Readings in Medieval History Jan 29 2020 "Instructors of medieval history are fortunate to have at their disposal a new edition of the best selection of medieval primary sources in English translation available today. Like its predecessors, this fourth edition fulfills the promise expressed in the author's preface: to introduce us and our students to documents representing a great variety of genres, subjects, and places throughout medieval Europe and to present those documents in their entirety or in substantial portions. The documents allow us, the teachers, and more importantly, our students, the freedom to read in depth, select, and analyze---to practice history at its best, right in the classroom."---Piotr Gorecki, University of California, Riverside "Geary's careful and wise selection of texts in his reader provides the best balance between range and depth necessary for a successful source book. Students are introduced to the richness of medieval evidence and can engage with the personalities who produced it in a way that encourages further study and reflection on the Middle Ages."---Nicholas Everett, University of Toronto "Provides an excellent selection of complete texts or substantial extracts from key primary sources, helpfully grouped thematically and

illustrating many current issues in modern historical study ... an invaluable introduction."---Rosamond McKitterick, Newnham College, University of Cambridge "The best collection of medieval documents in print."---A.J. Andrea, University of Vermont For this new edition, Patrick J. Geary has incorporated more bibliographical information into the introductions to the readings. Five texts have been added to better reflect legal, religious, Polish, and women's history. A glossary is provided to help with unfamiliar terms. Educational Foundations Nov 28 2019 This anthology of critical readings (for students about to enter the teaching profession and for those interested in carefully examining schools and schooling) features provocative, engaging authors whose views are politicized, but whose writing and opinions matter - not because they are gadflies, but because their ideas work and their achievements as teachers, principals, and policy shapers are so notable. Educational Foundations: An Anthology of Critical Readings is organized around the following questions: Why teach? Who are today's students? What makes a good teacher? How should we assess student learning? What does a good school look like? How does one develop a critical voice (in the face of state mandates,

administrative edicts, and the continuous cycle of reform and retrenchment)? Alan S Canestrari and Bruce A Marlowe's answers are bold and refreshing. They eschew the unquestioning compliance so characteristic of new teachers. Also, by taking a hard look at traditional educational practice, they serve as models for the kind of reflective practitioners we hope pre-service students will become when they enter the field. The key feature of this anthology are the readings by authors who have discovered their own critical voices so that new teachers can begin to develop their own. These readings offer a platform for discussion and debate that may be used by instructors to increase student knowledge of pedagogy and to provide authentic opportunities for potential teachers to think critically about teaching and learning.

Flexible, easy to use, just enough detail and the number-one best selling rhetoric."

English L2 Reading Oct 27 2019 English L2 Reading: Getting to the Bottom, Second Edition remains a comprehensive, myth-debunking examination of how L1 features (orthographic system, phonology, morphology) can influence English L2 reading at the "bottom" of the reading process. It provides a thorough but very accessible linguistic/psycholinguistic examination of the lowest levels of the reading process. It is both theoretical and practical. The goal is to balance or supplement (not replace) top-down approaches and methodologies with effective low-level options for teaching English reading. Core linguistic and psycholinguistic concepts are presented within the context of their application to teaching. The text clearly explains the strategies that readers of other languages develop in response to their own writing systems (Chinese, Japanese, Arabic, Hebrew, other alphabets, or transparent Roman alphabetic systems), contrasted with an explanation of the strategies that English readers develop in response to the opaque orthography of English, and explicates how other low-level processing strategies for L1 morphology and word formation may aid or hinder processing in English L2 reading acquisition. A complete, balanced reading ideology should be big enough to embrace all reading theories and practices. In particular, it should be able to accommodate those researchers and teachers who find that attention to the details of language can also help students learn to read better. Many ESL/EFL teachers are interested in supplementing their successful whole-language methods with bottom-up reading strategies, but aren't sure how to do it. This book fills that gap. Changes in the Second Edition: *updated content in each chapter and clearer organization for the student to make the text more reader friendly; *expansion in Chapter 2 on alphabets, writing systems, and a brief

history of written English and spelling; *extended discussion in Chapter 3 of the cognition of written language and reading transfer; *addition of phonemic, vocal, subvocal, and articulatory development and L2 reading processing in Chapter 4, as well as instructional activities and strategies for teaching these skills to L2 readers; *elaboration of graphs and graphemes in Chapter 5, including discussion of developing graphemic knowledge, processing strategies, and their instructional application, and new sections on reading speed, pattern recognition, and word recognition; *development of the probabilistic section in Chapter 6, particularly the probabilities in context of L2 reading; *updated information on the topic of brain activation studies; and *new treatment of the topic of reading fluency, added in response to requests from many readers of the first edition. Intended for ESL/EFL reading researchers, teacher trainers and teachers, and as a text for MATESOL students, most chapters contain practical suggestions that teachers can incorporate into whole language methods to teach beginning or intermediate ESL/EFL reading (letters, pronunciation, “smart” phonics, morphemes, and vocabulary acquisition) in a more balanced way. Pre-reading discussion and study questions are provided to stimulate interest and enhance comprehension. End-of-chapter exercises help readers apply the concepts.
