How Can Afghanistan Attract More Foreign Investment? Jul 05 2020 Master's Thesis from the year 2018 in the subject Business economics - Investment and Finance, grade: 75, Himachal Pradesh University, course: MBA, language: English, abstract: This thesis analyses various investment options in Afghanistan. Also, the question of which future options Afghanistan has to attract more foreign investment will be answered in this paper. Investment is the opportunity, which every business would want to avail to make growth, sustain and develop their business in the right time and pace. Everyone who needs to start a new business or continue his/her existing business, the basic need is to do investment on what they have in their pockets and according to their money and balance, they need to identify and modify more investment options which can give them low risk of losing their investment principle but also give them more profit. Investment is in the reality a way to use your savings for acquiring and getting more benefits in the future and Investment is the criteria for performing the best use of your money in various earning and profit tools and instruments. Emerging from twenty five years of conflict, Afghanistan, a landlocked and one of the poorest countries of the world, had performed better than the strong performers among the comparator countries in terms of broad macroeconomic indicators. Moreover, Afghanistan's economy is edging towards recovery. From its supportive regulatory framework for its estimated multi-trillion dollar mineral and hydrocarbon sectors to the country's new transport and energy-related investments, Afghanistan is fast becoming a highly business-friendly environment – regionally ranked 2nd in the World Bank's Doing Business Index's categories on establishing a business, taxes; 3rd on resolving insolvency, and 4th on contract enforcement – where investors can expect significant returns on investment.

Foreign Direct Investment in Latin America and the Caribbean 2018 Jun 23 2019 This publication sets out and analyses the main foreign direct investment (FDI) trends in the countries of Latin America and the Caribbean. In 2017, certain trends that had already emerged in the global economic landscape became more established. In particular, announcements of potential restrictions on trade and pressures to relocate production to developed countries were confirmed. At the same time, China has taken steps to restrict outflows of foreign direct investment (FDI) in order to align these flows with its strategic plan. Adding to these factors is the expansion of digital technologies, whose international expansion requires smaller investments in tangible assets. Firms in these areas are heavily concentrated in the United States and China, which reduces the need for cross-border mergers and acquisitions.

Mining Economics and Strategy Jan 23 2022 This book will help direct mining operations through the use of innovative economic strategies. The text covers what is meant by a cost-effective mining scheme, the economics of information, and the procedures for rational evaluation of uncertain projects.

World Investment Report 2020 Aug 18 2021 The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.

Handbook of Research on Global Aspects of Sustainable Finance in Times of Crises Aug 25 2019 Sustainable finance has been one of the emerging areas of finance in the last decade. With its emphasis on any form of financial services that take environmental, social and governance (ESG) considerations into account in decision-making processes, it can help to improve social well-being, preserve the ecosystems and promote sustainable economic development. Furthermore, it can contribute to economic and financial resilience, along with enabling sustainable recovery against crises arising from physical or financial shocks. The Handbook of Research on Global Aspects of Sustainable Finance in Times of Crises discusses theory and concepts, focuses on practices and strategies, addresses the recent challenges and trends, and presents future prospects regarding sustainable finance. It provides a global look at sustainable finance in a variety of contexts, along with highlighting contemporary issues in light of crises such as the climate emergency and the COVID-19 pandemic. Covering a wide range of topics such as climate finance, green finance, social finance, ESG investing and responsible banking, the book is ideal for corporate managers, portfolio managers, investors, financial analysts, researchers, academicians, students and policymakers.

Mineral Exploration Oct 08 2020 Globally, mineral exploration has grown significantly in recent years, driven by the rapid acceleration in prices for gold and diamonds since 2004 and the emergence of a middle class in both China and India—aggressively increased demand. Despite this resurgence, no single book has been published that takes an interdisciplinary approach in addressing the full scope of mineral exploration—from mining and extraction to economic evaluation, policies, sustainability, and environmental impacts. Mineral Exploration: Principles and Applications

accomplishes this by presenting each topic with theoretical approaches first followed by specific applications that can be immediately implemented in the field. Presents 16 case studies that allow readers to quickly apply exploration concepts to real-life scenarios in the field Includes more than 200 illustrations and full-color photographs that aid the reader in retaining key procedures and applications Each chapter is structured so that its topic is discussed theoretically first followed by specific applications Combines both theory and application in a multidisciplinary reference that thoroughly addresses the full scope of mineral exploration Authored by an instructor with more than 30 years of experience in the field and a decade as a consultant for commercial mining companies

Austria Mineral, Mining Sector Investment and Business Guide Volume 1 Minerals and Raw Materials: Strategic Information and Regulations May 03 2020 Austria Mineral & Mining Sector Investment and Business Guide - Strategic and Practical Information

The Politics of Extraction Jan 29 2020 "In the face of new extraction, communities in Latin America's hydrocarbon and mining regions use participatory institutions powerfully. In some cases, communities act within the formal participatory spaces, while in others, they organized "around" or "in reaction to" the institutions, using participatory procedures as focal points for escalating conflict. Communities select their strategies in response to the participatory challenges they confront. Those challenges are associated with contestation over the boundaries that determine access to participatory institutions. Contestation over the line between subnational authority vis-à-vis central-state jurisdictions heightens communities' challenge of initiating a participatory process. Disagreement over the territorial delineation of communities impacted by planned extraction creates for formally non-impacted communities the challenge of gaining inclusion in participatory events. Finally, disputes over the boundary that sets representatives of an affected community apart from the community at large intensify the community's challenge of conveying a position on extraction. This analysis of thirty major extractive conflicts in Bolivia, Colombia, and Peru in the 2000s and 2010s examines community uses of public hearings built into environmental licensing, state-led prior consultations with native communities, and local popular consultations, or referenda"--

Building Resilience Oct 20 2021 A sustainable path to development has profound consequences for all economic activities and related policies. The mining industry, which provides input to almost every product and service in the world, is highly relevant to the goal of achieving sustainable development in mineral-rich countries and in the global economy. In addition, environmental sustainability is a critical concern for mining companies, whose growth is increasingly affected by climate change. Given the centrality of minerals and metals to our way of living, *Building Resilience: A Green Growth Framework for Mobilizing Mining Investment* investigates the extent to which the mining industry can contribute to green growth. Despite what ought to be a tight nexus of public and private interest in targeted green sector investment, this report finds that there is a misalignment between mining companies' investment in climate-sensitive production processes, and policy makers' efforts to develop a cohesive green economy framework for industry to navigate. The private and public sectors regard the climate agenda and the development of local economic opportunity as separate matters. Neither industry nor government have yet to effectively leverage their climate imperatives and mandates to seize green growth opportunities. To address this misalignment, this report proposes a framework to help mining companies and governments integrate climate change and local economic opportunity activities. Going further, the report offers examples of projects and policies that support green growth: particularly climate-related activities that create scalable economic value and invest in long-lasting green infrastructure.

An Insider's Guide to the Mining Sector Jul 17 2021 - In 2003, four mining shares rose over four times in price, with one gaining ten times.- In just the first two months of 2004, 26 mining shares increased more than 20%, with five shares doubling.- Merrill Lynch's World Mining Trust is the UK's best performing fund over the past three years, having risen by over 200 per cent. But is the mining boom about to end? Not according to this book, by Michael Coulson, Chairman of the Association of Mining Analysts. Coulson argues that, if anything, we are still in the early stages of prolonged strength in mining stocks and despite what some commentators are saying, the boom is far from over. **FROM THE BACK COVER** The prospect of instant riches gives the mining sector an obvious glamour. And when the mining sector begins to run it can be an awesome sight and the excitement generated can be every bit as seductive and heady as that which enveloped markets during the internet boom. But due to the counter-cyclical nature of many mining stocks, they can also offer a valuable refuge when stock markets turn down. In this book, Michael Coulson gives a masterly overview of the sector, explains both the rewards and the pitfalls of investing in mining shares and argues convincingly that mining should once again form a core sector for all investors. The book is for anyone interested in mining, and particularly mining as an investment. Whilst it contains material which will be useful to even experienced followers of the sector, its main target is those who are interested in mining but perhaps not particularly familiar with the sector, and would like to know more. All the subjects are covered that are fundamental to acquiring sufficient knowledge about the mining sector to invest in it with confidence. While the mining s **Cryptocurrency Investing For Dummies** Mar 25 2022 The ultimate guide to the world of cryptocurrencies! Book length: 59 pages **Corruption and Fraud in Investment Arbitration** Jul 25 2019 This book offers an exciting overview of how the investor-state

dispute settlement mechanism currently deals with allegations and/or evidence of fraud and corruption. It provides a detailed analysis of the legal framework under which arbitral tribunals usually operate in investment disputes involving allegations of illegality. Readers will find step-by-step examinations of the corruption and fraud arguments employed by arbitral tribunals in ten landmark ISDS cases, followed by a chapter summarizing the status quo on the topic. The final part of the book discusses the identified challenges of addressing illegality issues in investment arbitration and potential solutions, including the creation of a multilateral investment court.

Criminology and Climate Feb 09 2021 This book explores the role of the insurance industry in contributing to, and responding to, the harms that climate change has brought and will bring either directly or indirectly. The Anthropocene signifies a new role for humankind: we are the only species that has become a driving force in the planetary system. What might criminology be in the Anthropocene? What does the Anthropocene suggest for future theory and practice of criminology? Criminology and Climate, as part of Routledge's Criminology at the Edge Series, seeks to contribute to this research agenda by exploring differing vantage points relevant to thinking within criminology. Contemporary societies are presented with myriad intersecting and interacting climate-related harms at multiple scales. Criminology and Climate brings attention to the finance sector, with a particular focus on the insurance industry as one of its most significant components, in both generating and responding to new climate 'harmscapes'. Bringing together thought leaders from a variety of disciplines, this book considers what finance and insurance have done and might still do, as 'fulcrum institutions', to contribute to the realisation of safe and just planetary spaces. An accessible and compelling read, this book will appeal to students and scholars of criminology, sociology, law and environmental studies and provides readers with a basis to analyse the challenges and opportunities for the finance sector, and in particular the insurance industry, in the regulation of climate harms.

World Investment Report 2019 Sep 18 2021 The 2019 edition of the World Investment Report focuses on special economic zones (SEZs) which are widely used across most developing and many developed economies. Although the performance of many zones remains below expectations, the rate of establishment of new zones is accelerating as governments increasingly compete for internationally mobile industrial activity. Policymakers face not only the traditional challenges to making SEZs succeed, including the need for strategic focus, sound governance models, and effective investment promotion tools, but also new challenges brought about by the sustainable development imperative, the new industrial revolution, and changing patterns of international production. The Report explores the place of SEZs in today's global investment landscape and provides guidance for policymakers on how to make SEZs work for sustainable development. It presents international investment trends and prospects at global, regional and national levels, as well as the evolution of international production and global value chains. It analyses the latest developments in new policy measures for investment promotion, facilitation and regulation around the world, as well as updates on investment treaties, their reform and investment dispute settlement cases.

The Specter of Global China Sep 26 2019 China has recently emerged as one of Africa's top business partners, aggressively pursuing its raw materials and establishing a mighty presence in the continent's booming construction market. Among major foreign investors in Africa, China has stirred the most fear, hope, and controversy. For many, the specter of a Chinese neocolonial scramble is looming, while for others China is Africa's best chance at economic renewal. Yet, global debates about China in Africa have been based more on rhetoric than on empirical evidence. Ching Kwan Lee's *The Specter of Global China* is the first comparative ethnographic study that addresses the critical question: Is Chinese capital a different kind of capital? Offering the clearest look yet at China's state-driven investment in Africa, this book is rooted in six years of extensive fieldwork in copper mines and construction sites in Zambia, Africa's copper giant. Lee shadowed Chinese, Indian, and South African managers in underground mines, interviewed Zambian miners and construction workers, and worked with Zambian officials. Distinguishing carefully between Chinese state capital and global private capital in terms of their business objectives, labor practices, managerial ethos, and political engagement with the Zambian state and society, she concludes that Chinese state investment presents unique potential and perils for African development. *The Specter of Global China* will be a must-read for anyone interested in the future of China, Africa, and capitalism worldwide.
