Political Landscapes of the Late Intermediate Period in the Southern Andes Jul 31 2022 This book studies the relationship between pukaras and their surrounding landscape, focusing on the architectural and settlement variability registered in both contexts. It is the outcome of a symposium held at the XIX National Congress of Argentine Archaeology (San Miguel de Tucuman, August 8–12, 2016) entitled, "Pukaras, strategic settlements and dispersed settlements: Political landscapes of the Late Intermediate Period in the Southern Andes." Based on the topics discussed at the event, this book presents nine case studies covering a large geographic area within the Southern Andes (northwestern Argentina, northern Chile and southern Bolivia), and breaking the national barriers that tend to atomize pre-Hispanic landscapes. The respective chapters cover a wide range of themes: from architectural and settlement variability, ways to build and inhabit space, social segmentation and hierarchy; to endemic conflict, analysis of accessibility and visibility,

spatiality and temporality of landscapes; as well as new dating. This book goes beyond the Late Intermediate Period (LIP) analyses from the perspective of fortified settlements and material evidence related to war, by placing the focus on how ancient political landscapes were constructed from the relation between the pukaras and other sites as part of the same territory. The methodologies used include pedestrian surveys, photogrammetric surveys with UAVs (unmanned aerial vehicles) or drones, topographic and architectural surveys, excavations of households, ceramic and rock art analysis, and spatial analysis with geographic information systems (GISs). Given the numerous thematic interconnections between the contributions, the Editors have organized the chapters geographically, moving from south to north: from the southern valleys of Catamarca Province in Argentina to Lipez in the southern part of the Bolivian Altiplano, passing through the Calchaqui valleys of Catamarca, the puna and Quebrada de Humahuaca of Jujuy in northwest Argentina and the Antofagasta region in northern Chile. The book provides valuable new theoretical and methodological perspectives on the study of political landscapes of the Late Intermediate Period in the Southern Andes .

Small Flying Drones Dec 24 2021 This book focuses on small flying drones and their applications in conducting geographic surveys. Scholars and professionals will discover the potential of this tool, and hopefully develop a conceptual and methodological framework for doing the following things: a) Translate their data acquisition needs into specifications. (b) Use the developed specifications to choose the best accessible configuration for their drones, and (c) Design and organize effective and low-cost field deployment and flight operations by integrating technical aspects with regulatory and research requirements. Readers can apply this knowledge to work in cartography, environmental monitoring and analysis, land-use studies and landscape archaeology. Particular attention is also given to the reasons why a drone can dramatically boost a geographer's capability to understand geographic phenomena both from hard-science and humanities-oriented approach.

Lagoon Environments Around the World Jan 25 2022 Lagoon Environments Around the World - A Scientific Perspective covers a wide range of topics. Typically bordering between land and sea, lagoons are among the most diversely utilized waterways on the planet. Lagoons are extremely important environments socio-economically, and their usage places ever increasing stress on these very sensitive aquatic regions. The effective management of shallow aquatic environments requires a detailed scientific understanding of the various contributory natural processes. This has both environmental and economic implications, especially where there is any anthropogenic involvement. This book draws on international scientific research to examine the following lagoon related issues: classification, circulation hydrodynamics, ecosystems, sedimentation, anthropogenic stresses, and response to extreme events. The research was carried out by researchers who specialize in shallow water processes and related issues.

In *Heroes: A Tribute*, artist Doug Meyer celebrates the lives and accomplishments of creative pioneers who were victims of HIV/AIDS in the early years of the epidemic. Brilliant figures from the worlds of art, design, film, and dance are honored in this art book—people such as Robert Mapplethorpe, Keith Haring, Rudolph Nureyev, Freddie Mercury, Rock Hudson, John Duka, Tina Chow, Klaus Nomi, Halston, and Angelo Donghia.

Heroes began as an installation at a DIFFA (Design Industry Foundation to Fight AIDS) event, and grew into a traveling exhibition. The portraits vary significantly in form, material, and style, and incorporate drawing, painting, sculpture, and photography. In his multi-dimensional artwork, Meyer often blends techniques and media, such as terracotta, églomisé, papier-mâché, and computer-generated collage. The text includes essays by Meyer and contributing writer Beth Dunlop as well as brief biographies of each hero that highlight the important contributions these figures made to the worlds of art, design, and culture. This beautifully designed book features sophisticated graphic design and includes pages from Doug Meyer's sketchbooks showing his artistic process. A true celebration, *Heroes: A Tribute* both pays homage to these visionary creatives who died too soon, and it teaches younger generations about these important figures. This book will appeal to all who have an interest in art, design, fashion, creativity, gay and LGBTQ issues and history, and more.

Intuitive Alphabet, Collector's Edition Jan 01 2020 Intuitive Alphabet by artist Michele Oka Doner is both an alphabet book and an artistic meditation on the connection between humans and nature. Minimal text, handwritten by the artist, is paired with photographs of sea objects that represent forms. In Intuitive Alphabet, acclaimed artist Michele Oka Doner has created a personal interpretation of the alphabet book as well as a deeply thoughtful, artistic, and inspiring exploration of the fundamental connection between humans and natures. Minimal text, handwritten by the artist, is paired with photographs of sea objects that represent forms, such as "A is For Animal," and "S is for Spiral." The result is a thoroughly

original, evocative, and thought-provoking work of art that underscores the profound and fundamental links between humans and nature and reminds us that life itself came from the sea. Oka Doner grew up in Miami Beach combing the sand for treasures—shells, stones, coral—that formed her own alphabet well before she knew how to read. This artist's book is an homage to that world of discovery and conveys a profound message about looking and seeing. On an even deeper level, *Intuitive Alphabet* offers insights into the ways in which language has evolved and is learned. The Collector's Edition of *Intuitive Alphabet*, produced in a limited edition of 150, is a meticulously crafted, large-scale art book that will appeal to all who appreciate art, nature, and the sea. The cover is fabricated from handmade paper and hand-lettered by the artist. Each book is numbered and signed by Michele Oka Doner, and includes an original drawing by the artist. Proceeds from the Collector's Edition benefit Oceana.

The Book of the Sword Nov 10 2020 "The history of the sword," the author writes in his introduction, "is the history of humanity." For centuries, the sword has been a symbol of power, strength, liberty, and courage. In the Middle Ages, the image of a sword was used to signify the word of God. Nearly every culture in history has forged blades from stone or steel to fight in times of battle and protect in times of peace. In this groundbreaking work, Richard Francis Burton, explorer, translator, scholar, and swordsman, draws on a wealth of linguistic, archaeological, and literary sources to trace the millennia-old history of the sword. From its earliest days as a charred, sharpened stick to the height of craftsmanship in the modern era, the sword has been the weapon of choice for warriors of all stripes. In eloquent, captivating prose, Burton describes: • Dirks • Daggers • Knives • Sabers • Cutlasses • The origin of the weapon • The weapons of the age of wood • The Copper Age of weapons • The Iron Age of weapons • The sword in ancient Egypt • The sword in ancient Greece • And more Nearly three hundred line drawings enhance Burton's richly detailed text. Any reader of history or student of weaponry will find this book a fascinating, highly enjoyable read.

Soluções em Engenharia Mecânica - Edição 2019 Jul 19 2021 Livro com coletânea dos melhores trabalhos de conclusão de curso desenvolvidos no ano de 2018 no curso de Engenharia Mecânica da Universidade Tecnológica Federal do Paraná, Campus Curitiba

Engineering Design Applications III Mar 15 2021 This book provides an update on recent advances in various areas of modern engineering design, such as mechanical, materials, computer, and process engineering, which provide the foundation for the development of improved structures, materials, and processes. The modern design cycle is characterized by the interaction of different disciplines and a strong shift toward computer-based approaches involving only a small number of experiments for verification purposes. A major driver for this development is the increased demand

for cost reduction, which is also connected to environmental demands. In the transportation industry (e.g. automotive or aerospace), where there is a demand for greater fuel efficiency, one solution is lighter structures and/or improved processes for energy conversion. Another emerging area is the interaction of classical engineering with the health and medical sector.

Experiments in Reduced Gravity Apr 15 2021 *Experiments in Reduced Gravity: Sediment Settling on Mars* is the first book to be published that reflects experiments conducted on Martian geomorphology in reduced gravity. The book also evaluates the need to develop new methods for analyzing new information by providing a conceptual outline and a case study on how experiments can be used to test current theoretical considerations. The conceptual approach to identifying the need for and role of experiments will be of interest to planetary scientists and geoscientists not necessarily involved with Mars, but those using experiments in their research who can apply the book's concepts. Includes figures, diagrams, illustrations, and photographs to vividly explore experiments and outcomes in reduced gravity Provides an outline of planned experiments and questions related to Martian geomorphology Features results from the MarsSedEx 1 Experiment in 2012

The Greater Chaco Landscape May 17 2021 Since the mid-1970s, government agencies, scholars, tribes, and private industries have attempted to navigate potential conflicts involving energy development, Chacoan archaeological study, and preservation across the San Juan Basin. The Greater Chaco Landscape examines both the imminent threat posed by energy extraction and new ways of understanding Chaco Canyon? and Chaco-era great houses and associated communities from southeast Utah to west-central New Mexico in the context of landscape archaeology. Contributors analyze many different dimensions of the Chacoan landscape and present the most effective, innovative, and respectful means of studying them, focusing on the significance of thousand-year-old farming practices; connections between early great houses outside the canyon and the rise of power inside it; changes to Chaco's roads over time as observed in aerial imagery; rock art throughout the greater Chaco area; respectful methods of examining shrines, crescents, herraduras, stone circles, cairns, and other landscape features in collaboration with Indigenous colleagues; sensory experiences of ancient Chacoans via study of the sightlines and soundscapes of several outlier communities; and current legal, technical, and administrative challenges and options concerning preservation of the landscape. An unusually innovative and timely volume that will be available both in print and online, with the online edition incorporating video chapters presented by Acoma, Diné, Zuni, and Hopi cultural experts filmed on location in Chaco Canyon, *The Greater Chaco Landscape* is a creative collaboration with Native voices that will be a case study for archaeologists and others working on heritage management issues across the globe. It will be of interest to archaeologists specializing in Chaco and the Southwest, interested in remote sensing and geophysical landscape-level investigations, and working on landscape preservation and phenomenological investigations such as viewsapes and soundscapes. Entrepreneurial Marketing Aug 20 2021 How do you sell an innovative product to a market that does not yet exist? Entrepreneurial businesses often create products and services based on radically new technology that have the power to change the marketplace. Existing market research data will be largely irrelevant in these cases, making sales and

marketing of innovative new products especially challenging to entrepreneurs. Entrepreneurial Marketing focuses on this challenge. Classic core marketing concepts, such as segmentation, positioning and the marketing mix undergo an 'extreme makeover' in the context of innovative products hitting the market. Edwin J. Nijssen stresses principles of affordable loss, experimentation and adjustment for emerging opportunities, as well as cooperation with first customers. Containing many marketing examples of successful and cutting edge innovations (including links to websites and videos on the Internet), useful lists of key issues and instructions on how to make a one-page marketing plan, Entrepreneurial Marketing: An Effectual Approach provides a vital guide to successfully developing customer demand and a market for innovative new products. This second edition has been thoroughly expanded with: a one-page marketing plan which now focuses on the three entrepreneurial challenges that can be easily adapted; coverage of the customer development process; and updated references and new examples. This book provides students and entrepreneurs with the fundamental tools to succeed in marketing.

Introducción a la Valoración de Inmuebles en Régimen de explotación económica Nov 30 2019 Ante todo indicar al lector que éste no es un libro que estudie el aspecto legal de la valoración inmobiliaria, sino que su objetivo está encaminado a que de una forma totalmente práctica se inicie en la tasación de inmuebles en función de los rendimientos o beneficios

económicos que se obtienen de la explotación que produce el bien inmueble. Este tipo de valor (Valor de renta) se obtiene en función de la renta periódica que se puede obtener del inmueble a valorar. En cierto modo, lo que se valora es más un negocio que un inmueble, por cuanto se parte de la base de su explotación comercial futura.
