" written by the same author. Moore recorded his telescopic observations in his logbooks, which are reproduced and described here in detail, along with his sketches and notes. In this light, the author discusses the factors that caused Moore to switch from lunar observing to planetary and variable star observing. He has also included personal recollections and humorous anecdotes from Moore 's friends and acquaintances, as well as a look at his best loved books. Further chapters describe Moore 's foreign travels and correspondence with those back home. Lastly, the author has not neglected a few of Moore 's most memorable television and radio appearances, which are examined along with a close up of what it was like to visit Moore 's beloved home of Farthings in Selsey. Essentially, this is a book written by popular demand from the readers of the author 's original biography, who craved more of Moore!

Indian Stereotypes in TV Science Fiction Jun 14 2021 According to an early 1990s study, 95 percent of what college students know about Native Americans was acquired through the media, leading to widespread misunderstandings of First Nations peoples. Sierra Adare contends that negative “ Indian ” stereotypes do physical, mental, emotional, and financial harm to First Nations individuals. At its core, this book is a social study whose purpose is to explore the responses of First Nations peoples to representative “ Indian ” stereotypes portrayed within the TV science fiction genre. Participants in Adare 's study viewed episodes from My Favorite Martian, Star Trek, Star Trek: Voyager, Quantum Leap, The Adventures of Superman, and Star Trek: The Next Generation. Reactions by viewers range from optimism to a deep-rooted sadness. The strongest responses came after viewing a Superman episode 's depiction of an “ evil medicine man ” who uses a ceremonial pipe to kill a warrior. The significance of First Nations peoples ' responses and reactions are both surprising and profound. After publication of “ Indian ” Stereotypes in TV Science Fiction, ignorance can no longer be used as an excuse for Hollywood 's irresponsible depiction of First Nations peoples ' culture, traditions, elders, religious beliefs, and sacred objects.

Tasting the Sky Mar 31 2020 Winner, Arab American National Museum Book Award for Children's/YA Literature, among other awards and honors. "When a war ends it does not go away," my mother says. "It hides inside us . . . Just forget!" But I do not want to do what Mother says . . . I want to remember. In this groundbreaking memoir set in Ramallah during the aftermath of the 1967 Six-Day War, Ibtisam Barakat captures what it is like to be a child whose world is shattered by war. With candor and courage, she stitches together memories of her childhood: fear and confusion as bombs explode near her home and she is separated from her family; the harshness of life as a Palestinian refugee; her unexpected joy when she discovers Alef, the first letter of the Arabic alphabet. This is the beginning of her passionate connection to words, and as language becomes her refuge, allowing her to piece together the fragments of her world, it becomes her true home. Transcending the particulars of politics, this illuminating and timely book provides a telling glimpse into a little-known culture that has become an increasingly important part of the puzzle of world peace.

The British Television Pilot Episodes Research Guide 1936-2015 Sep 29 2022 A new idea can become an

expensive flop for TV executives. So from the earliest days of television, the concept of a pilot episode seemed like a good idea. Trying out new actors; new situations and new concepts before making a series was good economical sense. It was also tax deductible. Sometimes these pilots were shown on television; sometimes they were so awful they were hidden from sight in archives; and sometimes they were excellent one-offs, but a series seemed elusive and never materialised. Chris Perry has always been fascinated by the pilot episode. So many pilots are made annually, but never seen by audiences. Only a handful appear on screen. It's a hidden world of comedy, variety, drama and factual programming. This volume attempts to lift the lid on the world of the TV pilot by revealing the many transmitted and untransmitted episodes made through the decades.

Fascist Lizards from Outer Space Nov 07 2020 When Kenneth Johnson's science fiction miniseries V premiered in 1983, it netted more than 40 percent of the television viewing audience and went on to spawn a sequel, a weekly series, novelizations, comic books and a remake. Yet the 2009 V reboot was cancelled in its second season, despite a robust premiere. Both versions were products of their respective times, but the original was inspired by classic works by the likes of Sinclair Lewis and Leo Tolstoy. Johnson's predilection for literature and history helped give his telling of V a sense of heart and depth that the contemporary version sorely lacked. Featuring exclusive interviews with cast and crew, this book examines V's cultural impact and considers the future of the franchise.

Half the Sky Apr 24 2022 #1 NATIONAL BESTSELLER • A passionate call to arms against our era's most pervasive human rights violation—the oppression of women and girls in the developing world. From the bestselling authors of *Tightrope*, two of our most fiercely moral voices With Pulitzer Prize winners Nicholas D. Kristof and Sheryl WuDunn as our guides, we undertake an odyssey through Africa and Asia to meet the extraordinary women struggling there, among them a Cambodian teenager sold into sex slavery and an Ethiopian woman who suffered devastating injuries in childbirth. Drawing on the breadth of their combined reporting experience, Kristof and WuDunn depict our world with anger, sadness, clarity, and, ultimately, hope. They show how a little help can transform the lives of women and girls abroad. That Cambodian girl eventually escaped from her brothel and, with assistance from an aid group, built a thriving retail business that supports her family. The Ethiopian woman had her injuries repaired and in time became a surgeon. A Zimbabwean mother of five, counseled to return to school, earned her doctorate and became an expert on AIDS. Through these stories, Kristof and WuDunn help us see that the key to economic progress lies in unleashing women's potential. They make clear how so many people have helped to do just that, and how we can each do our part. Throughout much of the world, the greatest unexploited economic resource is the female half of the population. Countries such as China have prospered precisely because they emancipated women and brought them into the formal economy. Unleashing that process globally is not only the right thing to do; it's also the best strategy for fighting poverty. Deeply felt, pragmatic, and inspirational, *Half the Sky* is essential reading for every global citizen.
