Germany's financial structure. She places the industrialization of Italy in the international context by comparing Italy's GDP and other measures of prosperity at different times to the USA, Japan, the UK, France, and Germany. The book is based on original field-work by the author, and the many detailed but small-scale studies existing in Italian. Quantitative trends are described in more than 70 tables of data, while the book provides appendices containing chronologies of main events in various sectors and biographies.

**The Ashgate Companion to the History of Textile Workers, 1650-2000** Nov 09 2020 This impressive collection offers the first systematic global and comparative history of textile workers over the course of 350 years. This period covers the major changes in wool and cotton production, and the global picture from pre-industrial times through to the twentieth century. After an introduction, the first part of the book is divided into twenty national studies on textile production over the period 1650-2000. To make them useful tools for international comparisons, each national overview is based on a consistent framework that defines the topics and issues to be treated in each chapter. The countries described have been selected to include the major historic producers of woollen and cotton fabrics, and the diversity of global experience, and include not only European nations, but also Argentina, Brazil, China, Egypt, India, Japan, Mexico, Turkey, Uruguay and the USA. The second part of the book consists of ten comparative

papers on topics including globalization and trade, organization of production, space, identity, workplace, institutions, production relations, gender, ethnicity and the textile firm. These are based on the national overviews and additional literature, and will help apply current interdisciplinary and cultural concerns to a subject traditionally viewed largely through a social and economic history lens. Whilst offering a unique reference source for anyone interested in the history of a particular country's textile industry, the true strength of this project lies in its capacity of international comparison. By providing global comparative studies of key textile industries and workers, both geographically and thematically, this book provides a comprehensive and contemporary analysis of a major element of the world's economy. This allows historians to challenge many of the received ideas about globalization, for instance, highlighting how global competition for lower production costs is by no means a uniquely modern issue, and has b

Tramonto di un cuore Oct 01 2022 Una notte, il vecchio Salomonsohn, ricco borghese austriaco in villeggiatura a Gardone, sorprende la figlia mentre esce dalla stanza d'albergo di uno sconosciuto. Padre amorevole, egli ha consacrato ogni sforzo, ogni momento della propria vita ad assicurarle un futuro agiato. Ma ora, ossessionato da immagini di grottesca promiscuità, è incapace di accettare ciò che la sua mente, in un furioso ritornello, continua a ripetergli: sua figlia è cresciuta, è ormai una donna. E più Salomonsohn rifiuta di parlarne, più, dentro di lui, si fa strada un violento senso di rivalsa. Solo, abbruttito, preda di un'avarizia dei sentimenti ancor prima che dei beni materiali, il vecchio padre precipita in un baratro di livida impotenza, incapace sia di recuperare il rapporto con la figlia, sia di chiedere ragione a chi gliel'ha rapita. Fulminante parabola della disperazione di un uomo che si lascia consumare dal dolore e dall'astio, «Tramonto di un cuore» (1927) racconta l'eterno conflitto tra aspettativa e delusione che può deflagrare all'improvviso e cambiare per sempre il corso di una vita.

**Eighth International Symposium "Monitoring of Mediterranean Coastal Areas. Problems and Measurement Techniques" Livorno (Italy) June 2020** Apr 14 2021 The 8th International Symposium "Monitoring of Mediterranean Coastal Areas. Problems and Measurements Techniques" was organized by CNR-IBE in collaboration with FCS Foundation, and Natural History Museum of the Mediterranean and under the patronage of University of Florence, Accademia dei Geogofili, Tuscany Region and Livorno Province. It is the occasion in which scholars can illustrate and exchange their activities and innovative proposals, with common aims to promote actions to preserve coastal marine environment. Considering Symposium interdisciplinary nature, the Scientific Committee, underlining this holistic view of Nature, decided to celebrate Alexander von Humboldt; a nature scholar that proposed the organic and inorganic nature's aspects as a single system. It represents a sign of continuity considering that in-presence Symposium could not be carried out due to the COVID-19 pandemic restrictions. Subjects are related to coastal topics: morphology; flora and fauna; energy production; management and integrated protection; geography and landscape, cultural heritage and environmental assets, legal and economic aspects.

*The Leader and the Crowd* Dec 23 2021 Daria Frezza covers six tumultuous decades of transatlantic history to examine how European theories of mass politics and crowd psychology influenced American social scientists' perception of crowds, mobs, democratic "people," and its leadership. In the last decades of the nineteenth century, the development of an urban-industrial mass society and the disordered influx of millions of immigrants required a redefinition of these important categories in American public discourse. Frezza shows how in the Atlantic crossing of ideas American social scientists reelaborated the European theories of crowd psychology and the racial theories then in fashion. Theorists made a sharp distinction between the irrationality of the crowd, including lynchings, and the rationality of the democratic "public." However, this paradigm of a rational Anglo-Saxon male public in opposition to irrational mobs--traditionally considered to be composed of women, children, "savages"--was challenged by

the reality of southern lynch mobs made up of white Anglo-Saxons, people who used mob violence as an instrument of subjugation over an allegedly inferior race. After World War I, when the topic of eugenics and immigration restrictions ignited the debate of exclusion/inclusion regarding U.S. citizenship, Franz Boas's work provided a significant counterbalance to the biased language of race. Furthermore, the very concept of democracy was questioned from many points of view. During the Depression years, social scientists such as John Dewey critically analyzed the democratic system in comparison to European dictatorships. The debate then acquired an international dimension. In the "ideological rearmament of America" on the eve of World War II, social scientists criticized Nazi racism but at the same time stressed how racism was also deeply rooted in America. This is a fresh and provocative look at the parallels between the emergence of America as a world power and the maturing of the new discipline of social science.

**Liver Growth and Repair** Oct 21 2021 Nelson Fausto The Greek myth of Prometheus with its picture of a vulture feasting on its chained victim has traditionally provided a visual image of liver regeneration. It is a powerful and frightening representation but if one were to substitute the vulture by a surgeon and Prometheus by a patient laying on a properly prepared operating table, the outcome of the procedure would not differ significantly from that described by Greek poets. Yet few of us who work in the field have stopped long enough to ask where this myth originated. Did the poet observe a case of liver regeneration in a human being? Was it brilliant intuition or perhaps, literally, just a 'gut feeling' of a poet looking for good rhymes that led to the prediction that livers grow when part of the tissue is removed? This book does not attempt to solve these historical issues. It does, instead, cover in detail some of the major modern themes of research on liver regeneration, injury and repair. As indicated in Dr. N. Bucher's chapter, the modern phase of experimental studies on liver regeneration started in 1931 with the publication by Higgins and Anderson of a method to perform a two-thirds resection of the liver of a rat. The technique described has 3 remarkable features: 1) it is highly reproducible, resulting in the removal of 68% of the liver, 2) it has minimal if any mortality, and 3) it consists only of blood vessel ligation and does not involve cutting through or wounding hepatic tissue.

*Mussolini's War* Aug 07 2020 A remarkable new history evoking the centrality of Italy to World War II, outlining the brief rise and triumph of the Fascists, followed by the disastrous fall of the Italian military campaign. While staying closely aligned with Hitler, Mussolini remained carefully neutral until the summer of 1940. At that moment, with the wholly unexpected and sudden collapse of the French and British armies, Mussolini declared war on the Allies in the hope of making territorial gains in southern France and Africa. This decision proved a horrifying miscalculation, dooming Italy to its own prolonged and unwinnable war, immense casualties, and an Allied invasion in 1943 that ushered in a terrible new era for the country. John Gooch's new history is the definitive account of Italy's war experience. Beginning with the invasion of Abyssinia and ending with Mussolini's arrest, Gooch brilliantly portrays the nightmare of a country with too small an industrial sector, too incompetent a leadership and too many fronts on which to fight. Everywhere—whether in the USSR, the Western Desert, or the Balkans—Italian troops found themselves against either better-equipped or more motivated enemies. The result was a war entirely at odds with the dreams of pre-war Italian planners—a series of desperate improvisations against an allied force who could draw on global resources, and against whom Italy proved helpless.

American Dust Sep 07 2020 Arrivano tutte le sere, d'estate. Scaricano da un furgoncino un divano, tavolini e lampade. E pescano. L'alcolizzato abita in una baracca. I ragazzi vanno da lui a raccattare i vuoti per rivenderseli e comprare qualcosa, un hamburger oppure una scatola di proiettili. Quel giorno il ragazzino sceglie i proiettili. La Seconda guerra mondiale è appena finita, e nessuno fa caso a un adolescente con un fucile sottobraccio, fermo a una stazione di servizio. Il ragazzino è un uomo e ricorda, prima che il vento si porti via tutto, l'America e i suoi sogni, l'alcolizzato e le sue bottiglie, i due sul divano in riva al lago. La scelta, leggera e terribile, tra hamburger e proiettili, un colpo di fucile in un campo di meli e l'amico bello e ferito, lasciato lì a morire dissanguato. *American Dust* è un'elegia delicata e sorprendente, in cui l'infanzia e la morte danzano insieme, avvolte nella polvere del sogno americano.

Criminal Law in Liberal and Fascist Italy May 16 2021 By extending the chronological parameters of existing scholarship, and by focusing on legal experts' overriding and enduring concern with 'dangerous' forms of common crime, this study offers a major reinterpretation of criminal-law reform and legal culture in Italy from the Liberal (1861-1922) to the Fascist era (1922-43). Garfinkel argues that scholars have long overstated the influence of positivist criminology on Italian legal culture and that the kingdom's penal-reform movement was driven not by the radical criminological theories of Cesare Lombroso, but instead by a growing body of statistics and legal researches that related rising rates of crime to the instability of the Italian state. Drawing on a vast array of archival, legal and official sources, the author explains the sustained and wide-ranging interest in penal-law reform that defined this era in Italian legal history while analyzing the philosophical underpinnings of that reform and its relationship to contemporary penal-reform movements abroad.
