The Trident Jan 26 2022 Navy SEAL and author of *Overcome* Jason Redman's highly-charged account of his combat missions in Iraq and his miraculous recovery from wounds that might have killed him—if it were not for his grit and the devotion of his wife and family Decorated Navy SEAL Lieutenant Jason Redman served his country in Columbia, Peru, Afghanistan and Iraq, where he commanded mobility and assault forces. In western Iraq alone, he conducted over forty capture-kill missions with his men, successfully locating more than 120 Al Qaida insurgents. In September 2007, while leading a mission against a key senior Al Qaida commander, his team was ambushed and he was critically wounded by machine-gun fire at point blank range. During the intense recovery that followed—a years-long process that included 37 surgeries—Redman gained national media attention when he posted a sign on his door at Bethesda Naval Medical Center, warning all who entered not to “feel sorry for my wounds.” Redman's sign became both a statement and a symbol for wounded warriors everywhere. The Trident is an unforgettable story of one man's determination to overcome adversity. Redman recounts his story, from his grueling SEAL training to how he found the balance between arrogance and humility all while fighting America's enemies on far flung battlefields. He speaks candidly of the grit that helped him carry on despite grievous wounds, and of the extraordinary love and devotion of his wife, Erica, and family, without whom he would not have survived. Vivid and powerful, emotionally resonant and illuminating, filled with sixteen pages of photos, The Trident traces the evolution of a modern warrior, husband, and father—a man who has come to embody the never-say-die spirit that defines America's elite fighting force.

The Swan and The Sergeant Jan 02 2020 \$50,000 to appear on Dancing with the Stars. \$50,000 to humiliate myself on national television, lose my privacy, and become the laughingstock of the Marine Corps. But I can't say no. Not even if it means I have to face the woman who once destroyed me. Ten years ago, reality star Selena Martinez was my dance partner and my girl. Though the self-professed ugly duckling is now a beautiful swan, the girl I fell in love with is long gone. Consumed with being a celebrity, her inner beauty has been replaced by an ugly lust for fame. When our coach offers me \$5,000 a week to appear on TV's hot ballroom dance reality show, I have no desire to relive my painful past with Selena, but I made a promise to my buddy that I'd take care of his wife and kids if he died on the battlefield. One season, ten weeks, a small sacrifice to make for the man who saved my life. Hand me my dance shoes. I'm in. (A version of this book was originally published as Love Waltzes In and Swing. Unholy Code Sep 02 2022 The "Summer of Blood" explodes. The U.S. is under siege from foreign jihadists and domestic terrorists. When a brilliant exploit strikes at the heart of the National Security Agency's own network, former NSA operative Lana Elkins discovers that it came from within the United States itself. More surprising still is the attacker: "Steel Fist," a cyber-savvy radical white supremacist whose legions feed on his anti-Islamic exhortations. His popularity only grows when a jihadist team carries out a bold, but baffling, attack on the Louisiana coast, bringing ashore a lethal invader no one can see. Most mysterious of all are Golden Voice, a hacker of unparalleled skill with a murderous agenda and a secret past, and Tahir Hijazi, a Muslim refugee from Sudan with his own shadowy history. When Tahir's young nephew starts dating Lana's daughter Emma, Steel Fist calls upon his fans to embark on a new mission: assassinate the entire Elkins family. As extremists battle each other—with Lana fighting both ends from the middle—the conflict becomes deeply personal, the stakes tragically high. In Thomas Waite's edgiest tale yet, battles savage the American heartland, shaking the very foundations of the world's mightiest nation.

Advances in Nuclear Science and Technology Jun 18 2021 Our volume in the annual review series on this occasion represents a departure from our usual practice in that it serves as a Festschrift for Eugene Wigner. Dr. Wigner has won many honours in his long, wide ranging and distinguished career spanning so many upheavals in civilized life. The editors and the authors, indeed the whole nuclear engineering community, will wish to join in a modest but further acknowledgement of the contributions he has made to nuclear engineering, not least to the morality and professionalism of nuclear engineering in a year that has raised such international concerns over safety. It suffices to make a bald statement of Eugene Wigner's life and times here, for the first article of the volume is a loving appreciation by his long-time colleague, Alvin Weinberg, an evaluation of his contribution historically during and after the Second World War but equally an account of the philosophy which Wigner provided to the burgeoning profession. Eugene Wigner was born 17th November, 1902 in Budapest, Hungary and his early schooling is described by Dr. Weinberg.

modern day combat that compares with the best of the timeless classics by Tom Clancy, Dale Brown, and Stephen Coonts. This one must not be missed!" —Mark Greaney, #1 New York Times bestselling author of Mission Critical A terrorist breach of the computer systems of the three most powerful navies is about to set them on a collision course for World War III. Rafiq Roshed is one of the most wanted men in the world. A terrorist with a virulent grudge against the West, he's disappeared into North Korea where he quietly launches cyber sneak attacks in service of Kim Jong-un. But now he's about to unleash his virtual masterpiece—a computer virus that, once inserted into the command systems of a military, not only takes over, but also learns the art of war. First penetrating the Chinese, he has their war machine launch a series of attacks on the U.S. Pacific forces. Don Riley, head of U.S. Cyber Command, discovers that not only have the Chinese lost control of their military, but the same virus has infected the American network. It's only a matter of time before the U.S. loses control of its own military. His secret weapon in this war is a trio of supremely talented midshipmen from the U.S. Naval Academy, who uncover the infiltration, and are working to track down the elusive terrorist. But time is running out. China and Japan have lost control of their military and the U.S. is in danger of doing the same. The weapons are hot and the result is an ever-larger real-world conflict where casualties continue to mount. The only remaining hope is to find and stop the attack at its source—before time runs out.

Code Over Country Jun 06 2020 A hard-hitting exposé of SEAL Team 6, the US military's best-known brand, that reveals how the Navy SEALs were formed, then sacrificed, in service of American empire. The Navy SEALs are, in the eyes of many Americans, the ultimate heroes. When they killed Osama Bin Laden in 2011, it was celebrated as a massive victory. Former SEALs rake in cash as leadership consultants for corporations, and young military-bound men dream of serving in their ranks. But the SEALs have lost their bearings. Investigative journalist Matthew Cole tells the story of the most lauded unit, SEAL Team 6, revealing a troubling pattern of war crimes and the deep moral rot beneath authorized narratives. From their origins in World War II, the SEALs have trained to be specialized killers with short missions. As the wars in Iraq and Afghanistan became the endless War on Terror, their violence spiraled out of control. Code Over Country details the high-level decisions that unleashed the SEALs' carnage and the coverups that prevented their crimes from coming to light. It is a necessary and rigorous investigation of the unchecked power of the military—and the harms enacted by and upon soldiers in America's name.

Building the Trident Network Oct 11 2020 In Building the Trident Network, Maggie Mort approaches the United Kingdom's Trident submarine and missile system as a sociotechnical network. Drawing on the sociology of scientific and technical knowledge and on actor-network theory, Mort recounts how the Trident program was stabilized in the United Kingdom and brought into "successful" production. She uncovers the nature of this success by retelling unofficial histories of Trident, of production roads not taken, and of potential technological "distractions." The production of Trident, she shows, was not inevitable but contingent and problematic. Using material from interviews and local texts, Mort explores the emergence of a counternetwork in the form of a workers' campaign for alternative technologies. She develops concepts of "disenrollment" and "absent intermediaries," in which redundant workers and marginalized technologies serve to discipline and reinforce the dominant network as production shrinks. She also examines the maintenance of the barrier between the technical and the social/political in this context. The management of uncertainties within the Trident production program emerges as critical to its successful completion.
