**Lancashire Murders** Oct 11 2020 Contained within the pages of this book are the stories behind some of the most notorious murders in Lancashire's history. The cases covered here record the county's most fascinating but least known crimes, as well as famous murders that gripped not just Lancashire but the whole nation. From Liverpool's Florence Maybrick (was she really guilty of poisoning her hypochondriac husband with arsenic and was he indeed Jack the Ripper?) to late Victorian Bury's disturbing 'Body in the Wardrobe' case; from the infamous Drs Ruxton and Clements, who saw off five wives between them, to Blackpool's Louisa Merrifield, whose loose tongue was undoubtedly her downfall, this is a collection of the county's most dramatic and interesting criminal casesAlan Hayhurst has been uncovering evidence about the county's historic murders for more than forty years. In writing this book he has visited all of the murder sites, consulted original documents and contemporary reports, and spoken to those who has personal memories of the cases concerned. Lancashire Murders is a unique re-examination of the darker side of the county's past.

[Internet of Things, Infrastructures and Mobile Applications](#) Dec 13 2020 This book gathers papers on interactive and collaborative mobile learning environments, assessment, evaluation and research methods in mobile learning, mobile learning models, theory and pedagogy, open and distance mobile learning, life-long and informal learning using mobile devices, wearables and the Internet of Things, game-based learning, dynamic learning experiences, mobile systems and services for opening up education, mobile healthcare and training, case studies on mobile learning, and 5G network infrastructure. Today, interactive mobile technologies have become the core of many—if not all—fields of society. Not only do the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions introduced on a nearly daily basis also boost this trend. Discussing and assessing key trends in the mobile field were the primary aims of the 13th International Conference on Interactive Mobile Communication Technologies and Learning (IMCL2019), which was held in Thessaloniki, Greece, from 31 October to 01 November 2019. Since being founded in 2006, the conference has been devoted to new approaches in interactive mobile technologies, with a focus on learning. The IMCL conferences have since become a central forum of the exchange of new research results and relevant trends, as well as best practices. The book's intended readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, further education lecturers, practitioners in the learning industry, etc.

*Handbook of Central Auditory Processing Disorder, Volume II, Second Edition* Mar 04 2020 Chermak and Musiek's two-volume, award-winning handbooks are back in newly revised editions. Extensively revised and expanded, Volume II provides expanded coverage of rehabilitative and professional issues, detailing intervention strategies for children and adults. Volume I provides comprehensive coverage of the auditory neuroscience and clinical science needed to accurately diagnose the range of developmental and acquired central auditory processing disorders in children, adults, and older adults. Building on the excellence achieved with the best-selling 1st editions which earned the 2007 Speech, Language, and Hearing Book of the Year Award, the second editions include contributions from world-renowned authors detailing major advances in auditory neuroscience and cognitive science; diagnosis; best practice intervention strategies in clinical and school settings; as well as emerging and future directions in diagnosis and intervention. Exciting new chapters for Volume II include: Evidence Supporting Auditory Training in Children, by Jeffrey Weihing, Gail D. Chermak, Frank E. Musiek, and Teri James BellisSchool Polices, Process, and Services for Children with CAPD. by Georgina T.F. Lynch and Cynthia M. RichburgHistorical Foundations/Pioneers, by James W. **The Sourcebook of Listening Research** Aug 28 2019 Winner of the 2018 Distinguished Book Award from the Communication and Social Cognition Division of the National Communication Association. Essential reading for listening researchers across a range of disciplines, The Sourcebook of Listening Research: Methodology and Measures is a landmark publication that defines the field of listening research and its best practices. the definitive guide to listening methodology and measurement with contributions from leading listening scholars and researchers Evaluates current listening methods and measures, with attention to scale development, qualitative methods, operationalizing cognitive processes, and measuring affective and behavioral components A variety of theoretical models for assessing the cognitive, affective, and behavioral facets of listening are presented alongside 65 measurement profiles Outlines cutting-edge trends in listening research, as well as the complexities involved in performing successful research in this area

*Effective Scientific Communication* Apr 04 2020 Writing and the sciences are intricately linked. Without writing, science would not exist -- and could not be funded, communicated, replicated, enhanced, or applied. Further, writing helps scientists (and students) understand the science, explain the results of research in a greater context, and develop new ideas. Working from this philosophy, this book primarily addresses undergraduate STEM majors and minors who want or need to improve their scientific writing skills. Grounded in the basics of rhetorical research and scientific writing practices and guided by the authors' experiences in the classroom, this book makes the case that writing is an essential component of science regardless of the stage of the scientific process, and that it is in fact a component of thinking about science itself. Featuring student-centered stories that place each topic in context and suggestions for practice, Hanganu-Bresch and Flaherty arm STEM students with the skills to enhance critical thinking and cultivate good writing habits.

**Assessing Second Language Reading** Nov 04 2022 This book investigates the issue of cloze-validity as a measure of second language reading comprehension. It starts off by making a distinction between general reading ability and the more specific reading comprehension followed by a thorough review of the related research on L2 reading comprehension and sorting out the confusion in the literature in this categorization. A comprehensive account of cloze procedure is presented discussing its origin, different versions, its use for teaching and testing purposes, as well the latest research on cloze as measures of readability, language proficiency and second language reading. The book includes studies conducted at several stages on validating cloze as a measure of reading and interview and questionnaire techniques are applied to investigate the validity of eight cloze tests, criterion reading tests, and other cloze and reading tests in general. Two new cloze tests, i.e. reader-centered cloze test and phrase cloze test, are also introduced and researched as measures of reading ability. The book concludes with suggestions for developing tests that can better measure reading comprehension in light of recent research insights on the complex and dynamic nature of reading. This book will appeal to researchers, lecturers and graduate and post-graduate students taking a course in Second Language Acquisition, Applied Linguistics, TESOL, Language Assessment, and Educational Measurement.

*Study Guide for Today's Medical Assistant - E-Book* Jul 20 2021 Corresponding to the chapters in the main Bonewit text, Study Guide for Today's Medical Assistant, Clinical & Administrative Procedures, 3rd Edition features a variety of practical exercises, activities, checklists, review questions, and more to elp users master important medical assisting knowledge and skills. This comprehensive study guide has been thoroughly updated to reflect the 2015 CAAHEP competencies and key areas of practice, such as: electronic medical records, HIPAA regulations, advanced directives, emergency preparedness, ICD-10 coding, billing documentation, medical office technology, medical asepsis, vital signs, pediatric immunizations and injections, colonoscopy procedures, IV therapy, and CLIA waived tests. Consistent, meticulous study guide coverage aligns seamlessly with the main Bonewit text and all other Bonewit solution learning products. Evaluation of Competency checklists assess readers'

performance versus stated objectives and performance standards. Critical thinking activities encourage readers to think outside the box and imagine what they would do in real-life situations. Laboratory assignments at the beginning of each chapter give readers a guide on each chapter's procedures, including guidelines on how many practices are required, which study guide pages correlate to the procedure, and which procedures are also in the procedural videos. Key term assessment tests readers' knowledge of the terms presented in the main text. Evaluation of Learning questions assess readers' progress and are an excellent tool to prepare for the certification exam. Practice for Competency checklists help readers practice each of their clinical skills. Pharmacology math exercises give readers a chance to practice their basic math skills in a way that relates to their future job. Chapter assignment tables at the beginning of each chapter guide readers through the textbook and study guide chapters, and provides a great tracking device for recording progress of textbook reading assignments and study guide activity assignments. NEW! Updated material aligned to most current CAAHEP and ABHES competencies ensures success and employability for today's medical assistants. NEW! Material from the chapter on nutrition is also incorporated into the accompanying study guide material. NEW! Updated content on emergency preparedness and medical records ensure readers are up-to-date on these key topics. NEW! Application to SimChart for the Medical Office where appropriate allows readers to prepare for the real world by working on Elsevier's own educational EHR. NEW! Expanded A&P key terminology sections give readers ample A&P key term practice.

**Verbal Behavior Analysis** Nov 23 2021 Verbal Behavior Analysis describes newly identified tools to provide verbal capabilities to children who have language delays or who lack language. This book assists teachers and parents in their efforts to help children produce novel and spontaneous verbal functions, acquire language incidentally, and become socially verbal. This book responds to the large demand for effective language development tools for children with no language and severe language delays related to autism and other disabilities by providing practitioners with the means to advance verbal development. Step-by-step protocols describe how to move children from pre-listeners to listeners, non-speakers to speakers, speakers to readers and writers, and from non-social to socially verbal individuals. The procedures are derived from numerous experiments and applications with children in three countries, and are based on Skinner's (1957) theory of language function and on research findings that extended the theory to verbal development. The authors synthesize research published across several different journals, including many new findings, in ways that provide readers with the current state of the science of verbal behavior and its application to children with real needs. While the book emphasizes the vocal production of speech, the procedures are applicable to all forms of language (signs, pictures, voice-generating devices). The book includes an extensive glossary of terms from behavior analysis and verbal behavior analysis. The instructor's manual provides a course outline, quizzes, and protocols for training professionals to use the procedures with fidelity in applied settings. If you are a professor accustomed to receiving review copies, we regret that due to the limited number of appropriate courses we are unable to provide review copies of this title.

**Model Rules of Professional Conduct** Feb 24 2022 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

**The Routledge Handbook of Second Language Acquisition and Language Testing** Aug 09 2020 This Handbook, with 45 chapters written by the world's leading scholars in second language acquisition (SLA) and language testing, dives into the important interface between SLA and language testing: shared ground where researchers seek to measure second language performance to better understand how people learn their second languages. The Handbook also reviews how to best measure and evaluate the second language (L2) learners' personal characteristics, backgrounds, and learning contexts to better understand their L2 learning trajectories. Taking a transdisciplinary approach to research, the book builds upon recent theorizing and measurement principles from the fields of applied linguistics, cognitive science, psychology, psycholinguistics, psychometrics, educational measurement, and social psychology. The Handbook is divided into six key sections: (1) Assessment concepts for SLA researchers, (2) Building instruments for SLA research, (3) Measuring individual differences, (4) Measuring language development, (5) Testing specific populations, and (6) Measurement principles for SLA researchers.
